MOUNT CARMEL INSTITUTE OF MANAGEMENT, Bangalore, India Apr 2013

Post Graduate Diploma in Business Management

Major in Retail Management & Human Resource Management

WORK EXPERIENCE

Data Concepts – Richmond, Virginia Dec 2023 – May 2024

Business Analysis Intern

- Gathered and analyzed the functional requirements from Virginia Supreme Court, to design an online platform for processing cases and enhance legacy system which resulted in grant approval from Virginia Supreme court for \$xM.
- Collaborated with the development team and end users to define project scope and success criteria, creating user stories and requirements in JIRA.
- Assisted Senior BSAs and end users with the coordination and execution of User Acceptance Testing (UAT) for the final product.
- Designed wireframes and mockups to conceptualize and communicate high-level design strategies with stakeholders.
- Identified and resolved 10+ critical issues encountered in the new system development.
- Created use case documentation about the business processes for the playbook.

Infosys Limited – Dallas, Texas

Feb 2020 – May 2021

HR Assistant

- Co-ordinated with cross functional teams of Finance, Helpdesk and Offshore teams to help process 15+ immigration visa application for employees every day.
- Created a process to guide employees regarding visa filing process, resulting in increased clarity and efficiency.
- Prepared weekly and monthly reports to management on the overall status of employee immigration – number of cases filed, closed and open cases.

ACADEMIC PROJECTS

Statistical Analysis of US Equity market in R

Jan 2023 – May 2023

- Extracted and merged time series data of US Equity market, created a dataset by employing data cleaning and data manipulation techniques using R.
- Used KPSS test to find the differences in each of the series for stationary validation.
- Forecast the prices of US equity markets for next 30 days, using AIC, selected VAR and ARIMA.

Disaster Visualization in Tableau

Jan 2023 – May 2023

- Mapped disaster data, sourced from globalenergyobservatory.org to understand patterns and types of top natural disasters that impact oil refineries in United States.
- Used small multiples and geo locations in tableau to understand key focus area for pattern determination.

System Analysis and Project Management

May 2022 – Aug 2022

- Identified possible additional functionalities for Glassdoor website, to help customers make informed decisions and increase the number of users on the website.
- Modeled the proposed improvements using BPMN and OOA&D methodology.
- Transformed the models into detailed system design using visual paradigm.

Data Analysis Using Python

May 2021 – Aug 2021

- Developed a code framework to analyze and visualize a movie database with over 150,000 data objects.
- Analyzed the patterns using statistics toolbox/APIs.
- Reported recommendations to improve the business sales, based on data analysis.

CERTIFICATIONS AND SKILLSET

Certifications: MS Project, R Programming, Data Visualization in Power BI, Analyzing Data in Tableau
Analysis Tools: MS Excel, Google Analytics, Tableau, Power BI
Framework: Pandas, Numpy, Matplotlib

Programming: Python, R, SQL
Platforms: Jupyter Notebook, R Studio
Software: MS Project, Visual Paradigm, SAP, Visio
Databases: SQL Server

ADDITIONAL INFORMATION

Eligibility: US Permanent Resident, Eligible to work with no restrictions.
