PROFESSIONAL SUMMARY

Tech driven professional with over 3 years at Amazon resolving complex issues and analyzing data. I am skilled in SQL, Python, Tableau, Excel, and AWS with a strong foundation in process improvement and technical investigation. I hold a master's in information science and now focus on applying analytical and technical skills in a Tech Business Analyst role.

PROJECT EXPERIENCE

PX Backlog Project: Amazon Games (New World)

Remote collaboration: India & South America

- Resolved 550+ support tickets for **New World** by identifying gameplay bugs, system glitches, and data errors.
- Independently investigated root causes of player reported problems without formal documentation, improving resolution speed and ticket accuracy.
- Developed escalation workflows and internal documentation for recurring bugs, streamlining developer handoff and reducing backlog time.
- Contributed to the game's stability by identifying early stage issues and supporting QA efforts in a fast paced, resource constrained environment.

WORK EXPERIENCE

Amazon (Escalations Support) | April 2021 - June 2023

- Managed complex customer issues and maintained a 98% resolution rate on escalated tickets.
- Provided SME level support and mentoring for new team members.
- Delivered tailored solutions for high impact customer cases, improving retention by 2%.

Payments Investigator: Amazon Flex | April 2021 - June 2023

- Investigated driver payment discrepancies and achieved 99.5% accuracy in reconciliations.
- Reduced escalations by 54% through root cause analysis and process improvements.

Moderator: Amazon Games | April 2021 - June 2023

- Reviewed in game reports and ensured 100% issue resolution within SLA.
- Reported bugs, enforced player conduct, and supported dev teams pre-launch.

Customer Service Representative: Amazon Development Centre | June 2020 - Nov 2020

- Resolved shopping related issues with 98% response rate.
- Reduced resolution time by 22.7% through case analysis and knowledge sharing.
- Contributed to a 6.2% improvement in overall service quality.
