Professional Summary

Data Analyst with over **7+ years** of experience in financial services and banking domains, specializing in data visualization, reporting, and analytics for business decision-making. Skilled in **SQL, Python, Tableau, Power BI**, and **advanced Excel**, with extensive experience building **data pipelines, dashboards**, and performance metrics. Proven ability to collaborate with cross-functional teams to deliver actionable insights, optimize processes, and support large-scale data projects.

Technical Skills

- **Databases & Querying:** SQL (SQL Server, Oracle, MySQL, PostgreSQL), T-SQL, PL/SQL, Hive
- **Data Analysis & Scripting:** Python (Pandas, NumPy, Scikit-learn, PySpark), R, Excel (Advanced), VBA
- **Data Visualization & Reporting:** Power BI (Row-Level Security, Semantic Modeling), Tableau, Looker, Excel Dashboards, SSRS
- **ETL & Data Integration:** SSIS, Talend, Informatica, ETL Pipelines (Python, SQL), Azure Data Factory, Kafka,
- **Big Data & Cloud Platforms:** AWS (S3, Redshift, Athena, Glue, EC2), Snowflake, BigQuery, Databricks, Azure Synapse
- **Statistical & Predictive Modeling:** Regression, Classification, Time-Series Forecasting, A/B Testing, Trend Analysis
- **Data Governance & Quality:** Data Cleansing, Validation, KPI Dictionary, Master Data Management, Compliance Reporting
- **Version Control & Collaboration:** Git, GitHub, GitLab, Jira, Confluence, Agile/Scrum.

Professional Experience

Discover — Data Analyst | Chicago, IL

Feb 2024 – Present

Project: Customer Insights & Risk Analytics Platform

- Designed and managed data pipelines with **AWS Glue, PySpark, and Kafka**, automating refreshes for 20M+ rows monthly.
- Built **Power BI** dashboards with RLS and semantic models, ensuring secure role-based access to KPIs across Finance and Risk.
- Developed **SQL/Snowflake** data marts using a star schema to speed up self-service reporting for analysts.
- Developed churn and default propensity models (**Python, scikit-learn**) to prioritize outreach segments.
- Integrated **Redshift** for historical behavior modeling and linked outputs directly into dashboards.
- Implemented **Azure Data Factory** pipelines for batch-to-stream transformations supporting marketing campaigns.
- Ran **A/B** testing frameworks (lift, CI, power checks) for credit line increases and retention strategies.
- Automated regulatory reporting **QC** with row-level diffs and anomaly alerts in Databricks.

- Optimized **SQL** joins/window functions, cutting portfolio reporting runtime from hours to under 10 minutes.
- Built forecasting models (time-series & regression) for delinquency trends using **Python + Snowflake**.
- Partnered with engineering to productionize **ETL** in **Airflow** with **Glue & PySpark**; set up version-controlled pipelines.
- Designed a **KPI** dictionary with definitions, refresh cadence, and governance for Finance, Risk, and Marketing.
- Conducted ad-hoc investigations on line increase safety, quantifying risk exposure in policy changes.
- Built chargeback and dispute dashboards in **Tableau** with drill-down capability by merchant/MCC.
- Trained junior analysts on SQL optimization, **DAX**, and BI best practices, improving team throughput.
- Presented monthly portfolio insights to directors, translating model outputs into business-friendly recommendations.

Key Achievements

- Boosted early default prediction accuracy by **+15% AUC**, improving loss-mitigation targeting.
- Automated pipelines saved over **20+** analyst hours/month and cut data defects by **35%**.

HDFC Bank — Data Analyst

Sep 2016 – July 2022 | India

Project: Retail Banking Performance Intelligence

- Migrated reporting pipelines from on-premises to **AWS (S3, RedShift, EC2)** with zero downtime.
- Built branch-level scorecards (**Power BI/Tableau**) for deposits, loans, and NPS, enabling granular RM-level tracking.
- Authored **SQL/Hive** procedures to unify daily MIS across core banking, card, and digital channels.
- Created **data pipelines** using **Azure Data Factory and Informatica** for retail banking performance dashboards.
- Developed predictive models for customer lifecycle (**onboarding → engagement → cross-sell**) to size upsell pools.
- Measured digital adoption trends (ATM, POS, mobile banking) with **Snowflake + BigQuery** analytics.
- Produced regulatory packs with audit-ready lineage, enabling compliance with **RBI** requirements.
- Built arrears and roll-rate matrices for collections, improving delinquency forecasting.
- Automated **Excel** reports with **macros/pivots**, eliminating hours of manual reporting per week.
- Delivered trend analysis reports for product performance and cross-sell ROI measurement.
- Collaborated with stakeholders to define pricing elasticity models using SQL and R.
- Created a semantic data model to standardize **KPIs** across loans, deposits, and card businesses.
- Partnered with business/product teams to implement **A/B** testing for campaign offers.
- Built dashboards in **Tableau** with drill-throughs for customer journey and regional segmentation.
- Documented data governance policies to avoid conflicting metric definitions across multiple teams.

Key Achievements

- Reduced MIS turnaround from **T+2** days to same-day **T+0**, accelerating executive decisions.
- Improved cross-sell conversion by **+8%** by optimizing campaign eligibility and timing.

EDUCATION

Master's Degree: Business Analytics, University of New Haven

August 2022-Dec 2023

Bachelor's Degree: Electrical & Electronics Eng., JNTUH, Hyderabad

July 2012-May 2016

CERTIFICATIONS

Power BI Data Analyst Associate - Microsoft

Certified Analytics Professional (CAP) - INFORMS

Tableau Certified Data Analyst - Tableau

AWS Certified Data Analytics – Specialty - Amazon Web Services

SAS Certified Advanced Analytics Professional Using SAS 9 - SAS Institute
