

Srujan Vithalani | Software Engineer - Full Stack

+1-732-626-1986 | srujanvithlani@gmail.com | linkedin.com/in/srujan-vithalani/ | github.com/Srujan711 | Jersey City, NJ

PROFESSIONAL SUMMARY

Java developer with 2+ years building scalable systems and optimizing performance-critical applications. Experienced in microservices architecture, design patterns, and risk management through data analysis. Strong problem-solving skills with effective communication in collaborative development environments across large engineering teams.

EDUCATION

Virginia Tech <i>Master of Engineering in Computer Science</i>	Blacksburg, VA Jan 2023 – May 2024
Delhi Technological University <i>Bachelor of Technology in Computer Engineering</i>	New Delhi, India Aug 2018 – May 2022

EXPERIENCE

Full Stack Software Engineer <i>Webologix INC</i>	Oct 2024 – Present New York, USA
- Architected secure authentication system using TypeScript and React.js, delivering complete end-to-end solutions and reducing unauthorized access by 40% through TDD practices - Improved user experience for 10K+ daily users by optimizing API response times 75% (8s to 2s), reducing bounce rate and increasing customer satisfaction - Led technical mentorship for 3 junior developers through weekly pair programming, accelerating onboarding by 50% - Led customer-facing technical implementations for enterprise clients, serving as primary technical contact for system integrations and resolving complex technical issues - Enhanced database performance through connection pooling and indexing, reducing response time by 6+ seconds under high load	
Software Engineer 1 (Full-Stack) <i>Optum UHG</i>	Jun 2022 – Dec 2022 Hyderabad, India
- Collaborated in an Agile environment with 100+ engineers, resolving CI/CD bottlenecks to reduce deployment time by 20% per sprint - Developed healthcare claims processing system using Spring Boot and Java 17, building 35+ REST endpoints for critical operations - Improved system performance by optimizing database queries and indexing, reducing claim lookup time to mere seconds - Architected high-performance FastAPI services for healthcare data processing, implementing async programming and Pydantic validation to optimize database queries and improve system throughput by 25%	
Machine Learning Research Assistant <i>Delhi Technological University</i>	May 2021 – May 2022 New Delhi, India
- Implemented LSTM and Bi-LSTM networks in PyTorch for spam detection, achieving 94% accuracy on 10,000+ email dataset - Automated testing infrastructure with Python scripts and Docker, reducing setup time by 30% for 1000+ lab users - Accelerated data processing pipeline through multi-threading and parallel processing, improving throughput by 25%	

PROJECTS

AI Scrum Master <i>Python FastAPI, TypeScript, React, PostgreSQL, Docker, OpenAI API</i>	Jun 2025 - Present
- Built web application automating sprint planning and daily standups by integrating Jira, Slack, and GitHub APIs - Implemented semantic search with vector database to identify duplicate tickets and generate backlog suggestions - Created React dashboard with burndown charts and sprint tracking, deployed as a containerized application	
AI-Powered Mock Interview Platform <i>OpenAPI, Vue.js, Node.js, PostgreSQL</i>	Jan 2024 – May 2024
- Designed AI-powered interview platform with OpenAI API integration and video recording capabilities - Built responsive Vue.js frontend and scalable Node.js backend supporting concurrent user sessions - Delivered HTML5 media APIs for seamless video recording and playback functionality	
Video Conferencing Application <i>TypeScript, WebRTC, React, MongoDB, Microservices</i>	Aug 2023 – Dec 2023
- Developed secure video conferencing solution using WebRTC and TypeScript with privacy-first architecture - Built React frontend with HTML5 video controls and MongoDB backend for session management - Gathered feedback from 10+ beta testers and implemented improvements through Agile iterations	

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C/C++, HTML/CSS, SQL
Frameworks & Libraries: React.js, Spring Boot, Node.js, Vue.js, TensorFlow, PyTorch
Databases: PostgreSQL, MySQL, MongoDB, Redis
Developer Tools: Git, Docker, Kubernetes, Jenkins, AWS, GCP, IntelliJ IDEA, VS Code, PyCharm, Jira
Specializations: REST APIs, Microservices, CI/CD, Agile Development, Pair Programming, Machine Learning, Full-Stack Development
