EDUCATION

Florida Institute of Technology, FL | Masters in Computer Science

Aug 2023 - May 2025

G Narayanamma Institute of Technology and Science, Hyderabad, India | Bachelors in Information Technology

2018-2022

TECHNICAL SKILLS

Languages & Frameworks: Python, PHP, JavaScript, Node.js, Vue.js, Nuxt.js, Bash, C, C++, Java, Express.js, Flask, Django

Web Technologies: HTML, CSS, REST APIs, React, Angular

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB

Cloud Platforms: Azure (Synapse, Databricks, CosmosDB), AWS (EC2, S3, Lambda, RDS, Redshift), GCP (Basic exposure)

DevOps & CI/CD: Git, GitHub, Azure DevOps, Terraform, Docker, Kubernetes, Jenkins

Tools & Libraries: Power BI, Tableau, Apache Spark, Jupyter, VS Code, IntelliJ, Informatica, SSIS, Airflow

Operating Systems: Linux, Windows

WORK EXPERIENCE

Telstra

Hyderabad, India

Software Engineer

July 2021 - Aug 2023

- Engineered high-performance ETL pipelines using Databricks (Apache Spark), processing terabytes of data daily and **slashing daily**, reducing data processing time by **40%** and enabling faster decision-making for business intelligence..
- Optimized PostgreSQL data models and warehouse architecture to improve query performance by **30%**, ensuring real-time analytics for customer insights and operational efficiency.
- Designed and managed 5+ Cosmos DB instances, integrating them with **Databricks** and **HDFS**, ensuring **99.9%** data availability for critical business applications..
- Integrated **Terraform** and Implemented **CI/CD pipelines** using **Git** and **Azure DevOps**, reducing deployment failures by **60%** and automating release cycles, which improved software delivery speed and reliability.
- Developed and maintained scalable **web and data applications** using **Python, Node.js, and Flask**.
- Orchestrated end-to-end data pipelines using **Apache Airflow**, automating complex **ETL workflows** and improving data pipeline reliability and observability.
- Maintained and monitored data pipelines, proactively resolving issues and ensuring **99.9% system uptime**, leading to uninterrupted data availability for analytics teams.
- Developed and managed scalable data pipelines using **Azure Synapse Analytics** and **Databricks**, with foundational knowledge transferable to Microsoft Fabric ecosystems.
- Deployed applications and services using Docker and managed environments with Azure and AWS.
- Migrated high-volume datasets from **Oracle** to **Snowflake** and **Redshift**, optimizing data types and **partitioning for query performance**.
- Built robust ETL pipelines in **Azure Synapse Analytics**, transforming and modeling large datasets for business intelligence, reducing query execution time by **35%**, and accelerating financial and operational reporting.
- Developed Informatica PowerCenter ETL workflows, extracting data from 5+ disparate sources, transforming datasets with **99.5% accuracy**, and ensuring high-quality data integration for business intelligence platforms.
- Integrated on-premise enterprise systems (ERP-like) with **Azure Cloud** using **Informatica Cloud Data Integration**, reducing data latency by 45% and enabling seamless cross-platform data flow.
- Optimized stored procedures and queries in **SQL Server** to enhance performance and reliability.
- Created dynamic dashboards and visual reports using **Power BI** and **Tableau** to deliver real-time, actionable insights on business KPIs, enabling data-driven decision-making across operational and financial teams.
- Partnered with cross-functional teams, including finance, operations, and IT, to deliver actionable insights and improve organizational reporting. Presented complex data findings to non-technical stakeholders through clear visual storytelling and executive-level reports.

Telstra

Hyderabad, India

Business Trainee at Telstra

Jan 2021 - July 2021

- Developed complex **SQL queries** and **Python** scripts for **data transformation**, improving query execution times by 25%, enabling faster data retrieval for **business reporting**.
- Implemented **Spark-based** data processing pipelines, increasing large-scale data processing efficiency by **30%**, which enhanced analytics capabilities for the **data science team**.
- Assisted in cleaning and transforming datasets using **SQL** and **Python**, improving data quality for reporting and analysis purposes.
- Built interactive reports and dashboards using **Power BI** to monitor **operational KPIs** and fundraising metrics.
- Conducted **exploratory data analysis (EDA)** to discover actionable insights and presented results to program leads and managers.

ACADEMIC PROJECTS

Formal Verification of Kubernetes Autoscaling using UPPAAL

May 2025

- Modeled **Kubernetes autoscaling** in UPPAAL using timed automata.
- Verified **safety, liveness**, and **CPU/resource** constraints.
- Ensured reliable cloud behavior through **formal model checking**.

Advanced Anomaly Detection - AWS Platform

April 2024

- Developed a scalable **data pipeline** using Python and AWS services to detect anomalies in **cybersecurity data**.
- Deployed application in a **containerized environment** using **Docker** and **AWS Lambda**.

Zero-Shot Learning with CNN

Sep 2023

- Built a CNN using few-shot learning to classify digit '9' with only 5 labeled samples.
- Developed the model in TensorFlow/Keras with OpenCV preprocessing.
- Improved accuracy by analyzing misclassifications with similar digits like '4' and '7'.

CERTIFICATIONS

- AWS Academy Graduate - Data Engineering** | AWS Academy
- AWS CLOUD PRACTITIONER**
- AZ-104 Azure Administrator Certification**

Dec 2024

July 2024

Sep 2022
