
STUTI GUPTA

SOFTWARE ENGINEER

St Paul, MN 55108 ♦ (507) 301-6410 ♦ stutig6767@gmail.com ♦ [linkedin.com/in/stuti-gupta-umd](https://www.linkedin.com/in/stuti-gupta-umd)

PROFESSIONAL SUMMARY

- Accomplished and detail-oriented Software Engineer with a Master's degree in Software Engineering and over 5+ years of progressive experience in full-stack development, cloud computing, and secure software design.
- Demonstrated success at Abbott Laboratories leading UI development and optimizing healthcare application performance through advanced Angular and JavaScript techniques—resulting in a 40% boost in operational efficiency and reduction in debugging time.
- Certified AWS Solutions Architect with strong hands-on experience in cloud migration, infrastructure planning, and implementation using AWS services (EC2, S3, ECS, EKS, CloudTrail, WAF, Auto Scaling), and exposure to Azure and GCP.
- Adept at building secure, scalable applications with Spring Boot, SQL, REST APIs, and Docker while adhering to accessibility and compliance standards (WCAG).
- Proficient in cybersecurity principles with practical experience in phishing awareness campaigns, malware analysis, secure network protocols, and SIEM tools like Splunk.
- Proven experience in front-end development using Angular and JavaScript, as well as backend technologies including Spring Boot and SQL.
- Adept in cloud technologies with AWS Solutions Architect certification, specializing in secure cloud migrations, threat detection, and system optimization.
- Recognized for leadership in collaborative team environments—successfully leading development teams, managing cross-functional communications, and delivering on complex project timelines.

SKILLS

Cybersecurity: AWS, Azure, GCP, Cloud Security, Wireshark, Splunk, SIEM, GNU Debugger, Kali Linux, IDA Pro, Network Security, Secure Protocols	Programming & Frameworks: HTML, CSS, JavaScript, AngularJS, SQL, MATLAB, PHP, Spring MVC, Spring Boot, Bootstrap, Scala
Web Services & Version Control: REST, SOAP, GitHub, Jenkins, Docker, Postman	Certifications: AWS Solutions Architect: PCF, EC2, S3, ECS, EKS, SQS

WORK HISTORY

Software Engineer II, ----- 02/2022 - Current

Abbott Laboratories, – Minnesota, USA

- Developed front-end for medical applications using Angular framework, JavaScript and HTML.
- Developed analytical graphs using Angular material that increased project efficiency by 40% and enabled analysts to perform targeted customer analysis.
- Lead the UI team of five members and allocated tasks, discussed issues in order to provide resolution and utilize best practices.
- Analyzed source code to identify and rectify potential functionality issue and performed code unit testing that reduced bug fixing time.
- Elicited functional and non-functional user requirements and developed use cases and network diagrams for the same.
- Designed and developed reports in SQL Server Reporting Services.
- Tested web accessibility against WCAG Standards using Axe and Lighthouse Worked.

Software Engineer, -----01/2017 - 05/2018

American Express – Delhi, India

This project proposes to develop a means to enter and maintain banking information for clients. American Express needs to have banking information for ACH purposes. The database elements for banking information already exist. There is currently no means to enter or edit banking information for these clients. Banking information shall be added as a function in Express Client Implementation.

- Involved in the High-level design, Preparing Technical Spec, analysis and understanding of the requirement of various modules.
- Coaching and leading team with java application developments and project flow management, development and system integration in banking solution, especially the banking solutions for global and consult for user to support production.
- Closely interacted with Client, Project Manager, Business Analyst and Developers and Quality analyst.
- Involved in Preparing Test Cases for developer and Reviewing of Test Cases Sent by QA team.
- Proposed and developed a prototype using J2ee for their Auditing module (which is successfully developed, unit tested and released to QA).
- Closely worked with (Data Base administrator) DBA's for executing all the migration scripts.
- Involved in debugging and tracing using Eclipse IDE, unit integration, bug xing, acceptance testing with test cases, code reviews.
- Involved in the High level design, Preparing Technical Spec, analysis and understanding of the requirement of various modules.

Software Intern, ----- 05/2016 - 08/2016

Bharti Airtel Limited – New Delhi, India

- Successfully developed a Phishing Module to increase user-awareness concerning the phishing cyber-attack.

- Launched an educational phishing campaign resulting in reduction of 23% employees from being the victims of the attack.
- Verified security vulnerabilities in accordance with OWASP's TOP 10 Web Application Security Risks and helping the development team with mitigation techniques.
- Achieved defence-in-depth security using SNORT IPS along Cloudflare's WAF and multiple firewalls.

EDUCATION

M.Eng: Software Engineering, 12/2021

University of Maryland - College Park, USA

B.Tech: Electronics and Communications Engineering, 07/2019

SRM Institute of Science and Technology - Chennai, India

B.Tech: Software Engineering (Exchange Program) , 06/2019

Sungkyunkwan University - Seoul, South Korea

PROJECTS

AWS Cloud Migration, College Park, MD (Oct, 2020 - Dec, 2020)

- Successfully planned cloud migration from on premises servers to AWS for the given problem statement.
- Implemented the secure plan to AWS cloud with WAF, CloudTrail, CloudWatch, and Auto Scaling.
- Documented the Compliance, technical aspects, best practices and the developed architecture diagram.

Malware Analysis, College Park, MD (May, 2020 - Sept, 2020)

- Successfully found the encrypted malware in the given compromised Windows XP machine.
- Found hidden passwords and malware activity through network activity analysis.
- Investigated all the relevant evidence with detailed analysis of the malware and the compromised machine.

Enterprise Learning Platform for Programmers, College Park, MD (July 2020 – November 2020)

- Designed software architecture for an online learning management system using Model View Controller design pattern.
- Inculcated the quality drivers like usability, security and availability during the SDLC.
- Designed logical, behavioral and deployment view structures in the planning phase increasing development efficiency by 20%.
- Provided support to the Project Manager on all issues related to the design and planning phase.

ACHIEVEMENTS AND CO-CURRICULAR ACTIVITIES

- Awarded Gold medal for research paper titled 'Quoggle: A Quantum Based Web Search Engine' out of 2000 teams.

- Built an algorithm using laws of quantum mechanics to reduce search time in web engines by 15%.
- Secured 5th rank in ABU National Robotics Competition.
- Awarded merit-based full scholarship to study at Sungkyunkwan University, one of the best universities in the world.
- Sponsorship Head at Engineer Without Borders, Chennai Chapter –‘E- Classroom on wheels project' to benefit the kadappakam village in Chennai.
- Technical head at AARUSH, National Tech Fest– Managed the electronics domain team of 50 students, coordinated events and.
- Awarded 2021 Travel Grant for Society of Women Engineers (SWE) conference. • Awarded 2021 Roberta Ma Scholarship.
