SUMMARY

Results-driven Software Developer with two years of experience. Skilled at delivering scalable, modular, and high-quality software solutions using microservices architecture. A strong collaborator with a passion for efficient coding and continuous learning.

EDUCATION

Master of Science (MS) – Computer Information Sciences (Software Engineering and Software Testing) Aug 2024 – April 2026

Harrisburg University of Science and Technology – GPA 4.0

Harrisburg, PA

Bachelor of Technology (B. Tech) – Computer Science Engineering

June 2017 – July 2021

SASTRA Deemed University

TN, India

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions

Aug 2021 – Jan 2023

Programmer Analyst

Bangalore, India

- Designed and maintained scalable microservices using Java, Spring Boot, and Hibernate, improving the reliability and processing efficiency of financial transaction and account management systems by **10%**.
- Engineered and deployed RESTful APIs supporting customer onboarding, account lifecycle, and transaction workflows, ensuring **secure, scalable data exchange** across **distributed microservice architectures**.
- Spearheaded migration of 3 legacy services to AWS cloud, enhancing scalability and reducing infrastructure maintenance by 20% while decreasing the number of Sev-1 production incidents, and improving stability.
- Performed integration and regression testing using Postman and automated test suites, **reducing production defects by 13%** and **shortening QA cycles by 21%** through early defect detection and test automation.
- Implemented a scalable frontend architecture leveraging React functional components and Hooks, simplifying **code maintenance** and **enhancing UI performance**.

Cognizant Technology Solutions

Feb 2021 – July 2021

Intern

Bangalore, India

- Built a user-centric monolithic application for patients, doctors, and receptionists to log in and manage appointments and medical histories through **intuitive interfaces and streamlined CRUD operations**.
- Implemented a dynamic frontend using **React.js** and connected it to backend APIs via **Axios**, collaborating with backend engineers to ensure **consistent data flow, error handling**, and an **intuitive user experience**.
- Configured and managed **MySQL databases** using **MySQL Workbench**, integrating them with backend services via **Spring Data JPA** to enable **efficient data persistence** and **improve query performance by 12%**.

PROJECT

Hotel Management System

Aug 2025 – Present

- Engineered a secure hotel management system featuring JWT-based authentication and authorization, supporting 100+ users with a 30% decrease in unauthorized access attempts through robust multi-factor authentication protocols.
- Constructed the backend with Spring Boot, exposing RESTful APIs for authentication, room and booking management, connecting to MySQL through Spring Data JPA, improving query performance by 12%.

Sepak Takraw Web Application

Jan 2024 – May

2024

- Designed a tournament management system module utilized by 2,000+ Sepak Takraw players across India, streamlining player registration and scoring processes, and decreasing adjudication errors by 20%.
- Architected and built the transfer module using Spring Boot that enabled Sepak Takraw players to move between states; reduced transfer processing time by 35% and minimized data entry errors.

TECHINICAL SKILLS

- Web Technologies/Programming Language:** HTML, CSS, JavaScript, React.js, Java.
- Framework & Libraries:** React.js, Spring Boot, Hibernate, Spring Data JPA, REST API, Microservice.
- Databases:** MYSQL, DynamoDB.
- Tools/Methodologies:** Git, Eclipse, Postman, IntelliJ, MySQL Workbench, Visual Studio Code.
- Cloud Services:** AWS (EC2, S3, Lambda, VPC, IAM, ELB, ASG, Route-53, Cloud Front)

CERTIFICATIONS

- AWS Certified Cloud Practitioner

Aug 2024
