PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with 2+ years of experience in SQL, Python, and PySpark, specializing in building scalable ETL pipelines, log analysis, and anomaly detection for large-scale datasets. Skilled in transforming complex datasets into actionable insights, automating workflows, and applying ML techniques for predictive analytics.

WORK EXPERIENCE

Wipro LTD.

September 2020 - April 2023

Data Analyst

Chennai, India

- Applied time series forecasting techniques to analyze sales trends and seasonality, generating predictive insights that improved strategic planning and accuracy by 15%.
- Conducted in-depth analysis on sales data to uncover key trends and maintained monthly KPIs using Power BI dashboards, which enabled real time decision making.
- Developed Python scripts to automate data pipelines in Azure which reduced manual effort by 70% and streamlining recurring maintenance activities.
- Automated data quality checks cutting data load errors by 30%, accelerating root cause analysis.
- Designed and optimized ETL pipelines in Databricks using Pyspark to process large scale metadata, producing consistent, analytics ready datasets that improved BI reporting reliability.
- Collaborated with Business Analysts to design impactful Power BI dashboards and ran A/B experiments on layout variations, delivering insights that improved stakeholder engagement and decision-making.
- Engineered SQL and HQL scripts in Hive and Vertica, improving process efficiency and reducing runtime by 20%.
- Performed log analysis for Hive and Vertica jobs by reviewing execution logs, identifying query/script failures, and re-running corrected HQL/SQL scripts to ensure successful ETL workflows and reliable reporting.
- Optimized MySQL queries to resolve production issues and enhance system stability, reducing query runtime and ensuring reliable operations.

PROJECTS

Disaster Tweets: Built a transformer model to classify whether a tweet is about a real disaster or not. April 2025

Tools: [Python, Pandas, Hugging Face, PyTorch, Transformers]

- Built a deep learning NLP classifier by fine tuning Microsoft's DeBERTa-v3-small transformer on Kaggle's disaster tweet dataset, achieving an F1 score of 82.3% using a keyword+text input strategy.
- Applied class-weighted loss with Hugging Face's Trainer, improving model robustness on mildly imbalanced data

PCOS Prediction: Built a classification model to predict Polycystic Ovary Syndrome

February 2025

Tools: [Scikit-learn, XGBoost, Gradient Boosting, CatBoost, Voting Classifier, SMOTE, Streamlit, Probabilistic Modeling]

- Engineered an end-to-end machine learning pipeline: performed EDA, addressed missing data, balanced classes using SMOTE, and evaluated multiple ensemble models, achieving 80% ROC-AUC.
- Deployed the final model via a Streamlit interface, enabling real-time, probability-based predictions from raw user inputs using a serialized preprocessing and classification pipeline.

Stock Forecasting : Predicted Amazon stock prices using historical data with various models.

November 2024

Tools: [Python, Plotly, ARIMA, SARIMA, Prophet]

- Cleaned and visualized Amazon's historical stock data to understand trends, seasonality, and noise.
- Built and evaluated ARIMA, SARIMA, and Prophet models; achieved RMSE of 20 using Prophet and visualized forecast results for model comparison.

SKILLS

- **Querying & Programming Languages:** SQL, MySQL, HQL, Python(Pandas, NumPy, Seaborn, Matplotlib)
- **Data Visualization and BI Tools:** PowerBI, Tableau, Excel, Powerpoint
- **Big Data & Workflow Tools:** Hive, Vertica, Databricks, Azure Data Pipelines, PySpark, Git (GitHub)
- **Analytics & Statistics:** Time Series Forecasting, Hypothesis Testing, Regression Analysis, Statistical Analysis (t-test, z-test, Chi-square, ANOVA)
- **Data Science:** Data Preprocessing, Handling Missing Values, Feature Engineering, Data Analysis, Predictive Analytics (Classification and Regression)

EDUCATION

McCombs School of Business, The University of Texas at Austin

Aug 2023 - April 2024

Post Graduate Program in Data Science and Business Analytics

Online - Powered by Great Learning

- GPA: 4.28/4.33

SRM Institute of Science and Technology

July 2016 - June 2020

Bachelor of Technology in Electronics and Communication

Chennai, India

- GPA: 3.2/4.0
