PROFESSIONAL SUMMARY

Finance professional and Business Analytics Master's candidate with a complementary business education, multicultural background, and multi-industry, cross-functional experience in data analysis, pricing strategies, process improvement, and predictive modeling by leveraging ERP systems, data analytics, and visualization tools to deliver actionable insights. Future career interests include Financial Planning, Data Management, and Advanced Analysis to achieve strategic business objectives.

EDUCATION

Northern Arizona University (NAU)

Master of Business Analytics

Flagstaff, AZ

May 2025

Osmania University (OU)

Bachelor of Business Administration, Finance

Hyderabad, India

July 2023

EXPERIENCE

Financial Planner, Avinash College of Commerce, Hyderabad, India

June 2021 – Sep 2023

- Managed a budget of \$150K and conducted financial planning for large cultural events, ensuring cost-effective resource allocation
- Ensured financial accuracy and compliance by meticulously handling financial transactions and vendor payments
- Analyzed event expenses and revenue trends using Excel, Tableau, and SQL to generate insights and optimize financial strategies
- Identified opportunities for cost reduction through data visualization and financial analysis
- Collaborated with cross-functional teams to develop new programs, supporting strategic planning and resource forecasting
- Conducted financial audits and recommended cost-saving strategies, contributing to process improvement and policy compliance

PROJECTS

Designing a Data Warehouse for Sales Trends

- Designed and implemented a dimensional data model using MS Excel and MS Access for Amazon sales data (116K+ records), enabling effective tracking of key retail metrics (quantity sold, amount, delivery status) to inform pricing decisions
- Developed and executed SQL queries to analyze sales trends by SKU, product style, and regional demand, optimizing data extraction for targeted business insights relevant to pricing strategies and performance for retail sales analysis

Warehouse and Retail Sales Analysis

- Analyzed 307,645 retail and warehouse transaction records (2017–2020) to identify seasonal trends, customer preferences, and supply chain dynamics, providing insights crucial for cost management and demand planning
- Built descriptive models and performed exploratory data analysis using Python to detect key sales patterns, enhancing understanding of inventory control and sales performance relationships relevant to product costing

SAP RFP Assignment for Global Bikes Inc

- Led the evaluation of ERP systems for a multi-location manufacturer, assessing solutions against business objectives including cost reduction and global integration and compliance with US GAAP and IFRS
- Conducted a multi-criteria comparison of leading ERP vendors (Acumatica, Microsoft Dynamics 365), analyzing feature-cost tradeoffs and recommending Acumatica ERP for its advanced manufacturing integration and scalability

Advanced Data Analysis & Modeling

- Applied advanced statistical analysis (correlation, regression) and predictive modeling (Random Forest, Time-Series Prophet) using Python, Excel, Tableau, and RapidMiner to analyze complex datasets, identifying key drivers

SBI Mortgage Loan Performance & Customer Preference Study

- Conducted comprehensive research on mortgage loan offerings, analyzing 100 participant responses to identify preferences, satisfaction, and key influencing factors like credit score and income.
- Identified 54% of participants utilized SBI mortgage loans driven by top-up facilities, but 48% expressed dissatisfaction with existing customer service quality

SKILLS & CERTIFICATIONS

Technology: MS office, Tableau

Certifications: Tally, SQL, MS Excel, Power BI, SAP – MM & EWM, SAP – PP, Business Data Analytics
