

SAI SUDHA MOOLA

DevOps & Site Reliability Engineer | AWS Certified SysOps Administrator
(812) 671-8618 | moolasaisudha454@gmail.com | Open to Relocation | <https://www.linkedin.com/in/sudhamoola/>

PROFESSIONAL EXPERIENCE

Site Reliability & DevOps Engineer

May 2025 – Aug 2025

Global Payments Inc., Core DevOps Engineering Team

Atlanta, USA

- **Accelerated Kafka adoption** by reducing producer onboarding time **40%** through automated AWS MSK Serverless provisioning with Terraform in CI/CD pipelines (Jenkins, GitHub Actions).
- **Ensured zero-downtime releases** for multi-cluster microservices by implementing **ArgoCD ApplicationSet** workflows across staging and production environments.
- **Improved deployment reliability by 35%** using reusable Terraform modules, Helm charts, and Kubernetes manifests — cutting rollback frequency and production defects.
- **Enhanced observability** by building Grafana dashboards and Prometheus exporters, enabling real-time SLA/SLO tracking of error rates, latency, and uptime.
- **Boosted developer productivity 25%** by creating Terraform instruction sets for GitHub Copilot, enabling **policy-compliant Infrastructure as Code** generation.

Graduate Independent Studies Assistant

Aug 2024 – April 2025

Luddy School of Informatics, IUB (Part-time)

Indiana, USA

- Designed automated workflows to process and stitch satellite flood imagery, reducing **manual processing time by 60%**.
- Optimized large-scale image compression for storage efficiency, cutting data size by **35% without quality loss**.
- Used QGIS for **enhanced disaster visualization**, enabling more accurate flood impact assessment for research teams.

Azure DevOps Engineer

April 2023 – Jul 2024

Hexagon R&D India, Cloud Technologies Team

Hyderabad, India

- Orchestrated comprehensive cloud deployments and ensured ongoing maintenance for both customer and business units, reducing **issue resolution time by 30%**.
- Delivered exceptional support, enhancing operational efficiency across multiple units.
- Demonstrated proficiency in cloud test automation by leveraging **Python and JavaScript for REST/Web API tasks**, and utilizing Selenium for UI automation, which resulted in a **20% increase** in test coverage.
- Proficient in utilizing Azure resources and crafting deployment scripts with YAML, complemented by a strong grasp of CI/CD pipelines to streamline software delivery.
- Applied hands-on experience with **Docker containerization** and Kubernetes orchestration to deploy, scale, and manage containerized applications efficiently.

PROJECTS

Airplane Object Detection in Ultra-Low-Resolution Satellite Images

Jan 2023 – May 2024

- Python (Keras, TensorFlow, PyTorch), YOLOv8, Object Detection

- Built a **YOLOv8-based aircraft detection model** using a custom dataset of 1,000+ augmented satellite images, achieving optimized real-time detection while minimizing computational costs.
- Presented research findings at **ICAECT-2023**, showcasing practical applications for low-resolution satellite imagery analysis.

Accessible Food Delivery Website – Inclusive Platform for Visually Impaired Users

May 2022 – Dec 2022

- HTML, CSS, Bootstrap, JavaScript (ES6), Java, Django, Speech Recognition API

- Designed and developed a **full-stack food delivery platform** tailored for **visually impaired users**, integrating **speech recognition for navigation** and **voice output for content reading** to ensure an inclusive user experience.
- Built with a **responsive frontend (HTML, CSS, Bootstrap, JavaScript)** and a **scalable backend (Java, Django framework)**, the system enables seamless order placement and accessibility across devices.

ACHIEVEMENTS

- **Superior Technical Lead**, Computer Society of India – Directed and mentored the student council, leading 10+ members in tech initiatives and events.
- Microsoft Certified: Azure Fundamentals, Salesforce Certified Administrator, AWS Certified SysOps Administrator Associate

EDUCATION

INDIANA UNIVERSITY, Bloomington, Indiana – Master, Computer Science (M.S), GPA: 3.9/4.0

Aug 2024 – May 2026

VNRVJIET, Hyderabad, Telangana, India – Bachelor, Technology (B.Tech), GPA: 8.6/10.0

Aug 2020 – May 2024

SKILLS

Cloud & DevOps: AWS (EC2, S3, Lambda, IAM, VPC, CloudWatch, MSK, SQS), Azure (Synapse, Data Factory, Functions, Monitor), GCP (GCS, Cloud Functions)

Infrastructure as Code: Terraform, AWS CloudFormation, Ansible, Puppet, Chef

CI/CD & GitOps: Jenkins, GitHub Actions, ArgoCD, Helm, Kubernetes, Docker

Configuration & Automation: Linux/Unix, Bash/Shell scripting, YAML

SRE & Monitoring: Grafana, Prometheus, ELK Stack, Splunk, CloudWatch, Azure Monitor, PagerDuty, OpsGenie, High Availability, Auto-scaling, Disaster Recovery, Incident Management

Data Engineering & Streaming: Apache Kafka (incl. MSK Serverless), Apache Airflow, Hadoop, Spark, Databricks, Snowflake, Data Warehousing, Data pipelines, ingestion & integration, ETL workflows

Programming & Development: Python, Java, SQL, .NET, C++, JavaScript/TypeScript, React, Node.js

Other: Salesforce (Certified Admin, Workflow Automation, REST/SOAP Integrations)
