

SRUJAN AGRAWAL

AI SOFTWARE ENGINEER

United States | sru.agrawal.28@gmail.com | 9803958109 | linkedin.com/in/srujanagrawal

PROFILE

Dynamic AI Software Engineer with 4 years of diverse experience across software development and integration, driving impactful innovations in technology solutions. Demonstrated expertise in collaborating within agile teams to enhance platform functionalities, particularly in AI security and enterprise asset management. Proficient in developing scalable applications using Golang, TypeScript, and Python while maintaining rigorous testing standards. Committed to fostering collaboration and continuous learning, mentoring junior engineers and contributing to high-performance team cultures. Ready to leverage technical acumen and problem-solving skills to advance AI initiatives and deliver exceptional results.

PROFESSIONAL EXPERIENCE

Engineering Intern - Integrations, HiddenLayer

Jun 2025 — Present

- Collaborated within a scrum agile team to ensure seamless feature integration and functionality, making enhancements to a security platform designed to detect and defend against attacks on AI models.
- Spearheaded the integration of the HL platform with major cloud providers, leading the integration with AWS Bedrock and initiating development for AWS SageMaker. This work directly unlocked new client workflows and strengthened customer confidence.
- Developed and implemented core features using Golang, Typescript, and Python, adhering to high engineering standards by consistently maintaining over 75% test coverage with unit and integration tests.

Front End Software Developer, Humu

May 2022 — Jan 2023

- Collaborated with product managers and designers to develop and maintain a core HR web application, enhancing user experience and fostering better communication within teams and organizations.
- Designed and built key features, including a work-style quiz and organizational search, which directly improved cross-team communication and collaboration.
- Implemented and maintained robust automated testing processes using Python and Typescript to ensure the quality and stability of new features.
- Actively participated in Lunch and Learns and pair programming sessions, mentoring junior engineers and contributing to a culture of continuous learning.

Web Developer, Prometheus Group

May 2020 — May 2022

- Led the development of a high-quality Enterprise Asset Management (EAM) SaaS solution for a major client in the oil industry, creating data-driven charts and graphs to streamline project organization, work orders, and inventory management.
- Engineered and deployed a critical integration API using C# .NET that enabled seamless, two-way data synchronization between three in-house products (iPS, ITAR, and ICON), directly addressing a key client need.
- Developed the front-end sync functionality with TypeScript to provide a user-friendly interface for the new integration.

Associate Software Engineer, Allscripts

Jan 2019 — May 2020

- Collaborated with engineers and architects to develop scalable software solutions for the healthcare industry, focusing on the Emergency Department section of the large-scale Sunrise application.
- Led a critical refactoring effort to address an outdated data query system. By implementing a new caching

- mechanism, I reduced the application's manual refresh time from 40 seconds to under 4 seconds in large hospital settings, directly improving user workflow and performance by 92%.
- Integrated the Sunrise application with the Lyft platform, allowing hospitals to schedule transportation for patients directly from the system.
 - Worked directly with clients to resolve live, critical production issues, including debugging and fixing a system-crashing bug caused by a division-by-zero error.
 - Utilized C#, WPF, and SQL to maintain and enhance existing software through bug fixes and new feature development.

EDUCATION

Master of Science in Artificial Intelligence **Jan 2025 — May 2026**

University of Pennsylvania
Coursework in Machine Learning, Natural Language Processing, Computer Vision, Data Science

Bachelor in Computer Science **2014 — 2018**

University of North Carolina Charlotte
Concentration in Artificial Intelligence and Game Design

CERTIFICATIONS

Google Cloud Generative AI Leader **Oct 2025**

Expertise in leveraging Gen AI for business innovation, including practical application of Gemini Advanced, NotebookLM, and Google AI Studio to design custom AI agents and solve complex business challenges.
