## Data Analyst

FL | 901-213-7536 | [sujith.p@myitjobmails.com](mailto:sujith.p@myitjobmails.com) | [Linkedin](#)

### SUMMARY

Data Analyst with **5+ years of experience** delivering analytics solutions that transform complex data into actionable business strategies. Proven record of optimizing ETL pipelines, building predictive models, and creating impactful dashboards that have driven **up to \$2M in cost savings and 12%+ revenue growth**. Skilled in **cloud-native data platforms, AI/ML analytics, and advanced visual storytelling**, with expertise spanning healthcare, retail, and supply chain domains. Adept at collaborating across business and technical teams to deliver high-quality insights in **fast-paced Agile environments**.

### SKILLS

**Methodologies:** SDLC, Agile, Waterfall

**Data Analytics & BI** – Python (Pandas, NumPy, Matplotlib, Seaborn), R, SQL, Tableau, Power BI, Excel (VBA), QlikView

**Machine Learning & AI** – Predictive Modeling, Clustering, Classification, Regression, Random Forest, Gradient Boosting, NLP Basics

**Cloud & Big Data** – AWS (S3, RDS, Lambda, Redshift), GCP, Azure, Apache Spark, Databricks, Hadoop, Hive, Snowflake

**ETL & Data Engineering** – Informatica, Talend, Alteryx, Airflow, DBT, Data Cleaning & Wrangling, Query Optimization

**Databases** – MySQL, SQL Server, MongoDB, PostgreSQL, Snowflake

**Tools & Other Skills** – Git, JIRA, Confluence, SAS BI, Cognos, Business Objects, Google Analytics, GenAI for Analytics, (ChatGPT API, Vertex AI)

**Soft Skills** – Critical Thinking, Problem-Solving, Stakeholder Communication, Presentation, Storytelling with Data

### EXPERIENCE

#### Cigna | Data Analyst

Dec 2024 – Present

- **Architected an end-to-end data processing pipeline** for 10TB healthcare claims datasets, integrating **Pandas/NumPy preprocessing, AWS S3 data lake ingestion, and Snowflake transformation layers**, reducing execution time from **8 hours to 5 hours** and saving **\$15K/month** in infrastructure costs.
- **Engineered a medical imaging classification framework** using **scikit-learn (Random Forest, Logistic Regression)** and advanced feature engineering techniques, achieving **92% accuracy**, streamlining diagnosis workflows, and reducing case backlogs by **500/month**.
- **Developed executive-grade Tableau dashboards** with parameterized filters, LOD calculations, and dynamic KPI tracking, enabling leadership to identify **\$2M in annual cost-saving opportunities** through optimized claims adjudication.
- **Directed Agile analytics sprints** with a cross-functional team, integrating **rule-based anomaly detection algorithms** into a fraud detection pipeline, mitigating **\$1.2M/year** in fraudulent payouts.
- **Automated multi-source data validation** by building Python anomaly detection scripts using **Isolation Forest** and **z-score methods**, reducing quarterly forecast errors by **25%** and improving compliance reporting.

#### University of South Florida, FL | Graduate Assistant

May 2024 - Nov 2024

- **Designed and delivered an applied analytics curriculum** covering **EDA, statistical hypothesis testing, and supervised ML models**, aligned with current industry practices, boosting average course performance by **12%**.
- **Curated real-world datasets** from finance, healthcare, and retail domains for student labs, integrating **Tableau, Python, and SQL** into hands-on exercises that replicated business intelligence workflows.
- **Created a modular evaluation framework** using Jupyter Notebooks with embedded **unit tests for code submissions**, ensuring consistency in grading across 300+ students.

#### Infinite Infolab, Remote | Data Analyst

Aug 2020 - July 2023

- **Redesigned enterprise ETL architecture** by integrating **Informatica PowerCenter with AWS RDS/S3 storage layers** and optimizing MySQL queries through indexing, reducing reporting latency by **40%** and supporting **real-time visibility across 10 warehouses**.
- **Implemented customer segmentation models** using **K-means and hierarchical clustering** on **1M+ customer records**, enabling precision marketing campaigns that drove **\$1.5M/year in revenue**.
- **Led zero-downtime cloud migration** by implementing **parallel data replication strategies**, validating datasets with Python-based checksum utilities, and completing AWS transition **3 months ahead of schedule**.
- **Built an automated inventory monitoring system** in Tableau with calculated fields and scheduled extracts, reducing overstock by **22%** and cutting order delays by **30%**.

- **Developed a retail transaction analytics engine** in **Apache Spark (PySpark)** on Databricks, processing millions of daily records to enable **real-time customer segmentation** for 50+ B2B clients.
- **Engineered pricing optimization models** using **R, ggplot2, and regression analysis**, influencing promotional strategies that increased revenue by **\$500K**.
- **Designed sales forecasting pipelines** leveraging **Power BI (DAX, custom measures)** with Snowflake-backed datasets, achieving **98% forecast accuracy** for 100+ SKUs and guiding **\$10M in annual budget allocations**.
- **Optimized Snowflake warehouse performance** via micro-partition tuning, query refactoring, and caching, reducing execution time by **35%** for 200+ daily operational reports.

Projects

---

Healthcare Claims Optimization Project

- Developed Python scripts using Pandas and NumPy to preprocess 10TB datasets, reducing processing time by 37.5% and saving significant operational costs monthly.
- Built predictive models with 92% accuracy to enhance medical imaging analysis, streamlining diagnosis workflows and reducing case backlogs by 500 monthly.
- Created interactive Tableau dashboards with dynamic filters, enabling real-time visualization of claims trends and identifying substantial cost-saving opportunities.

Real-Time Inventory Management System

- Optimized ETL pipelines to integrate 5M customer records daily, enabling real-time inventory visibility across multiple warehouses and improving supply chain efficiency.
- Enhanced database performance through query optimization and indexing, cutting report generation time by 40% and accelerating data-driven decisions.
- Developed automated Tableau dashboards to track inventory, reducing excess stock by 22% and cutting order delays by 30% through improved visibility.

Education

---

Master’s in Business Analytics and Information Systems

May 2025

University of South Florida, Tampa
