Experience:

HiddenLayer | Engineer Intern - Integrations | Remote | May 2025 - September 2025

- Contributed on a Scrum-based team, participating in sprint planning, daily stand-ups, and retrospectives.
- Implemented Python, Typescript, and Go services for ML-pipeline vulnerability detection and mitigation, leveraging AWS services for scalable infrastructure.
- Wrote and maintained automated tests (unit, integration) using Gin, Pytest and Mocha, ensuring secure and reliable functionality.
- Collaborated with cross-functional engineers to perform code reviews and ensure adherence to best security practices.
- Researched AI-specific threat models (model poisoning, prompt injection, data leakage).

Humu | Software Engineer | Remote | May 2022 - Jan 2023

- Collaborated with cross functional teams to develop and maintain an HR web application, enhance user experience, and optimize employee performance.
- Drafted software requirements and managed design and testing processes for several key features, including work-style quiz, organization search, and team insights for manager effectiveness.
- Implemented and maintained automated testing processes to ensure the quality and stability of applications.
- Strived for easier accessible design by implementing a11y principles.
- Actively participated in Lunch and Learns and pair programming sessions with junior engineers.

Prometheus Group | Web Developer | Team Lead | Raleigh, NC | May 2020 - May 2022

- Led team in developing high-quality EAM SaaS solutions to meet market needs and exceed customer expectations, focusing on a11y principles.
- Collaborated with sister development teams and product owners to create an integration API for several in-house products.
- Mentored and provided guidance to junior software engineers.

- Conducted regular code reviews and provided feedback to ensure code quality and adherence to best practices.

Allscripts | Software Engineer | Raleigh, NC | Jan 2019 - May 2020

- Collaborated with software engineers and architects to design and develop scalable and efficient software solutions for the healthcare industry by using cutting-edge technologies and best practices.
- Increased performance and efficiency of desktop application by 92% by refactoring legacy code and implementing a caching mechanism.
- Worked directly with clients to resolve live critical issues.
- Maintained existing software through bug fixes and enhancements.
- Trained on corporate soft skills and expanded professional network as part of the Graduate Training Program.

Education:

University of Pennsylvania | Remote

- M.S. in Engineering, Concentration: Artificial Intelligence | Expected Graduation, May 2026
- Related Coursework: Computer Vision, Natural Language Processing, Machine Learning, Neural Networks, Data Science, Deep Learning

University of North Carolina at Charlotte | Charlotte, NC

- B.S. in Computer Science, Concentration: Artificial Intelligence | June 2018
- Related Coursework: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Object-Oriented Programming, Statistics & Applications, Game Design, Computer Vision

Central Piedmont Community College | Charlotte, NC

- A.S. in Computer Science | May 2017
- Related Coursework: Data Structures & Algorithms, Computer Programming, Object-Oriented Programming

Projects

Purple: LLM-Powered Restaurant POS System

- Developed an innovative Point-of-Sale (POS) system for restaurants,

integrating a Large Language Model (LLM) to significantly enhance and streamline information transfer and communication.

- Designed and implemented the LLM component to intelligently process natural language inputs, automating order routing and facilitating seamless communication between front-of-house and kitchen staff.
- Utilized Python and Hugging Face, and PostgreSQL.
- Demonstrated proof-of-concept for improved operational efficiency and reduced communication bottlenecks in a simulated restaurant environment.

Skills

- **Programming:** Python, JavaScript, Typescript, Go, HTML/CSS, SQL, Node.js, Next.js, React.js, Tailwind CSS, MUI, C#, Solidity
- **AI/ML:** Large Language Models (LLMs), Natural Language Processing (NLP), Machine Learning, Deep Learning, Computer Vision, Neural Networks, Data Science
- **Blockchain:** Blockchain Architecture, Smart Contracts
- **Cloud & Tools:** AWS, Git, Agile (Scrum), Visual Studio, MSSQL, Docker, Google Cloud Platform, Azure, Circle CI, Jenkins, Cursor
