SUMMARY

Java Backend specialist with 4 years of experience in creating scalable and high-performance enterprise applications. Expert user of Spring Boot, Hibernate, and RESTful API design with a strong foundation in microservices architecture. Demonstrated success optimizing system performance and ensuring code quality through rigorous testing and CI/CD implementation. Adept at database management across MySQL, Oracle and PostgreSQL environments. Dedicated to improving engineering outcomes through collaborative development practices, thorough documentation, and adherence to industry best practices. Brings strong analytical skills, technical problem-solving abilities, and expertise in building resilient, highly available systems.

EXPERIENCE

Global Logic India Private Limited
Software Engineer

Bangaluru, India
Jul 2022-Nov 2023

- Designed and deployed scalable microservices architectures using Spring Boot, Spring MVC, and Spring Security, with expertise in RESTful API development and cloud deployments on AWS and GCP platforms.
- Developed end-to-end enterprise solutions integrating backend technologies (Java, Spring Framework, Hibernate) with frontend frameworks (Angular, React), complemented by robust database management using Oracle, MySQL, and NoSQL solutions like Cassandra.
- Specialized in cloud infrastructure management, containerization with Docker, and orchestration using Kubernetes, while deploying continuous integration and deployment (CI/CD) pipelines with Jenkins and advanced deployment strategies on AWS EC2.
- Leveraged advanced Java technologies to build high-performance, secure applications, implementing OAuth 2.0 authentication, multi-threading, and comprehensive testing methodologies using JUnit and Mockito to ensure system reliability and scalability.

Cognizant Technology Solutions
Programmer Analyst

Chennai, India
Mar 2021- Jul 2022

- Developed and maintained multi-tier Java web applications using Spring Boot and J2EE frameworks, ensuring security, availability and performance.
- Designed RESTful APIs within a service-oriented architecture (SOA), leveraging J2EE libraries and frameworks to facilitate seamless communication and between distributed systems.
- Deployed and managed applications on JBoss and IBM WebSphere application servers, ensuring system stability across multiple environments.
- Optimized database performance and administration by working with SQL Server and DB2, streamlined backend service management using SQL Server Management Studio.
- Applied MVC design patterns and Object-Oriented Programming (OOP) principles to build scalable and maintainable systems, enhancing flexibility and code maintainability.
- Implemented automated testing using JUnit and Mockito, improving test coverage and ensuring high software quality.

Avon Technologies India Private Limited
Programmer Analyst Trainee

Hyderabad, India
Jan 2020 - Feb 2021

- Designed and developed comprehensive Spring Boot applications, creating robust backend services leveraging Java, Spring, Hibernate, HTML5, and CSS3
- Implemented secure user authentication mechanisms using MySQL with advanced access control strategies
- Engineered application architectures utilizing dependency injection through Spring services, controllers, and Data Access Objects (DAOs)
- Managed complete Software Development Life Cycle (SDLC) phases, encompassing design, installation, integration, and testing
- Constructed applications using Struts, Java Beans, and Servlets to facilitate seamless user interface interactions
- Implemented Data Access Object (DAO) pattern for efficient data management and abstraction

EDUCATION

Eastern Illinois University (Master of Science in Computer System Technology)
GPA: 3.9/4.0

Charleston, Illinois.
Jan 2024 - May 2025

Ace Engineering College (Bachelor of Engineering in Electronic and Communication Engineering)
CGPA: 6.75 / 10.0

Hyderabad, India.
Aug 2016- May 2020

TECHNICAL SKILLS

- **Programming Languages:** Java, Python.
- **Databases :** MySQL, Oracle 11g, PostgreSQL, Cassandra, SQL Server.
- **Cloud:** GCP, AWS.
- **Tools/ Frameworks:** Spring Boot, Spring MVC, Hibernate, Struts, Java Beans, Jenkins, Maven, ANT, Junit, Postman, JIRA, SQL Server Management Studio, Docker, Kubernetes.
- **Architectural Patterns:** Microservices Architecture, Service-Oriented Architecture (SOA), Model-View-Controller (MVC), Data Access Object (DAO) Pattern, Dependency Injection.
- **Security:** OAuth 2.0, Spring Security.
- **Application Servers:** JBoss, IBM WebSphere.

ACADEMIC PROJECTS

Banking Application System | Independent Project:

Objective: Develop a scalable banking system application that streamlines customer interactions and reduces physical bank visits through advanced digital service integration. (Technologies: Java, spring Boot, Hibernate, swagger UI, MySQL, RESTful API, gRPC,GCP)

- Designed and implemented a comprehensive backend banking application using gRPC framework, enabling seamless customer registration and appointment booking functionalities.
- Developed robust microservices to facilitate efficient customer interactions, reducing manual processing and enhancing digital banking experience.
- Implemented secure authentication and service communication protocols using gRPC, ensuring high-performance and secure data transmission.
- Deployed the application on Google Cloud Platform, achieving full functionality without downtime.

Event Management System | Eastern Illinois University, Charleston:

Objective: Develop a comprehensive web-based event management system that automates event planning, attendee management, and administrative processes using modern Java technologies. (Technologies: Java, spring Boot, Hibernate, MySQL, RESTful API, HTML5/CSS3, Bootstrap)

- Designed and implemented a full-featured event management web application using Spring Boot, creating a robust solution for end-to-end event planning and management.
- Created a comprehensive database schema using Hibernate and MySQL to efficiently manage event data, user profiles, and transactional information.
- Implemented secure user authentication and role-based access controls to ensure data privacy and system security.

CERTIFICATIONS

- Google Associate Cloud Engineer (GCP).
- Microsoft Technology Associate (MTA 98-381) Introduction to Programming using Python.
