## SUMMARY

---

Results-driven Software Development Engineer with 3+ years of experience building large-scale distributed systems and cloud-native applications serving millions of users worldwide. Deep expertise in Python, Java, AWS cloud architecture, microservices design, and system scalability. Demonstrated ability to deliver customer-obsessed solutions that consistently improve system performance by 20-30

## TECHNICAL SKILLS

---

**Programming Languages:** Python, Java, SQL, JavaScript, TypeScript, Shell Scripting, C++, Go

**Amazon Web Services:** EC2, S3, Lambda, ECS, EKS, RDS, Redshift, Kinesis, DynamoDB, CloudFormation, API Gateway, SQS, SNS, CloudWatch, CloudTrail, IAM, VPC, Route 53, ElastiCache, Elastic Beanstalk

**Frameworks & Libraries:** FastAPI, Flask, Django, Spring Boot, Express.js, LangChain, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, REST APIs, GraphQL, Microservices Architecture

**Data Engineering & Storage:** PostgreSQL, MySQL, MongoDB, BigQuery, Snowflake, Neo4j, Redis, Cassandra, Apache Spark, PySpark, Apache Airflow, Apache Kafka, Apache NiFi, Elasticsearch, ETL/ELT Pipelines

**DevOps & Infrastructure:** Docker, Kubernetes, Jenkins, GitLab CI/CD, GitHub Actions, Terraform, Ansible, Helm, Prometheus, Grafana, ELK Stack, Infrastructure as Code, Blue-Green Deployment

## EDUCATION

---

**Saint Louis University** – St. Louis, MO | Master of Science in Analytics | GPA: 3.85/4.0

## PROFESSIONAL EXPERIENCE

---

**Data Engineer - Software Development | State Farm**

January 2024 – Present

- Architected and optimized high-throughput ETL data pipelines using PySpark, Apache NiFi, and Airflow, processing 50M+ transactional records daily with 99.9% uptime, zero data loss, and full audit trail capabilities
- Built production-grade RESTful APIs and microservices architecture with Python/FastAPI serving 10K+ requests/minute with sub-100ms p95 latency, connecting multiple data sources including Amazon Redshift and Google BigQuery
- Delivered measurable business impact by improving overall data processing performance by 20% through advanced optimization techniques, parallel processing strategies, and efficient resource utilization across distributed AWS cloud infrastructure
- Designed and deployed fault-tolerant, auto-scaling microservices architecture on AWS using Lambda functions, ECS containers, Application Load Balancer, and Auto Scaling Groups to reliably handle peak loads of 50K+ concurrent users
- Implemented comprehensive observability and monitoring systems using Amazon CloudWatch, custom application metrics, and real-time dashboards, reducing mean time to detection by 60% and mean time to recovery by 45%
- Collaborated with cross-functional teams of 15+ engineers, data scientists, and product managers on system architecture decisions, technical design reviews, and establishing CI/CD best practices using Jenkins and GitLab pipelines
- Ensured enterprise-level GDPR and HIPAA compliance through end-to-end data encryption at rest and in transit, fine-grained access controls, comprehensive audit logging, and regular security assessments

- Mentored and coached 3 junior developers on software engineering principles, AWS cloud best practices, agile development methodologies, and code quality standards, resulting in 40% faster onboarding
- Led technical debt reduction initiatives, successfully refactoring legacy monolithic systems to modern cloud-native microservices architectures, resulting in 25% improvement in system maintainability and developer productivity

#### **Data Analyst / Software Developer | S&P Global**

May 2021 – June 2023

- Engineered distributed data pipelines in Python/SQL handling 10M+ daily records with automated error recovery
- Developed ML models (Random Forest, K-means, Regression) for customer segmentation, improving marketing precision by 25%
- Created interactive BI dashboards in Tableau/Power BI integrating 15+ data sources, serving 200+ users
- Optimized database queries and pipelines, reducing processing time by 30% and storage costs by 15%
- Implemented CI/CD pipelines with Docker/Kubernetes, reducing deployment time by 50%
- Led data quality initiatives achieving 99.5% accuracy across critical business metrics

#### **Teaching Assistant | Smart Interviews**

September 2022 – January 2023

- Mentored 50+ students in algorithms, data structures, and system design for FAANG interview preparation
- Conducted technical mock interviews with detailed feedback on coding efficiency and problem-solving

### **KEY PROJECTS**

---

#### **Graph-CoT: Cognitive RAG on Knowledge Graphs**

May 2024

- Built distributed multi-hop reasoning system using Python, Neo4j, improving retrieval accuracy by 30%
- Designed scalable FastAPI endpoints handling 1K+ concurrent requests with 300ms response time
- Deployed on AWS using ECS, ALB, and RDS for high availability and auto-scaling

#### **Intelligent Customer Service AI Agent**

January 2024

- Developed autonomous agent using LangChain, GPT-4, ChromaDB processing 5K+ daily queries
- Architected serverless AWS solution (Lambda, S3, Lex, Polly) reducing infrastructure costs by 40%
- Achieved 70% latency reduction and 85% customer satisfaction through intelligent routing

#### **Real-time Marketing Analytics Platform**

October 2023

- Built ETL platform processing Google Analytics/CRM data using Python, SQL, Kafka
- Developed real-time dashboards serving 25+ users, increasing conversion rates by 18%
- Deployed on AWS (Redshift, Kinesis, CloudWatch) with auto-scaling for traffic spikes

### **CERTIFICATIONS**

---

**Cloud & Architecture:** AWS Certified Solutions Architect – Professional, AWS Certified Machine Learning – Specialty, AWS Certified Developer – Associate

**AI & Data Science:** Azure AI Engineer Associate, Azure Data Scientist Associate, Google Cloud Professional Machine Learning Engineer, TensorFlow Developer Certificate

**DevOps & Infrastructure:** Certified Kubernetes Application Developer (CKAD), Docker Certified Associate, Terraform Associate

**Specialized Skills:** LangChain for LLM Development, Anaplan Level 1 & 2 Model Builder
