

Professional Summary

Results-driven Data Engineer with experience in designing scalable ETL pipelines, automating reporting workflows, and building cross-functional dashboards that have directly contributed to multimillion-dollar inventory reductions. Skilled in Python, SQL, Azure, and Airflow, with a proven track record of eliminating manual processes, processing GBs of data per cycle, and enabling real-time decision-making for global teams.

Professional Experience

Data Engineer | K P Sanghvi Inc. | New York, USA | May 2023 - Present

Automated weekly reporting for 200+ vendors by replacing Excel workflows with Python and SQL, cutting reporting time by 90% saving 12+ hours every week and eliminating 100% of manual effort. • Migrated 10+ years of ERP data to Azure SQL, building scalable ETL pipelines in Azure Databricks processing 3M+ records every day, enabling seamless data access across teams. • Integrated Azure SQL outputs with Airtable APIs, eliminating redundant file transfers and creating seamless access to live data across departments. • Built Power BI dashboards used by 17-18 internal stakeholders (sales reps, executives, cross-border teams), accelerating inventory decisions and contributing to monthly liquidation of \$6-7M in stagnant stock. • Built a monitoring framework using Airflow, AWS Lambda, and S3, cutting pipeline failure detection time from hours to under 5 minutes, boosting operational confidence.

Data Analyst | Blitz Jobs Private Limited | Bangalore, India | May 2020 - Nov 2020

Created Power BI dashboards analyzing user and employer engagement; led to a 35% faster decision cycle for leadership via actionable insights. • Improved application-to-hire ratio by 20% through funnel analysis and A/B testing on job recommendation strategies. • Automated ETL tasks with Python (Pandas, NumPy), reducing manual data prep time by 40%, standardizing data pipelines. • Conducted segmentation analysis to identify top-performing employers and job seekers, improving retention rates and marketing ROI.

Junior Data Analyst | Om Synthetics | Gujarat, India | Jan 2017 - Dec 2019

Analyzed inventory across four warehouses to support demand forecasting, reducing stockouts by 28% and improving on-time product availability. • Built Excel and Power BI dashboards for SKU performance and supplier lead times, cutting procurement delays by 15%. • Detected and visualized production defect patterns, leading to a 12% drop-in product return rates over 12 months.

Personal Project

Uber Data Engineering ETL Pipeline | *GitHub*: github.com/SunGajiwala/uber-data-engineering-etl-pipeline

Designed and implemented an end-to-end ETL pipeline to process Uber ride data with a focus on scalability and modularity. • Ingested raw CSV files using Python and automated data extraction with Apache Airflow DAGs. • Transformed and cleaned data with pandas, filtering anomalies and enriching metrics. • Loaded data into PostgreSQL for structured querying and analysis. • Containerized the pipeline using Docker for reproducibility. • Implemented data quality checks and logging. • Visualized key metrics using Power BI, highlighting demand trends and geospatial insights.

Technical Skills

Languages: Python, SQL | **Cloud & Data Platforms:** Azure (Data Factory, Databricks, Synapse), AWS (S3, Lambda), Airtable, Azure DevOps | **Data Engineering:** ETL pipelines, Airflow, Data Modeling, Delta Lake, Query Optimization, Data Warehousing (Star/Snowflake) | **Tools:** GitHub Actions, Azure Git, JIRA | **Methodologies:** CI/CD, SDLC, Agile, Data Governance | **Visualization:** Power BI, Tableau | **Formats:** Parquet, JSON, CSV

Education

University of New Haven Connecticut, USA | Aug 2021 - May 2023

Master of Science in Data Science

University of Petroleum and Energy Studies Dehradun, India | Aug 2017 - May 2021

B.Tech in Computer Science Engineering (Business Analytics & Optimization)
