

SRI VENKATESHA MANI

☎ +1 (720) 825-0829 ✉ sri.narayanan@colorado.edu in LinkedIn GitHub 📍 Boulder, Colorado

Education

University Of Colorado Boulder, MS In Computer Science **Aug 2023 – May 2025**

GPA: 3.91 — Relevant courses: Natural Language Processing, Machine Learning, Foundations Of Software Engineering, Neural Networks And Deep Learning, Data Mining, Database Systems, Numerical Linear Algebra.

SRM Institute Of Science & Technology, B.TECH In Computer Science & Engineering **Jun 2019 - May 2023**

GPA: 9.29 — Relevant courses: Data Structures & Algorithms, Object Oriented Design & Programming, Network Design & Management, Operating Systems.

Technical Skills

Programming Languages: Python, C++, Java, JavaScript, HTML, CSS.

Frameworks & Technologies: Flask, React JS, RESTful API, Linux, GraphQL

Databases: SQL (MySQL, PostgreSQL, SQLite), NoSQL (MongoDB, Redis).

Cloud & DevOps: Google Cloud, Git, CI/CD, Docker, Kubernetes, Postman, Jira, Agile(Scrum, Kanban)

AI/ML: TensorFlow, PyTorch, Keras, Scikit-Learn, LLM, Machine Learning, NLP, Deep Learning, GenerativeAI.

Work Experience

Software Engineering (Professional Master's Project), [Biocollate](#) | Boulder, Colorado **Aug 2024 – May 2025**

- Designed and developed a React-based front-end, creating log-in, authentication, and project creation pages, enabling secure user access and seamless experiment management.
- Developed a high-performance backend services using Go & PostgreSQL, improving system efficiency and reducing SBOL processing time by 20%, leading to faster execution of experiments.
- Implemented a Flask-based web server for managing SBOL metadata, enabling JSON based user-defined properties, improving traceability by 50% and cutting manual metadata entry time by 60%.

Graduate Teaching Assistant, [University of Colorado Boulder](#) | Boulder, Colorado **Aug 2024 – May 2025**

- Authored and graded assignments and exams for CSCI 1300: Starting Computing, while assisting students with C++ programming concepts during office hours.
- Ensured academic integrity for 100+ students by maintaining a seamless, violation-free examination process.

Software Development Intern, [Techfidelite Solutions](#) | Chennai, India **May 2024 – Aug 2024**

- Refined backend APIs and SQL queries, reducing response time by 30% through efficient request optimization.
- Implemented JWT authentication for RESTful services, cutting unauthorized access to under 5/month securely.
- Streamlined sprints using Jira, Teams, and GitHub Wiki, saving 20+ hours/month through better collaboration.

Software Development Intern, [ITJobxs.com](#) | Remote **May 2022 – Aug 2022**

- Developed user-friendly web components, enhancing UX and navigation based on 200+ feedback responses.
- Removed 1,200+ fake accounts in 2 months using bot detection via behavior pattern analysis techniques.
- Deployed reCAPTCHA-based validation, reducing monthly spam entries by 150+ through automated filtering.

Projects

RecipeRealm Web Application - [GitHub](#) | [Website](#) **Jan 2024 – May 2024**

- Built a full-stack recipe-sharing app using MERN stack, supporting 500+ recipes with JWT auth and CRUD operations.
- Integrated SDLC principles, Docker, GCP and Grafana tested via Postman and attained sub-300ms API response time.

AI Generated Text Detection using NLP - [GitHub](#) **Aug 2023 – Dec 2023**

- Built an AI text classifier using BERT & DistilBERT, achieving 85% accuracy in detecting AI-generated text.
- Improved data processing with Pandas & Scikit-learn, cutting 60+ hours per project in Kaggle Notebooks.

Deep Learning-Based Sentiment Analysis for Stock Prediction - [GitHub](#) **Jan 2023 – May 2023**

- Engineered an advanced stock price prediction model using machine learning techniques and sentiment analysis.
- Constructed few Deep Learning models written in Python, utilizing TensorFlow and Keras to enhance stock price prediction accuracy by analyzing sentiment data around 50,000 news.

Certifications

- Earned Certification in Machine Learning & Big Data using Python and Data Science with R Language.
- The C++20 Masterclass: From Fundamentals to Advanced, covering modern features and programming techniques.
