

Sucharitha Vem

Java Full Stack Developer

Atlanta, GA | 904-860-4435 | vemsucharitha25@gmail.com

SUMMARY

- 4+ years of experience developing Java-based Web apps with required skill sets.
- Experience in all phases of Software Development Life Cycle (SDLC), which includes Integration, Implementation, Interaction, Business Analysis/Modelling, Documentation and Testing of all Software applications.
- Developed Web-based enterprise applications using core Java, Web Services (SOAP and REST), MVC Framework, SQL, JSP, Servlets, JDBC, Hibernate, J2EE and Object-Oriented Programming techniques.
- Experience utilizing **JavaScript** libraries/frameworks such as Node.js, React and Angular. Proficient in designing dynamic web applications using HTML, CSS, JavaScript, jQuery, AJAX, and JSON.
- Knowledgeable in utilizing cloud computing platforms like Amazon Web Services (**AWS**) for building, deploying, and developing applications. Proficient in version control and configuration management tools such as **Git** and Maven.
- Strong leader and team player; excellent motivational skills to sustain forward growth momentum while motivating peak individual performance from team members.
- Implemented and managed multiple relational and non-relational databases, including **MySQL**, Oracle, PLSQL, **Cassandra** and **MongoDB**. Utilized and maintained SQL Triggers and Stored Procedures.

SKILLS

Methodology	:	SDLC, Agile.
Languages	:	C, C++, Core Java, Java 8, SQL, Swift, C#, Python.
Frameworks/Libraries:	:	Spring MVC, Hibernate, React.js, Angular, Spring Boot, SOAP, Microservices, Spring Security, API Gateway (APIGEE), Node.js.
IDE's	:	NetBeans, IntelliJ IDE, Eclipse, Xcode, Visual Studio Code.
J2EE Technologies	:	Servlets, JSP, JavaBeans, JDBC.
Web Technologies	:	HTML, CSS, Bootstrap, JavaScript, TypeScript, jQuery, Ajax, JSON, XML, GraphQL.
Application Server	:	Apache Tomcat, AWS, Azure, OCI, GCP.
Database	:	MySQL, Oracle, DB2, PL/SQL, SQL Server, PostgreSQL, NoSQL, Tableau.
Build /Other tools	:	MS Visio, Maven, Gradle, Junit & Mockito, Cucumber, Jenkins, Docker, Kubernetes, Kafka, Kibana, Terraform, SonarQube, Postman, Swagger, Splunk, Spark, Redis, Service Now.
Version Control Tools	:	Git, GitHub, Git Bash, Git Lab, Jira, Bit Bucket.
Operating Systems	:	Windows, Linux.

EXPERIENCE

Charles Schwab, US | Aug 2023 – Current | Java Full Stack Developer

- Associated with 4 cross-functional teams to manage the project and to deliver projects on time using Agile methodologies such as Scrum.
- Involved in web design for portals using **Spring framework**, HTML, CSS, **Angular** for responsive front-end components using VisualStudioCode.
- Conceptualized **Java 8** and **Spring** to streamline web services. Developed real time data management by leveraging Hibernate, **SQL**, and NoSQL like **MongoDB**.
- Built and deployed serverless microservices by seamlessly integrating **AWS** Lambda, S3, **Dynamo DB**, **Open Shift** and CloudWatchresulting in improved scalability, cost-effectiveness, and streamlined monitoring.
- Implemented and managed a containerized application deployment environment using Amazon ECS, orchestrating scalable and highly available microservices. Gained the knowledge of utilizing Kinesis to design and implement scalable and real-time data processing solutions.
- Handled escalated issues from L1 support and performed in-depth analysis and advanced troubleshooting. Assisted with the deployment of software updates, patches, and new releases into the production environment, following a controlled and documented process to maintain system stability.

- Administered code repositories for **microservices** using Source Control and **GIT** for version control reducing conflicts and Set up Tomcat and **Jenkins CI/CD** pipeline for the projects, resulting in a 25% reduction in time and integrated Splunk for log monitoring.
- Conducted functional validations using **Postman** for **APIs**, and automated test JUnit's for each implementation, resulting in a 90% improvement in bug detection.

Informatica Pvt Limited, India | Nov 2020 - Dec 2022 | Java Full Stack Developer

- Utilized **Java 8** Method References feature and functional interfaces to streamline code implementation and enhance code readability. utilized XML technologies to facilitate seamless data exchange and structured information representation in web applications.
- Established an authentication system using **OAuth 2.0** that improved **security** and reduced user-facing errors. Developed **REST APIs** with Http requests and **Microservices** using **Spring framework** with **Eclipse** IDE and tested using Postman by Swagger reducing APIs response time by 20%.
- Developed multiple web pages utilizing **HTML**, **CSS**, **JSP**, and **JavaScript** to implement client-side checking and validations. Utilized **React** and Angular concepts to enhance interactivity and user experience across different pages.
- Implemented **GraphQL** to optimize API performance, reducing data over-fetching and under-fetching by 30%, resulting in improved client-server communication and enhanced application efficiency. Sorted and shuffled data in Hadoop – MapReduce using Python. Utilized OCI technologies for building, testing, deploying, and managing applications and services.
- Collaborated with the DevOps team to enhance application availability by 20% through the deployment of gateways using **Jenkins** and Apache **Tomcat** servers. Implemented Elastic search, Apache **Kafka**, and Kibana for comprehensive logging and analysis purposes. Deployed applications to Amazon Web Services (**AWS**) utilizing **EC2** instances, Elastic Search, EKS.
- Conducted comprehensive functional validations for 50 APIs using **Postman**, ensuring their reliability. Automated tests using **JUnit** and **Mockito**, resulting in a significant 90% improvement in bug detection, leading to more robust and stable software.
- Understanding the application's architecture, business logic, and underlying technologies allows me to understand how the various components interact. As an L2 support managed the entire lifecycle of incidents, including incident logging, tracking, resolution, and post-incident analysis.

CMR Infotech, India | Jun 2019 - Nov 2020 | Associate Software Developer

- Architected and developed REST and SOAP applications, and microservices with Java using Spring, and Eclipse IDE, facilitating seamless integration and communication. Used flask framework in python to implement frontend web-applications.
- Worked on Log4J for application logging, Notification tracing mechanisms and used Maven tools for building deploying the web applications.
- Implemented JavaScript framework like **Node.js** as a server-side proxy to monitor response times, while developing multiple front-end screens using the **Angular**, Typescript and **React.js** Framework to enhance user interaction.
- Reconciled **CI/CD** pipeline using **Jenkins** for the projects, resulting in a 25% faster to market and monitoring logs using Splunk.
- Developed enterprise scale cloud-based applications using Azure services.
- Implemented Junit test cases for unit testing and Suites for end-to-end testing and Used JIRA for tracking the project stories in Agile Methodology.

Education

MS in Computer and Information Sciences

University of Alabama, Birmingham.

Bachelors in computer science

Osmania University.
