Boston, MA

TECHNICAL SKILLS

- Languages: HTML5, Javascript, CSS3, TypeScript
- Frameworks: NodeJS, ExpressJS, MERN
- Libraries: ReactJS, jQuery
- Databases: MongoDB, PostgreSQL, MySQL
- Authorization: PassportJS, bcrypt
- Testing: Mocha, Chai, Enzyme, Cypress
- CICD: GIT, Heroku, CircleCI
- AWS Services (EC2, S3, RDS, Lambda, etc.)
- Serverless and Microservices Architecture
- RESTful API Development
- Containerization (Docker, Kubernetes)
- Agile and Scrum Methodologies

CERTIFICATIONS

- Salesforce Certified Platform Developer 1, **December 2022**
- Salesforce Certified Platform App Builder, **December 2022**
- nCino Certified 301 Commercial Banking, **December 2022**
- CIW Certified User Interface Designer, **October 2018**
- CIW Certified Advanced HTML5 & CSS3 Specialist, **August 2018**
- CompTIA Project+, **March 2018**
- Microsoft Technology Associate, **September 2017**

WORK EXPERIENCE

Software Engineer I, Revolent Group, Buffalo, NY

NOV 2022 – MAY 2024

- Developed in Apex, nCino, Visualforce, JavaScript, HTML5, and CSS3 (LWC) code to specifications while advocating for no-code solutions when possible in a Salesforce Sales Cloud and Financial Services Cloud environment.
- Optimized SOQL/SOSL queries for Salesforce governor limits, and migrated processes to asynchronous.
- Experienced with using Salesforce and nCino declarative features such as Validation Rules, Page Layouts, Field Creation, Metadata, Approval Processes, Flows, migration of Process Builder to Flows, assigning Field Level Security using profiles and permission sets.
- Worked with Data Loader to update missing data to prevent data inconsistencies and code failures.
- Focused on code quality through peer review, testing, and debugging. Tested and debugged with a consistent eye on coverage and quality.
- Experienced with using VS Code to promote code changes and GitLab for version control in a complex pipeline shared by eight development teams.
- Communicated daily with stakeholders and product owners to fully understand pain points and needs. Conducted sprint demos to stakeholders.

Software Engineer I, Olive AI, Remote

DEC 2021 – SEP 2022

- Collaborated with the product owners, project managers, and other team members to plan, prioritize, and execute on sprint initiatives.
- Automated supply chain purchase order dispatching and confirmations, reducing manual processing time by 80% and saving the client 150 hours per month.
- Worked with OpenCV, OCR, Javascript, ReactJS, Selenium, Native Windows APIs & RESTful API using Serverless and Microservices Architecture.

Technical Teaching Assistant, Stack Education, Remote

JUN 2021 – JAN 2022

- Lead agile methodology meetings with small groups, working with 20+ students weekly for 15+ hours on algorithms, course work, projects, and capstones.
- Demonstrated expertise in HTML5, JavaScript, ReactJS, CSS3, Pug, NodeJS, ExpressJS, RESTful APIs, and SQL while teaching.

Software Engineer, Wiser Solutions, Inc., Boston, MA

JUN 2019 – SEP 2020

- Co-developed a platform that improved client data visualization and decision-making, reducing data retrieval time by 50% and eliminating third-party plugins using Serverless and Microservices Architecture.
- Revamped a 5+ year old Ruby-on-Rails system with ReactJS, Redux, and GraphQL, cutting page load time by 66% and enhancing documentation.
- Implemented React and React Router to optimize server load and created a robust testing suite with Cypress.io, ensuring 100+ consecutive passing tests.
