

SRUJANA BIJJARAGI

Data Analyst

Los Angeles, CA | +1 (360) 320-6713 | Email: srujanabijjaragi193@gmail.com | [LinkedIn](#)

SUMMARY

- Data Analyst with 3+ years in the healthcare and business sectors, focusing on data integration, predictive modeling, and visualization.
- Skilled in SQL, Python, Power BI, and Tableau to create data-driven solutions and support decision-making processes.
- Proven expertise in designing and implementing ETL processes, ensuring clean and accurate data for reporting and analysis.
- Proficient in building and deploying machine learning models (e.g., Regression, KNN, Decision Trees) to predict customer behavior and business trends.
- In-depth knowledge of HIPAA compliance and healthcare data standards, ensuring secure data handling and integration.
- Strong background in data cleansing, data wrangling, and transforming complex datasets for advanced business analytics.
- Adept at data visualization to create interactive dashboards that simplify data interpretation and empower stakeholders with actionable insights.
- Experience working in Agile environments, collaborating across teams to align data strategies with business objectives.

SKILLS

- **Programming Languages:** Python, SQL, R
- **Databases & Data Warehouses:** PostgreSQL, SQL Server, MySQL, Snowflake, Teradata, BigQuery
- **Data Visualization:** Power BI, Tableau, Advanced Excel
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Plotly, Seaborn, Streamlit, FastAPI, NLTK
- **Data Engineering:** Alteryx, Talend, Informatica, Apache Airflow, dbt
- **Cloud Platforms:** AWS (Redshift, DynamoDB, S3, Athena, Lambda)
- **Methodologies:** SDLC, Agile (Scrum), Waterfall
- **Version Control:** Git, GitHub
- **Machine Learning Techniques:** Regression, KNN, Decision Tree, Naive Bayes, Random Forest
- **Healthcare Technologies:** HIPAA, EMR, EHR
- **Analytical Skills:** Data Mining, Data Cleansing, Statistical Analysis, Data Wrangling, Time Series Analysis, A/B Testing, Text Mining, ETL, Data Warehousing, SAP, SAS

PROFESSIONAL EXPERIENCE

CVS Health

July 2024 – Present

Data Analyst

- Spearheaded the integration of healthcare claims data from multiple systems into a centralized Snowflake data warehouse, ensuring seamless data flow and consistency across platforms.
- Leveraged AWS tools like Redshift and S3 for efficient data storage and quick retrieval, improving processing efficiency by 30%.
- Utilized SQL and Python to automate the extraction, transformation, and loading (ETL) of large-scale claims data, streamlining workflows and reducing manual intervention.
- Designed and implemented interactive dashboards in Tableau, providing real-time insights into claims trends and enhancing decision-making processes.
- Performed extensive data cleansing and data mining to identify and resolve inconsistencies, reducing claims data errors by 15%.
- Ensured full compliance with HIPAA standards during data integration and handling, enhancing security measures for patient data.

Infosys BPM

Jan 2021 – July 2022

Data Analyst

- Orchestrated the Customer Segmentation and Targeting project by automating data extraction and transformation processes with Informatica and Talend, consolidating data from SQL Server and MySQL into a unified Teradata data warehouse.
- Deployed Decision Tree algorithms to categorize customers based on purchasing behaviour, enabling precise and impactful marketing strategies.
- Engineered intricate SQL queries for in-depth segmentation analysis, providing the marketing team with refined, actionable insights to optimize targeting efforts.
- Crafted dynamic Power BI dashboards, delivering real-time visualizations of customer segments and campaign outcomes, driving informed decision-making.
- Conducted meticulous data wrangling and cleansing to prepare raw datasets for analysis, ensuring data integrity and optimizing segmentation accuracy.
- Partnered with marketing teams to align customer insights with strategic objectives, enhancing targeting precision and campaign effectiveness.
- Piloted A/B testing to evaluate various targeting strategies, refining marketing spend allocation and boosting campaign ROI by 15%.

- Leveraged Pandas and Matplotlib for comprehensive exploratory data analysis (EDA), uncovering valuable customer trends and enabling data-driven business actions.

JPMC

Jan 2020 – Dec 2020

Data Analyst

- Led the Regulatory Compliance Reporting Automation project, streamlining the process of generating regulatory compliance reports through automated ETL workflows and centralized data integration.
- Utilized SQL and Python to design and implement efficient data extraction, transformation, and loading (ETL) pipelines from multiple data sources, ensuring timely and accurate compliance reporting.
- Integrated data from various internal and external sources into AWS Redshift and SQL Server, enhancing the accessibility and reliability of compliance data.
- Automated data cleansing and preprocessing tasks, improving data quality and ensuring all datasets adhered to compliance standards such as SOX and GDPR.
- Collaborated with the compliance team to ensure that the reporting automation adhered to regulatory standards and internal governance policies.
- Developed and deployed dynamic dashboards using Power BI and Tableau, providing real-time insights into compliance metrics for senior stakeholders.
- Conducted regular audits and validation of automated reports to ensure they met regulatory requirements, reducing manual intervention and improving operational efficiency.

PROJECTS

Sales Forecasting Model

- Built a sales forecasting model using Regression techniques in R, analysing historical sales data to predict future trends and optimize inventory management.
- Automated the ETL process by utilizing SQL to extract and transform data from large datasets, ensuring accurate forecasting inputs.
- Designed interactive Power BI dashboards to visualize forecasted sales and trends, empowering stakeholders to make informed, data-driven decisions.

Customer Churn Analysis

- Applied Decision Tree and KNN machine learning models to customer behaviour data to predict customer churn, enabling the development of targeted retention strategies.
- Conducted data cleansing and data wrangling using Pandas and Matplotlib to ensure high-quality data for accurate churn predictions.
- Developed dynamic Tableau visualizations to present customer churn insights, helping customer service teams identify at-risk customers and take proactive actions.

EDUCATION

Master of Science in Engineering Management

Aug 2022 - May 2024

California State University, Northridge, CA

Bachelor of Technology in Computer Science and Engineering

Jul 2016 - Aug 2020

Visvesvaraya Technological University, India

CERTIFICATIONS

- Certified Cloud Practitioner: Azure
- AWS Certified Solutions Architect Associate
- Google Data Analytics Professional Certificate from Coursera
- Google Project Management from Coursera
