Education:

Stony Brook University

Bachelor of Science, Computer Science, GPA: 3.76

Stony Brook, NY

August 2021- December 2024

- **Selected Coursework:** Software Development, Software Engineering, User Interface Development, System Fundamentals, Computer Security Fundamentals, Artificial Intelligence, Data Science, Computer Networks

Projects:

Economic & Political Voting Analysis (React.js, Spring Boot, MongoDB, Python)

- Developed an economic and political district analysis application platform with a team of four, utilizing React, Spring Boot, MongoDB, and Python for processing data.
- Conducted an in-depth analysis of election outcomes, demographic trends, and income distribution using data from district plans, providing valuable insights.
- Executed the MGGG ReCom algorithm to generate randomized ensembles of district plans from 2020 presidential election, demographic, and economic data.

Interactive Q&A Web Application (React.js, Express.js, Node.js, MongoDB)

- Designed and built an interactive user and public questions and answers database full stack web application like Stack Overflow.
- Implemented a commenting, voting, and answer system in the frontend to promote user engagement and to ensure the reliability and credibility of users on the platform.
- Developed a user profile system to secure user data, and to create a unique and seamless user interface experience.

Global Happiness Analysis Report (Python, Pandas, Scikit-Learn, Seaborn/Matplotlib, NumPy)

- Cleaned, merged, and imputed world happiness report data from 5 different datasets to use for data analysis and visualization.
- Implemented and trained 3 different machine learning models (linear regression, random forest regression, gradient boosting) to create a function using data features to predict the happiness score of a country.
- Maintained code readability and thorough documentation in the report for collaboration with my team.

Experience:

Go Project

July 2024 - August 2024

Data Intern

Manhattan, NY (Hybrid)

- Secured, maintained, and updated a database with over 500 current students, donors, and staff profiles on Salesforce.
- Imported and consolidated over 10,000 historical user data profiles, to clean and validate the data to be input on Salesforce.
- Assisted the team by completing daily tasks and conducting research by gathering data for further analysis in detailed reports and dashboards on Salesforce and Excel for overall attendance and engagement in the program.

QL Shop

June 2023 - August 2023

Retail Associate

Staten Island, NY

- Greeted and assisted customers in a friendly and professional manner, providing product information, answering questions regarding products.
- Maintained a clean and organized sales floor to ensure proper product placement, visual merchandising, replenished inventory, and ensured adequate stock levels on the sales floor.
- Collaborated with team members to achieve sales goals and targets and provided excellent customer service by processing customer transactions accurately and efficiently.

P.S. 054 Charles W. Leng

December 2018 - March 2020

Teacher Assistant

Staten Island, NY

- Helped a group of 30 students learn how to use Lego Robotics and introduced them to simple engineering skills such as programming, and building Lego Robots.
- Facilitated hands-on learning experiences and tasks and guided students in building and programming robots to complete various challenges.

Technical Skills:

Programming/Scripting Languages: Java, JavaScript, HTML/CSS, Python, C, MIPS Assembly, SQL

Libraries/API: Pandas, Scikit-Learn, Seaborn/Matplotlib, NumPy, RESTful API

Frameworks: React.js, Express.js, Node.js, MongoDB, Spring Boot, JUnit

Developer Tools: Visual Studio Code, Google Colab, IntelliJ, Git, Salesforce
