🌐 Sun Dimitri NFANDA

SUMMARY

- Seasoned SQL & .NET Developer with a proven track record in the higher education sector.
- Holds a Bachelor's Degree in Computer Science from Kennesaw State University.
- Skilled in a variety of programming languages and technologies, including Java, MySQL, Oracle, and .NET, with a strong capacity for developing, debugging, and enhancing software applications.
- Known for a disciplined work ethic, exceptional critical thinking, communication, and problem-solving competencies.

EDUCATION

Kennesaw State University, *Bachelor of Science (Complete)* ⓘ Jan 2021 – Dec 2021 | Kennesaw, GA, USA
Bachelor of Science in Computer Science.

PKFokam Institute of Excellence, Jan 2018 – Dec 2020 | Yaoundé, Cameroon
Bachelor of Science (Partial) ⓘ
Bachelor of Science in Computer Science - I had to do 3 years here then complete the 4th at the Kennesaw State University.

PROFESSIONAL EXPERIENCE

State of Georgia DOR, *Oracle SQL|.NET Developer* ⓘ Oct 2022 – present | Atlanta, GA, USA

- Design, code, test, modify, install, and debug software applications that integrate with Visual Studio Code, Oracle Database, and .NET related applications.
- Research and analyze system problems, create solutions, and develop program documentation.
- Translate business requirements into development tasks for secure and maintainable code.
- Modify and create PL/SQL and SQL queries in both Oracle and SQL server databases.
- Perform daily job functions to ensure complete processing of taxpayer documents including the mitigation of processing errors.
- Investigate and develop skills in new technologies.

Summitworks Technologies Inc., *SQL|.NET Developer* ⓘ Mar 2022 – Sep 2022
South Plainfield, NJ, USA

- Optimized RDBMS by normalizing tables, indexing tables, using views, foreign keys, joins, triggers, and stored procedures and secured Databases by using Prepared Statements.
- Used Entity Framework to map model classes in C# to MySQL Tables.

- Created Models in C# using concepts of OOP: Encapsulation, Inheritance, Abstraction, and Polymorphism.
- Involved in all phases of the Software Development Life Cycle process (SDLC): Gathering Needs, Design, Development, Testing, Documentation, and Deployment.

LANGUAGES

French

English

TOEFL

VOLUNTEERSHIP

Up Cancer, Software Engineer Intern 

Aug 2021 – Dec 2021 | Moodus, CT, USA

Team Up Cancer is an organization led and founded by Rico Dence, a Chronic Myeloid Leukemia survivor, whose goal is to advance cancer treatments available to patients by changing government legislation.

- I contributed to the creation of a Customer Relationship Management(CRM) that will help educate, engage, and empower those affected by young adult cancer. This was done by planning, developing, and writing code for computer programming.
- I wrote clear and concise code for use in projects.
- I created new and innovative integrated content management systems using the Java programming language.

PROJECTS

Student-Grade Management System,

2020 – 2020

SQL Database | Java Developer

Made use of Java programming language & SSMS to create - from scratch - a full application that manages a school's students, their grades, displays their GPAs, and more.

- Improved in-application SQL statements' stability, reliability, and performance by 30% while creating databases that were user-centered.
- Optimized RDBMS with the use of views, foreign keys, joins, triggers, and stored procedures; also, secured databases using prepared statements.
- Acquired business expertise while describing the models to application teams and fixing model/data-related issues.
- Made use of Java™ Database Connectivity (JDBC) to allow the Java program to access the Database Management Systems (DBMS).

Banking Management System, SQL Database | Java Developer

2019 – 2019

Made use of Java programming language & SSMS to create - from scratch - a full application that manages a bank's clients, their account, bank transfers, and more.

- In a team with over 3 SQL & Java Developers, we designed four or more on-site databases while retaining a group of 25 databases, which led to a 10% reduction in production expenses and an increase in departmental productivity overall.
- Came up with improvements to the database layer in collaboration with the application developer and strive to implement them in the subsequent releases.
- Developed database and application standards and design to help ensure program performance, scalability, and maintainability.
- Used Java OOP ideas to specify how to organize my Java program effectively, which improved the readability and reuse of my code.

Bus Management System, SQL Database | Java Developer

2018 – 2018

Made use of Java programming language & SSMS to create - from scratch - a full application that manages an interurban transportation business' buses, trips, passengers, and more.

- Worked on creating conceptual, logical, and physical data model designs with the right structure and relationships at the early phases of the software lifecycle to profile data and get the best performance.
- Performed database defragmentation and optimized all SQL queries, which resulted in a 15% increase in database performance and loading time.
- Created and managed sophisticated views, functions, and stored procedures for relational databases.
- Designed completely automated client administration systems using Java to effectively maintain client accounts.
