

SUCHITRA RAJKUMAR

Chicago, IL | (312)-468-7728 | sraj कुमार@hawk.illinoistech.edu | [Linked In](#)

SUMMARY

Passionate computer science student with experience in full-stack development and AI/ML applications. Skilled in building responsive web dashboards, RESTful APIs, and data-driven solutions using Spring Boot, Django, React, Node.js, and Python. Experienced in statistical analysis, machine learning models, and cloud technologies (AWS) to deliver efficient and scalable solutions.

EDUCATION

Illinois Institute of Technology, Chicago, IL

Anticipated MAY 2027

Master of Computer Science

B S Abdur Rahman Crescent Institute of Science and Technology, Chennai, TN

MAY 2025

Bachelor of Technology, Computer Science | GPA: 3.68

WORK EXPERIENCE

Cyber Risk and Regulatory Intern

FEB 2025 – JUL 2025

PricewaterhouseCoopers, Bangalore, KA, India

Tech Stack: Angular.js, Node.js, GitHub, AWS

- Contributed to financial **risk and regulatory** project through quantitative framework analysis and compliance data evaluation.
- Developed internal **Angular**-based dashboards and automated reporting systems using **Excel**.
- Utilized **AWS cloud technologies** and **GitHub Actions** for seamless CI/CD.

Full Stack Development Intern

JUL 2024

vTitan Corporation Pvt Ltd, Chennai, TN, India

Tech Stack: React.js, Node.js, Java, Spring Boot, MySQL, GitHub

- Developed and maintained a full-stack application using **Spring Boot**, **React**, and **MySQL**.
- Designed and implemented **RESTful APIs** with optimized query handling and data persistence.
- Performed database modeling, integration testing, and deployment for high-performance delivery.

Software Developer Intern

JUL 2024 – AUG 2024

Bluestock Fintech, Remote

Tech Stack: HTML, Django, Boot Strap

- Developed a responsive fintech dashboard using Django, HTML, and Bootstrap.
- Implemented dynamic data visualization and CRUD features with Django ORM.
- Optimized backend workflows and database performance for real-time analytics.

PROJECTS

Book Recommender

OCT 2025 - Present

- Building an AI-powered book recommender using LLMs and Python for personalized suggestions.
- Implementing semantic similarity models with **Pandas** and **Scikit-learn**.
- Developing a robust backend with a real-time interactive interface.

Deep Learning System for Hospital Emergency Referrals

OCT 2024 – APR 2025

- Developed an AI-powered healthcare referral system using **deep neural networks** for rural emergency optimization.
- Applied multi-context and multi-criteria analysis to enhance real-time hospital evaluation and referral accuracy.
- Built a full-stack platform with **React.js**, **Node.js**, and **MongoDB**.
- Integrated **TensorFlow.js** for real-time predictions and dynamic dashboards.

CERTIFICATIONS

AWS Cloud Practitioner Foundational: Amazon Web Services (AWS)

MAY-2025

AWS S3 Basics: Coursera

APR-2024

Introduction to Cloud Computing: Infosys Springboard

APR-2024

SKILLS

Technical skills: Java, Python, C/C++.

Web Development: HTML, CSS, React.js, Angular.js, Node.js, MySQL.

Cloud: Amazon web services (AWS).
