EDUCATION

University of Massachusetts Amherst

Amherst, MA

Isenberg School of Management

Master of Science in Business Analytics

August 2024 -Present

- Data Analytics Track
- *Relevant coursework:* Data Science, Data Management, Business Intelligence, Statistics, Project Management, Product Marketing, Cybersecurity Risk Management, Data Modeling, Supply Chain Analytics, Marketing Strategy

Sri Ramachandra Institute of Higher Education and Research

Chennai, India

Bachelor of Technology in Computer Science Engineering

August 2019 – July 2023

- Specialization in Artificial Intelligence and Machine Learning
- *Relevant coursework:* Advance Python; Data Visualization; Data Mining; Data Science; Machine Learning; Data Wrangling; R
- International Level Hackathon – Hack@SRET Runner

EMPLOYMENT

Data Patterns

Chennai, India

Graduate Engineer Trainee – Software Development

May 2023 – June 2024

- Led the development and testing of Smart Multifunctional Display (SMFD) applications for Hindustan Aeronautics Limited (HAL), actively participating in the full System Development Life Cycle (SDLC), including business requirement analysis, data extraction, and system validation
- Collaborated with cross-functional teams, including hardware engineers and product managers, to design and implement UI/UX enhancements
- Conducted thorough debugging, provided technical support and created detailed documentation throughout the product development lifecycle, contributing to meeting key project milestones within stringent deadlines

Munchin

Remote

Backend Developer

February 2021 – April 2021

- Executed advanced web scraping algorithms using Python to gather real-time location-based data from over 10,000 sources, optimizing data collection efficiency by 47%, for the Ecommerce website and application
- Collaborated with the front-end development team to execute seamless integration of backend services, reducing application response time significantly

PROJECT EXPERIENCE

Personal Amazon Order History Analytics

- Analyzed historical purchase data to identify user spending habits, frequency, and category-wise preferences.
- Built an interactive Tableau dashboard to visualize spending trends, category preferences, and purchase frequency.
- Provided predictive insights to help users make informed financial decisions, optimizing purchasing behavior

Indian Language Identification System

- Developed a Natural Language Processing (NLP) model to identify Indian languages with 91.5% accuracy, using Scikit-learn and Pickle for model deployment
- Analyzed a dataset of over 10,000 text samples, applying text mining techniques such as tokenization and stemming
- Deployed the model into a real-time prediction system, allowing users to detect language, enhancing user experience

Heart Disease Analysis

- Applied machine learning techniques to process over 2,000 patient records, applied logistic regression and decision trees
- Used data visualization tools to explore patient health data, identify trends, and communicate risk factors effectively
- The final model achieved 83% accuracy and highlighted key indicators such as cholesterol and age, aiding in risk stratification.

EMINO – AI-Based Emotion Recognition Interface

- Developed an AI-powered emotion recognition system that analyzes the emotional states of individuals and groups.
- Implemented a deep learning model using CNNs and NLP techniques to detect facial expressions and textual sentiment.
- Designed an interactive web-based dashboard providing real-time insights into emotional trends, aiding mental health professionals and organizations.

SKILLS & CERTIFICATIONS

Language & Databases: Python, R, SQL (ETL, data pipeline), C, C++, DBMS, Access, HTML, CSS, JS

Visualization Tools: Tableau, Power BI, Excel and Microsoft Office Suite

Other: Agile, Git, Forecasting Analytics, Statistical Modeling, Snowflake, Performance Optimization, Automation, Testing

Certifications: AWS Academy Machine Learning foundation, Google Data Analytics, DataCamp Data Analyst Associate
