CAREER OBJECTIVE:

Seeking a challenging career in an organization that promotes growth, stability and opportunity for advancement in the field of Pharmacovigilance.

JOB SUMMARY:

- 4 years of experience as a Drug Safety Associate at Cognizant Technology Solutions with expertise in managing Individual Case Safety Reports (ICSRs) of various case types such as spontaneous, patient-oriented, health authority (HA), E2B HA, and non-interventional studies (NIS).
- Proficient in end-to-end case processing including book-in, duplicate search, data entry, MedDRA coding, WHODD coding, case summary writing, causality assessment, and data validation.
- Experienced in triaging ICSRs to assess expedited reporting requirements and determining submission timelines to global regulatory authorities.
- Skilled in registration and entry of ICSRs into safety databases with accurate assessment of expectedness against labeling documents like CDS, CDPI, USPI, and IB.
- Trained in MedDRA coding in alignment with “MedDRA Term Selection: Points to Consider,” ensuring consistency with reference safety information and client data entry conventions.
- Maintained strong working knowledge of assigned drugs’ adverse event safety profiles and international pharmacovigilance regulations, including ICH guidelines, FDA, CIOMS, and EU PV legislation.
- Consistently ensured data quality by performing thorough cross-checks and validation against source documentation.
- Responded promptly to client queries, maintaining professional communication and compliance with defined service-level timelines.
- Achieved high quality metrics and compliance levels as per client and regulatory requirements, ensuring patient safety and regulatory adherence.
- Carried out demerging activities, ensuring data integrity and regulatory compliance by:

Reviewing original and follow-up source documents. Identifying discrepancies such as patient age, reporter details, or event timelines. Evaluating merging rationale and executing demerging workflows in safety databases (e.g., Argus). Updating narratives, MedDRA coding, and documenting regulatory implications. Performing quality checks and re-submitting separated cases to authorities.

- Ensured high data accuracy and compliance by validating against source documentation and client requirements.
- Responded effectively to client queries while achieving quality metrics and service level agreements consistently.

PROFESSIONAL EXPERIENCE:

Junior Data Analyst (Pharmacovigilance Associate)

Cognizant Technology Solutions

Feb 2021- Present

- Worked as Drug Safety Associate in Cognizant technology solutions with 4 years of experience in management of Individual Case Safety Reports (ICSRs) of all case types like (spontaneous, patient oriented, HA cases, E2B Ha cases and NIS) which include book in, duplicate search, data entry, MedDRA coding, WHODD coding and data validation of ICSRs. Familiar with international drug safety regulations (including ICH guidelines on safety and efficacy, US FDA guidelines, CIOMS, New EU PV legislation).
- Manage Individual Case Safety Reports (ICSRs) of various case types including spontaneous, patient-oriented, health authority (HA), E2B HA, and non-interventional studies (NIS).
- Perform complete case handling activities including book-in, duplicate search, data entry, MedDRA coding, WHODD coding, case summary writing, causality assessment, and data validation of ICSRs.
- Conduct triage of ICSRs to determine expedited reporting requirements and ensure submissions within mandated regulatory timelines.
- Register ICSR cases accurately into the safety database and maintain compliance with reporting conventions.
- Assess expectedness of adverse events against multiple reference documents such as CDS, CDPI, USPI, and IB to determine regulatory reporting requirements.
- Write concise and medically relevant case narratives for clarity and regulatory compliance.
- Perform cross-checking and data validation against source documentation to ensure completeness, accuracy, and quality.
- Apply MedDRA coding in accordance with "MedDRA Term Selection: Points to Consider" to ensure consistent and precise coding.
- Maintain strong knowledge of adverse event safety profiles, Reference Safety Information (RSI) documents, client procedures, labeling conventions, and international drug safety regulations (ICH, FDA, CIOMS, EU PV).
- Engage in timely client and customer communication, ensuring queries and requests are addressed within service-level expectations.
- Achieve and sustain quality metrics defined by clients, ensuring high compliance with pharmacovigilance standards and patient safety obligations.

ACADEMIC PROJECTS:

Formulation and Evaluation of Candesartan Niosomal Formulation | Review on Niosomes | Phytochemical Screening and Antimicrobial Activity of *Jasminum sambac* | Industrial Training: Aurobindo Pharma Ltd.

TECHNICAL SKILLS:

Adverse Event Case Processing (ICSRs) | MedDRA & WHO Drug Coding | Safety Databases: Oracle Argus, ARISg | Regulatory Reporting (E2B, FDA, EMA, MHRA) | Narrative Writing & Quality Review | Literature Screening.

REGULATORY KNOWLEDGE:

Good Pharmacovigilance Practices (GVP) | ICH Guidelines (E2E, E2B) | Data Privacy (GDPR Compliance)
