

SUJAY SINGH RAVI | DATA ANALYST

Austin, TX | +1 (945) 209-0878 | sujaysinghravi11@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 2.5+ years of experience in Financial Services and IT, specializing in SQL, Python (Pandas, NumPy), and advanced Excel for data manipulation and reporting. Skilled in building Tableau and Power BI dashboards, performing statistical analysis, and delivering compliance-focused insights (SOX, GDPR). Experienced in ETL processes and cloud platforms including AWS (S3, Redshift), Azure Data Factory, and GCP BigQuery.

EDUCATION

Master of Science in Business Analytics & Artificial Intelligence

May 2025

University of Texas at Dallas

Bachelor of Engineering in Computer Science

Aug 2022

Vishvesvaraya Technological University

TECHNICAL SKILLS

Programming:

Python (Pandas, NumPy, Matplotlib), SQL (MySQL, PostgreSQL, SQL Server), Excel (Advanced Functions, Pivot Tables, VBA)

Data Visualization & BI:

Tableau, Power BI, Dashboard Development, KPI Reporting, Data Storytelling

Data Analysis:

Data Wrangling, EDA, Hypothesis Testing, Regression Analysis, Forecasting, A/B Testing

Domain Analytics:

Risk Analytics, Fraud Detection, Portfolio Analysis, Business Metrics, Financial Forecasting

ETL & Databases:

SQL-based ETL, Snowflake, BigQuery, AWS Redshift

Cloud Platforms:

AWS (S3, Redshift), Azure (Data Factory), GCP (BigQuery)

Governance & Compliance:

Data Quality Management, Process Improvement, SOX Compliance, GDPR

Project Management:

Agile, Jira, Confluence, Stakeholder Communication, Cross-functional Collaboration

EXPERIENCE

FIS Global, USA

Feb 2025 – Current

Data Analyst

- Designed and delivered financial dashboards in Tableau and Power BI to monitor portfolio performance, credit risk, and revenue trends, improving reporting accuracy for executives by 20%.
- Streamlined ETL pipelines using Snowflake and AWS Redshift, reducing data refresh time by 25% and enabling faster access to transaction-level data.
- Performed fraud detection and risk analytics on high-volume transaction datasets with SQL and Python, identifying anomalies that reduced false positives by 10%.
- Conducted forecasting and regression Modeling using Python (Pandas, NumPy, stats models), enabling more accurate revenue projections across 3 business units.
- Partnered with compliance teams to design SOX and GDPR-compliant audit reports, achieving 100% adherence in quarterly internal review cycles.
- Collaborated with IT and finance stakeholders to automate recurring financial reports, reducing turnaround time by 15% while ensuring consistency across global teams.

HCL Tech, India

Jun 2021 – Jun 2023

Data Analyst

- Queried and Analyzed structured datasets using SQL and Python (Pandas, NumPy) to deliver insights for 4+ client projects in the IT services domain.
- Built Tableau and Power BI dashboards that tracked operational KPIs, improving visibility for project managers and reducing ad-hoc reporting requests by 15%.
- Conducted data wrangling, cleansing, and quality checks across multiple systems, lowering reporting discrepancies by 20%.
- Automated recurring monthly and weekly reporting using Excel (VBA, Pivot Tables) and SQL, which reduced manual effort and saved the team 10+ hours per week.
- Collaborated with business analysts and cross-functional teams in Agile sprints, translating requirements into data-driven reporting solutions.
- Gained hands-on exposure to AWS S3 and Azure Data Factory for client-side data ingestion and pipeline monitoring, laying the foundation for cloud-based analytics.
