Work Experience

SID – Software Developer

January 2024 – Present

- Designed and maintained a responsive website using HTML, CSS, and JavaScript, showcasing company services with advanced styling and cross-device compatibility. Web traffic increased 25% YOY.
- Developed internal tools to track and analyze demographic and viewership data to maximize the use of and revenue derived from TV commercial slots. This data was used to optimize matching clients to slots.
- Redesigned and automated the internal invoicing system. This system decreased outstanding invoice time by 20%, increased cash flow, and saved employees' hours of time weekly.
- Created internal tools used by a diverse range of employees to filter and sort data more efficiently. Developed an interface that was user-friendly to non-technical employees and received positive feedback.
- Integrated modern development tools such as Git/GitHub and browser developer tools to streamline debugging and version control. This integration increased efficiency in producing new version releases.
- Developed and maintained security controls, policies, and procedures, ensuring the safety of sensitive information. Conducted internal audits to ensure proper functioning and identify areas for improvement.

IdeaNova Technologies, Inc. – Software Developer

August 2023 – December 2023

- Designed and developed an interactive in-flight software featuring real-time GPS tracking, offline accessibility, and touchscreen compatibility, increasing passenger engagement with the software by 15%.
- Implemented an automated ticketing system to streamline request handling, reducing project timeline by 5 weeks. Built internal framework to ensure quick turnaround time and identify frequent types of tickets.
- Collaborated with and presented to clients through regular weekly meetings. Led client engagement through structured touchpoints, translating complex technical concepts into actionable insights.
- Led weekly scrums and debugging sessions, increasing the quality of deliverables using feedback from clients and internal tests. Led the deployment of new versions, ensuring seamless transitions.
- Delegated tasks to optimize the utilization of team resources, accelerate project development, and address key pain points for our client.

Education

Iowa State University – B.S., Computer Science

December 2023

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming and Design, Privacy-Preserving Algorithms, Advanced Programming Techniques, Construction of User Interfaces, Operating Systems.

Skills and Personal Projects

Languages & Tools: JavaScript, Python, HTML/CSS, SQL, C/C++, Git, R, MAT REST APIs, MATLAB, PeopleTools

Key Skills: Data extraction, transformation, and loading (ETL), data mapping, data modeling, database optimization, analytics, UX, process improvement, client relationship management.

Development Practices: Agile and Scrum methodologies, development sprints, UX/UI, code debugging, testing, and validation processes.

Software: MS Suite, Zendesk, Jira, Workday, Okta, ADP, Oracle, Gusto, Salesforce, Fidelity, Github
