EDUCATION

Michigan State University – East Lansing, MI
B.S. in Computational Data Science

Expected May 2025
GPA: 3.8/4.0

EXPERIENCE

CVS Health– Scottsdale, AZ

Digital Analytics Intern

May 2024 – August 2024

- Built and maintained 6 performance dashboards tracking conversion rates and drop-off points in scheduling tools.
- Analyzed user behavior across 500K+ appointment sessions, providing actionable insights to optimize workflow.
- Delivered clear weekly reports to stakeholders, improving decision-making through concise data communication.

Missouri University of Science & Technology– Rolla, MO

NSF REU Research Intern

May 2023 – April 2024

- Cleaned and analyzed a 1M+ record transplant dataset for equity evaluation using Python and Excel.
- Created documentation and formal deliverables (via Excel and LaTeX) and presented to a cross-functional healthcare research board.
- Managed data collection and survey logistics across 50+ unique recipient profiles for a health-focused study.

ATLAS Experiment– East Lansing, MI

Research Assistant

January 2022 – December 2023

- Assembled 250+ muon drift tubes weekly, maintaining quality standards and reducing equipment failure rates by supporting calibration efforts.
- Documented assembly and quality assurance procedures to maintain operational compliance.
- Collaborated with team members to ensure the timely completion of project goals.

SKILLS

Programming: Python, C++, SQL, R, HTML, MATLAB, PowerShell, Bash

Technical: Microcontroller Programming, Soldering, Adobe Analytics, Confluence, Tableau, Google Tag Manager, Hadoop

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Altair, TensorFlow, Keras, Scikit-learn, Dask, Scipy, API

Developer Tools: Git, Visual Studio Code, ClickUp, OverLeaf, Microsoft Visual Studio Code, Excel, Oracle VirtualBox

PROJECTS

QSIDE Act Now

Michigan State University | Spring 2025

- Analyzed 15+ variables across 100+ Illinois schools to identify key drivers of chronic absenteeism using Python and Excel.
- Analyzed absenteeism drivers using education and public health data from 100+ schools.
- Created interactive Tableau dashboards to visualize KPIs related to equity and resource allocation.

Fetal State Predictor

Michigan State University | Fall 2023

- Developed a web app using ReactJS and TensorFlowJS to classify fetal health status with 85%+ accuracy.
- Trained a multi-class classification model on 2,100+ records using Keras and optimized it with Keras Tuner, reducing training time by 30%.
- Deployed real-time predictions in-browser and applied feature scaling and validation testing for clinical interpretability.

Emotion Detection in Social Media

Michigan State University | Spring 2024

- Preprocessed and combined 35,000+ text records from Twitter, Reddit, and Instagram for emotion classification.
- Documented methodology and results through detailed reports and presentations, demonstrating technical writing skills.
- Increased generalization by bucketing 25+ emotions into 6 core categories; benchmarked model against BERT and GRU architectures.

EXTRACURRICULARS

Society of Asian Scientists and Engineers – East Lansing, MI

E-Board Vice President

August 2023 – May 2025

- Led executive board meetings by setting strategic goals, coordinating with officers, and overseeing initiatives that supported professional development, academic success, and member engagement.
- Managed event logistics and operations for conferences, technical workshops, and fundraising activities, ensuring smooth execution through detailed planning, clear communication, and collaboration with university departments and external partners.

Women in Engineering Connect – East Lansing, MI

Mentor

August 2023 – May 2025

- Guided first-year students through academic and career planning.
- Facilitated meaningful mentorship by actively engaging in targeted meetings that encompassed personal and professional growth areas, fostering the mentees' overall development and success.
