SUMMARY

Data Analyst with 5+ years of experience in data-driven operations, project coordination, and analytics. Recently completed a Business Intelligence Analytics certification (TripleTen) with hands-on training in SQL, Tableau, BigQuery, and data visualization. Proven ability to develop and maintain SQL queries, build actionable dashboards, and analyze large datasets to identify patterns, anomalies, and trends. Seeking to apply technical and analytical expertise in a financial services environment.

SKILLS

- SQL (Advanced)
- Excel, Power BI, and Tableau Dashboards & Reporting
- Data Accuracy & Validation
- Financial & Compliance Data Analysis
- Ad-Hoc Reporting & Stakeholder Support
- Cross-Functional Collaboration

TECH PROJECTS

Zomato Data Analysis | 11/24 | [Website](#)

- Developed SQL queries to extract and analyze sales data by cuisine and menu item categories.
- Built a Tableau dashboard to visualize trends and sales anomalies across thousands of SKUs.
- Identified low-performing items (sold <1/month), representing 3% of total inventory.

Superstore Return Analysis | 10/24 | [Website](#)

- Conducted root cause analysis of financial return patterns using SQL and Excel.
- Created visualizations in Tableau to identify seasonal spikes in returns and high-risk buyer behaviors.
- Recommended actionable insights to reduce return rates during holiday seasons.

EXPERIENCE

THE WALT DISNEY COMPANY | Distribution Project Manager | 04/22 - 10/23 | Burbank, CA

- Delivered global content distribution to Disney+ and Hulu, ensuring data accuracy and integrity in metadata and asset reporting.
- Collaborated with cross-functional teams (Programming, Localization, Mastering) to meet project requirements for delivery pipelines.
- Tracked vendor performance using internal reporting tools to support reviews and cost analysis.

IYUNO | Project Manager | 01/21 - 04/22 | Burbank, CA

- Oversaw localization project data for Amazon and Riot Games, including tracking financial metrics, subtitles, and dubbing workflows.
- Managed large volumes of multilingual data across compliance-sensitive content categories.
- Supported ad-hoc data requests by coordinating across global language and engineering teams.

NETFLIX | Localization Project Coordinator (Contractor through RWS Moravia) | 12/18 - 06/20 | Burbank, CA

- Maintained accurate tracking of digital assets and metadata using proprietary databases.
- Delivered actionable insights to improve vendor workflows and asset turnaround times.
- Supported global localization compliance initiatives through structured data analysis and QC tracking.
