

PROFESSIONAL SUMMARY:

- Highly experienced Data Analyst with 8 years of expertise in cleaning, validating, and processing complex healthcare datasets to generate actionable insights for improved patient outcomes.
- Proficient in developing and maintaining robust reports, interactive dashboards, and compelling visualizations using industry-leading tools like Tableau and Power BI.
- Expertise in writing and optimizing SQL queries to extract and manipulate data from relational databases, ensuring data integrity and supporting complex analytical requirements.
- Demonstrated ability to perform advanced statistical analysis to identify significant trends, critical patterns, and anomalies within diverse healthcare datasets.
- Strong foundation in healthcare data standards, including HL7, ICD-10, and CPT codes, with a deep understanding of HIPAA regulations and data security protocols.
- Proven track record of collaborating effectively with cross-functional teams to understand project requirements and deliver high-quality, data-driven analytical solutions.
- Skilled in automating data preparation and analysis workflows using Python, enhancing efficiency and accuracy in healthcare reporting processes.
- Committed to maintaining strict confidentiality and adhering to all data security protocols, ensuring the protection of sensitive patient information at all times.
- Experienced in leveraging data analysis to contribute directly to meaningful projects that enhance operational efficiency and strategic decision-making in the healthcare sector.
- A results-oriented professional dedicated to transforming complex data into clear, concise, and impactful insights for providers, payers, and healthcare organizations.

TECHNICAL SKILLS:

- **Programming Languages:** Python, SQL, SAS, STATA
- **Data Visualization:** Tableau, Power BI, Looker, Excel
- **Cloud Platforms:** AWS (S3, Kinesis), Azure, GCP (BigQuery, Composer, Dataflow)
- **Database Management:** Snowflake, SQL Server, Oracle, Teradata, Redshift, BigQuery, Synapse
- **Data Processing & ETL:** Alteryx, Informatica, SSIS, Azure Data Factory (ADF), Airflow, Databricks, PySpark
- **Healthcare Data Standards & Compliance:** HIPAA, PHI/PII, HL7/FHIR, ICD-10, CPT codes
- **Data Modeling & Governance:** Star/Snowflake schema, Fact/Dimension, STM documentation, Data lineage, Metadata management, Data quality & masking
- **Analytics & Machine Learning:** Forecasting models, Predictive risk modeling, ML feature stores, Audience segmentation, Basic Statistical Concepts
- **Collaboration & Methodologies:** Git, Agile/Scrum

WORK EXPERIENCE:

Data Analyst/Visualization Developer @ Fisher Investments — United States **Aug 2024 – Present**

- Cleaned, validated, and processed complex healthcare datasets including claims, clinical, and EMR data to ensure optimal accuracy and integrity for analysis.
- Developed and maintained critical reports, interactive dashboards, and detailed visualizations using Power BI and Tableau, supporting client-specific healthcare analytics initiatives.
- Wrote and executed advanced SQL queries to extract, transform, and manipulate data from various relational databases, facilitating in-depth healthcare data analysis.
- Performed comprehensive basic statistical analysis to identify significant trends, crucial patterns, and relevant anomalies within diverse healthcare information.
- Collaborated closely with senior analysts and client stakeholders to meticulously understand project requirements and effectively deliver on complex analytical tasks.
- Ensured strict confidentiality and adherence to all HIPAA regulations and stringent data security protocols across all data processing and reporting activities.
- Assisted in developing data pipelines and automation scripts using Python to streamline data cleaning and preparation for ongoing healthcare projects.
- Contributed to the design and implementation of data models for claims and patient outcome reporting, enhancing the reliability and scalability of analytical solutions.

- Utilized foundational knowledge of healthcare data standards like HL7 and ICD-10 to accurately interpret and integrate disparate data sources.
- Presented data-driven insights and findings to internal teams and clients, translating complex analyses into actionable recommendations for improved patient care.
- Participated actively in agile scrum ceremonies, contributing to continuous improvement and iterative development of healthcare analytics solutions.
- Conducted thorough data quality checks and implemented validation rules to uphold the highest standards of data integrity for all delivered insights.

Data Analyst @ Kaiser Permanente — United States

Jul 2023 – Aug 2024

- Partnered with clinical, financial, and operational stakeholders to design key healthcare KPIs and deliver self-service Tableau dashboards for patient outcomes and provider performance.
- Built SQL-based data marts in Snowflake and Synapse using dimensional modeling, enabling patient-level analytics and population health studies.
- Tuned complex SQL queries and stored procedures to optimize reporting latency and enhance dashboard performance for executives and clinical users.
- Automated HIPAA/PHI compliance workflows with Alteryx and Python, applying data masking and validation checks to ensure secure reporting and data integrity.
- Developed forecasting models (SAS, STATA, Python) for patient admissions and resource utilization, embedding predictive results into Tableau dashboards for hospital planning.
- Created comprehensive metadata, lineage, and audit-ready documentation to support healthcare compliance and regulatory audits effectively.
- Collaborated with IT teams to implement data quality monitoring across EHR pipelines and integrated IoT/medical device feeds for near real-time patient vitals reporting.
- Delivered end-to-end reporting workflows combining SQL, Tableau, and Alteryx, ensuring accuracy, scalability, and adoption across clinical and administrative teams.
- Processed and validated large volumes of claims data, identifying inconsistencies and ensuring accurate financial and operational reporting.
- Assisted in the analysis of EMR data to identify patterns in patient care pathways, contributing to initiatives for improving patient outcomes.
- Utilized understanding of CPT codes and ICD-10 for accurate categorization and analysis of medical procedures and diagnoses.
- Facilitated data-driven discussions with healthcare professionals to identify critical areas for operational efficiency improvements and cost reduction.

Data Analyst / BI Developer @ Zee Entertainment Enterprises — India

Jul 2019 – Dec 2022

- Designed and developed interactive Tableau dashboards to measure ad lift, CPM, CTR, ROI, and campaign reach, enabling advertisers to optimize performance.
- Partnered with marketing teams to define audience engagement, churn, and campaign KPIs, translating them into scalable BI datasets and reporting solutions.
- Built SQL-based datasets in Snowflake to feed dashboards, significantly reducing campaign reporting latency and improving refresh speeds.
- Automated ad inventory forecasting workflows using Alteryx and Python, integrating predictive outputs into Tableau dashboards for strategic ad sales planning.
- Modeled silver and gold datasets in Databricks to support sophisticated audience segmentation and personalization use cases for targeted advertising.
- Developed event-driven pipelines with Databricks, PySpark, and AWS Kinesis to deliver near real-time analytics on OTT viewership and campaign performance metrics.
- Implemented robust data governance practices including lineage, STM documentation, and validation checks to ensure reliable and compliant BI reporting.
- Supported the migration from traditional batch-based reporting to cloud-driven, event-based analytics, enabling faster insights and near real-time campaign optimization.
- Conducted extensive data cleaning and validation on ad impression and clickstream data, ensuring high data quality for campaign analysis.
- Utilized advanced SQL queries to analyze large media consumption datasets, identifying user behavior patterns and content preferences.

- Collaborated with product teams to integrate analytics into new digital platforms, providing insights into feature adoption and user engagement.
- Created detailed performance reports for media campaigns, highlighting key successes and areas for improvement to stakeholders.

Data Analyst @ Shoppers Stop — India

Feb 2017 – Jul 2019

- Conducted SQL-based analysis on POS, CRM, and loyalty program data to identify buying patterns, segment customers, and support targeted promotions effectively.
- Built Tableau dashboards to track store sales, product performance, and campaign ROI, enabling managers to act on real-time insights swiftly.
- Designed comprehensive customer 360° datasets using SQL and integrated them into Tableau dashboards for accurate campaign attribution and effectiveness tracking.
- Automated recurring sales and inventory reports using efficient SQL scripts, feeding Tableau dashboards with fresh data and significantly reducing manual effort.
- Partnered with marketing teams to embed loyalty segmentation and retention KPIs directly into Tableau reports for executive decision-making and strategic planning.
- Supported sales forecasting by analyzing historical transaction data, presenting clear trends and accurate predictions through Tableau visualizations.
- Performed extensive data cleaning and validation on retail transaction data to ensure accuracy for sales and inventory reporting.
- Developed custom SQL queries to extract customer demographic and behavioral data, supporting personalized marketing initiatives.
- Analyzed promotional campaign effectiveness, providing data-driven recommendations for future marketing strategies.
- Collaborated with retail operations to optimize inventory levels based on sales forecasts and historical demand patterns.
- Created detailed reports on product category performance, identifying top-selling items and underperforming segments for management review.
- Presented analytical findings to business stakeholders, translating complex data into actionable insights for retail strategy.

EDUCATION:

Master's in Business Analyst @ University of North Texas
