

Srunith Kumar
Full Stack Developer
Email : srunithk.cs@gmail.com
Contact: 6693658345

PROFESSIONAL SUMMARY:

- Over **6 years of hands-on experience** as a Full Stack Developer in **Finance, Insurance, and Healthcare** domains, delivering enterprise-grade solutions with strong backend and frontend architecture.
- Proven expertise in building **Java-based microservices** using **Spring Boot, Spring MVC, and Spring Security**, applying **MVC, Singleton, and Factory** design patterns to ensure modularity and reusability.
- Strong frontend development experience with **Angular** and **React.js**, developing scalable, single-page applications with reactive data handling using **RxJS** and stateful routing.
- Proficient in integrating **Apache Kafka** as a core messaging layer in distributed systems for event-driven workflows, enhancing system decoupling and fault tolerance.
- Developed secure APIs with **OAuth2, JWT, and SiteMinder** integration, ensuring compliant access control and robust identity management for critical applications.
- Experience in **containerization** using **Docker**, orchestrated deployments on **AWS EKS** and **Azure AKS**, and managed infrastructure provisioning with **Helm, kubectl, and CloudFormation**.
- Implemented robust **CI/CD pipelines** using **Jenkins**, integrated with **Git, Bitbucket**, and scripted using **Maven** and **Gradle** to automate deployment lifecycles and improve release velocity.
- Hands-on experience with **AWS cloud services**, including **EC2, S3, CloudFront, CloudWatch, RDS, and Elastic Beanstalk**, optimizing performance and cost efficiency across applications.
- Designed and optimized relational databases using **Oracle, Snowflake, and PostgreSQL**, writing complex **PL/SQL** procedures and optimizing queries for scalable data access.
- Skilled in implementing **asynchronous messaging** using **RabbitMQ** and **Kafka**, supporting real-time data pipelines and decoupled microservice interactions.
- Monitored application health using **Prometheus, Grafana, Splunk, and Datadog**, setting up alerts, dashboards, and log-based insights to support proactive incident management.
- Strong understanding of **Object-Oriented Design (OOD), OOP principles**, and clean code practices, applied consistently across backend and frontend codebases.
- Experienced in **unit and integration testing** using **JUnit, Mockito, Jasmine, and Chai**, improving test coverage and reducing production bugs across multiple client projects.
- Adept at collaborating in **Agile/Scrum** environments, managing sprints via **JIRA**, leading peer code reviews, and maintaining documentation in **Confluence** and **Google Workspace**.
- Versatile in using **HTML5, CSS3, Bootstrap, Material UI, jQuery, and Ajax** to craft interactive, accessible, and responsive user interfaces.

TECHNICAL SKILLS

Languages	Java 8/11, Python, C, C++, PL/SQL
Web Technologies	HTML5, CSS3, Bootstrap, JavaScript, JQuery
Relational Databases	Oracle 8i/9i/10g/11g, SQL server , MySQL 5.7, DB2 11.1. Web Services REST
Frameworks	Spring, Spring Boot, Hibernate, Spring MVC, React JS, Angular
AWS	EC2, Simply Storage Service, Cloud Front, Cloud Watch,
Operating systems	Windows 2000\98\XP\7\vista\8\Unix\Linux - Ubuntu\MacOS
Methodologies	Agile, waterfall, Scrum, SDLC.
Developer IDE Platforms	Eclipse, Notepad ++, IntelliJ, VS Code
Build Tools	Maven, Gradle, NPM
Tools	Git/Bitbucket, Jira, Docker, Jenkins, Splunk, Prometheus, Grafana, Service Now, Data dog, Apache Kafka
Architecture	Microservices, Monolithic
Cloud	AWS, GCP, Azure

PROFESSIONAL EXPERIENCE

SCAN Health Plan, USA

Jan 2024 - Current

Role: Java Full Stack Developer

- Designed and implemented **Spring Boot-based microservices**, utilizing **RESTful APIs**, **Spring MVC**, and **dependency injection** to build modular, testable backend systems supporting healthcare operations.
- Developed frontend interfaces using **React.js** and **JavaScript**, integrating reusable UI components with backend services for seamless patient and provider interactions.
- Utilized **JPA** and **Hibernate** for efficient ORM-based data access, optimizing fetch strategies and caching mechanisms to minimize database load on **PostgreSQL**.
- Implemented **secure authentication** using **OAuth2** and **JWT**, enforcing access control and session management across distributed services.
- Integrated **RabbitMQ** to enable asynchronous communication between services, enhancing system responsiveness and fault tolerance under high-load conditions.
- Applied **JUnit** and **Mockito** for unit and integration testing, ensuring coverage for service layers and reducing post-release defects.
- Built and maintained **CI/CD pipelines** using **Jenkins**, automating build, test, and deployment stages; used **Git** for version control and **JIRA** for sprint task tracking.
- Deployed applications to **AWS EC2** and stored static assets in **S3**, integrating **CloudFront** for content delivery to enhance performance and reduce latency across regions.

Total Bank Solutions, USA

Mar 2022 - Dec 2023

Role: Full Stack Developer

- Engineered scalable, distributed microservices using **Spring Boot**, enabling real-time policy management and claim processing for insurance domain use cases.
- Designed and consumed **RESTful APIs** for modular service communication, integrating layers with **Spring Data JPA** and **Hibernate** to handle complex entity relationships and database transactions.
- Incorporated **Apache Kafka** for asynchronous, event-driven architecture—defined key Kafka topics for handling policy updates, claims lifecycle, and customer onboarding.
- Integrated **AWS services** such as **EC2**, **S3**, and **CloudWatch**, and deployed containerized applications on **Elastic Kubernetes Service (EKS)** using **Helm charts** and **kubectl** for efficient service orchestration.
- Enhanced application observability by setting up **Prometheus**, **Grafana**, and **Datadog** to monitor Kafka throughput, container health, CPU utilization, and memory bottlenecks.
- Implemented robust **authentication and authorization workflows** using **Spring Security** with **JWT** and **OAuth2**, integrated with corporate identity systems like **SiteMinder** for SSO.
- Managed and optimized relational data storage using **Oracle 11g** and **Snowflake**, writing and tuning queries, stored procedures, and views for fast data access.
- Developed user-facing features using **React.js** and **TypeScript**, leveraging component-based architecture and **RxJS** for reactive data flow and state management.
- Created and managed **Docker** images for Spring Boot services, automating container lifecycle with custom startup scripts and pushed builds to **AWS ECR**.
- Streamlined build and deployment workflows by scripting CI/CD pipelines with **Maven**, **Jenkins**, and **Bitbucket**, automating integration, testing, and rollbacks.
- Conducted performance profiling and memory analysis using **JConsole** and **JVisualVM**, proactively identifying bottlenecks and ensuring SLA adherence.
- Created custom **Splunk dashboards** for real-time application logging, enabling faster production issue diagnosis and compliance monitoring.
- Collaborated in **Scrum** ceremonies including sprint planning, retrospectives, and backlog grooming; tracked tasks using **JIRA** and maintained documentation in Confluence.
- Mentored junior developers by conducting code reviews, pair programming, and walkthroughs, enforcing clean code practices and onboarding support.

Dell Technologies, India

Jan 2020 - Nov 2021

Role: Full Stack Developer

- Developed scalable and secure **RESTful APIs** using **Java**, **Spring Boot**, and **Spring MVC**, enabling seamless data exchange between microservices and frontend clients in financial applications.
- Designed and maintained backend systems with **Spring Data JPA**, **Hibernate**, and **Oracle PL/SQL**, optimizing query performance and ensuring data integrity through stored procedures and transactional management.
- Integrated **Spring Security** with **JWT** and **OAuth2** for secure user authentication and fine-grained authorization, safeguarding sensitive data and preventing common vulnerabilities like CSRF and XSS.
- Engineered dynamic and modular frontend components using **Angular (v2+)**, applying **RxJS** for reactive state handling and **RouterModule** for SPA navigation.

- Developed interactive UIs with **HTML5**, **CSS3**, and **Bootstrap**, ensuring cross-browser compatibility and responsiveness across all devices, adhering to WCAG accessibility standards.
- Consumed backend **JSON/XML** APIs on the frontend using **Angular HTTPClient** with efficient data parsing, error handling, and lifecycle management to maintain a smooth user experience.
- Applied **design patterns** such as **DAO**, **Builder**, and **Singleton** to promote clean architecture, modularity, and scalability in backend systems.
- Implemented asynchronous communication using **AJAX** and **Promises**, enhancing frontend responsiveness and reducing user wait times during high-load conditions.
- Managed builds and deployments using **Jenkins CI/CD pipelines** and automated Docker image generation, ensuring zero-downtime deployments and faster release cycles.
- Monitored system health and performance using **Prometheus** and **Grafana**, setting up custom alerts for service latency, error rates, and memory leaks to maintain SLAs.
- Used **GitHub** for version control and **JIRA** for sprint planning, working in an **Agile** team to deliver enterprise-grade features with weekly standups and retrospectives.
- Collaborated closely with cross-functional teams to deploy apps on **CloudFront CDN**, improving global static content delivery and achieving lower latency for geographically distributed users.

Beyond Key Solutions, India

Jan 2019 - Dec 2019

Role: Frontend Developer

- Developed responsive and cross-browser-compatible UI components using **HTML5**, **CSS3**, and **JavaScript (ES6+)**, ensuring consistent functionality across Chrome, Firefox, and Edge.
- Built and maintained single-page applications (SPAs) using **Angular**, leveraging **component-based architecture**, **router navigation**, and **form modules** to streamline development and enhance scalability.
- Applied **CSS Flexbox**, **Grid**, and **media queries** to implement responsive layouts that adapted seamlessly across mobile, tablet, and desktop resolutions.
- Utilized **RxJS** for managing asynchronous data streams and improving application reactivity in real-time user interactions.
- Integrated **RESTful APIs** into the UI layer, performing data binding and dynamic content rendering through Angular services and HTTP client modules.
- Used **SCSS** to modularize and maintain complex stylesheets, adhering to BEM conventions for consistent and scalable styling practices.
- Implemented client-side validation, custom directives, and reactive forms to improve user experience and enforce data integrity in user inputs.
- Collaborated in Agile sprints using tools like **JIRA** and **Git**, participating in daily stand-ups, UI design discussions, and peer reviews to ensure feature alignment and timely delivery.

EDUCATION:

- Bachelor of Engineering in Information Technology from JNTUH
