PROFILE

Data Analyst with 4+ years of experience leveraging SQL, Python, R, and Tableau to analyze large datasets and deliver actionable insights. Proven record of improving reporting accuracy by 30% and cutting data processing time by 40% through automation. Skilled in ETL pipelines, predictive modeling, and dashboard design to support business intelligence and decision-making.

WORK EXPERIENCE

Data Analyst
HCL Tech

01/2021 – 01/2023
Chennai, India

- Evaluated 1M+ rows of server health, patch compliance, and resource utilization data using SQL, Tableau, and Excel, driving 30% improvement in reporting accuracy.
- Engineered ETL automation scripts with AWS Systems Manager and Shell, cutting data preparation cycles by 40% and enabling near real-time reporting.
- Produced trend analysis reports that identified recurring patch failures in 200+ servers, reducing incident recurrence by 20%.
- Designed performance dashboards visualizing KPIs such as uptime, compliance rate, and patch status for 5+ client accounts.
- Partnered with infrastructure teams to create custom metrics that improved monitoring accuracy and reduced false alerts by 15%.
- Delivered weekly insight briefs and monthly PowerPoint presentations for senior leadership, summarizing operational health across 3 major projects.
- Maintained audit-ready documentation of all SQL queries, workflows, and dashboards to support quarterly compliance audits.
- Coordinated with client service teams to tailor analytics to SLA targets and ensure on-time delivery of 100% scheduled reports.
- Implemented multi-stage data validation checks, improving dataset accuracy from 95% to 99.8% before distribution.
- Leveraged historical performance data to forecast patching success rates and resource requirements with 85% prediction accuracy.

Data Analyst
Maryville University of Saint Louis

02/2023 – 01/2025
St. Louis, United States

- Analyzed and transformed 250K+ rows of institutional and research data using Python, R, and SQL, delivering actionable insights for faculty and administrative teams.
- Automated data cleaning workflows with Python scripts, reducing processing time by 35% and improving accuracy from 96% to 99.5%.
- Built Power BI and Tableau dashboards to visualize enrollment trends, retention rates, and departmental KPIs for 5+ campus projects.
- Developed predictive models in R to forecast enrollment and retention with an 80% accuracy rate, supporting strategic planning.
- Delivered 10+ PowerPoint presentations summarizing key insights for academic leadership, improving data-driven decision-making.
- Collaborated with cross-functional teams across 3 departments, ensuring timely delivery of customized analytics solutions.
- Created and maintained reusable analytics templates and code repositories to standardize reporting processes.
- Conducted exploratory data analysis (EDA) to identify trends, correlations, and anomalies, accelerating project turnaround by 20%.

SKILLS

MS Office Suite – Excel (Pivot Tables, VLOOKUP, IF), PowerPoint (Presentations, Reports), Word, Outlook

Business Intelligence & Reporting: – KPI Dashboards, Data Reporting, Performance Metrics

Soft Skills – Problem-Solving, Critical Thinking, Communication, Collaboration, Teamwork, Attention to Detail, Time Management and Leadership

Data Analysis & Processing: – Pandas, NumPy, Data Cleaning, Data Transformation

Programming & Query Languages: – SQL, Python, R

Machine Learning & Predictive Modeling: – Scikit-learn, TensorFlow, Keras (Basic), Statistical Analysis

Cloud & Automation: – Azure (Data Factory, Synapse), AWS Systems Manager, Power Automate

Workflow Optimization: – Shell Scripting, Workflow Automation, ETL Pipelines

CERTIFICATIONS

Advanced SQL and Data Analytics (Coursera), Microsoft Certified: Azure Data Fundamentals

EDUCATION

Master of Science: Data Science
Maryville University of Saint Louis

01/2023 – 12/2024
St. Louis, United States
