SUMMARY.

Over 3 years of experience as a Data Engineer specializing in building robust data pipelines and ETL processes, with proven expertise in SQL, AWS Cloud, and Big Data technologies. Experienced in integrating data across systems, ensuring quality, security, and governance to support AI initiatives. Demonstrated ability to collaborate with IT and business teams to optimize data flows and drive decision-making.

EDUCATION

Sacredheart University, Connecticut, Usa

Jan 2024 - May 2025

Master of Science, Business Analytics

• **GPA:** 3.5/4

Ethames Business School, Hyderabad, India

Jun 2019 - May 2022

Bachelor of Business Administration

• **GPA:** 3.8/4

EXPERIENCE

New Zen Infotech

Oct 2021 - Oct 2023

Data Engineer

India

- Conducted requirement analysis, development, testing, and deployment of batch and stream data ingestion pipelines, aligning with robust ETL process best practices.
- Managed data storage, warehousing, instance, and security on the AWS Cloud Platform, ensuring adherence to data governance and security principles.
- Designed data ingestion frameworks that consumed Kafka messages and integrated with internal APIs to maintain seamless data flows.
- Developed event-stream and trigger-based ingestion frameworks using AWS Lambda and Step Functions to support real-time data integration.
- Constructed data ingestion pipelines from legacy systems (iSeries, Oracle, SQL Server) using Hadoop and Sqoop on EMR, enhancing big data processing.
- Orchestrated data workflows with Airflow DAGs, Glue Jobs, Ctrl-M, and Cron-job scheduling to automate and streamline ETL processes.
- Integrated Salesforce for data import/export operations using Python, reinforcing comprehensive data integration capabilities.
- Executed SQL scripts for full load, truncate load, and deduplication to establish Staging, Fact, and Dimension tables on Redshift.
- Optimized storage and processing by leveraging file formats like Parquet, JSON, and CSV based on data needs.
- Automated production job execution using Jenkins on AWS EC2, supporting continuous integration and deployment.
- Utilized GitHub and Bitbucket for version control and efficient code collaboration in managing code repositories.
- Diagnosed and resolved complex production issues using advanced troubleshooting techniques to maintain pipeline stability.
- Migrated data from multiple sources into Redshift and HDFS using PySpark-based pipelines, enhancing overall system integration.

INC– Digital Dad

Sep 2020 - Feb 2021

Jr Data Engineer

India

- Developed an automated platform for data validation and report generation for medical claims and approvals, emphasizing rigorous data governance.
- Built data pipelines using Spark and Hive to ingest, format, and analyze health insurance authorizations, streamlining ETL processes.
- Configured Cloud Functions to trigger upon file drops in Cloud Storage, enabling DataProc servers to generate automated reports.
- Collaborated with Gaia Smart Cities to implement data integration solutions for smart technology in public spaces.
- Trained object detection models with 90% precision on embedded edge devices, incorporating AI/ML concepts to support decision-making.
- Preprocessed sensor wave data using normalization, resampling, and transformation techniques to prepare data for CNN model training.
- Implemented machine learning workflows to predict telecom customer behavior, leveraging data analytics and SQL for actionable insights.
- Developed interactive dashboards and dynamic visualizations in Tableau, utilizing SQL queries to uncover telecom data trends.
- Managed Sqoop jobs to transfer data from RDBMS and external systems into HDFS and Hive, reinforcing efficient data integration practices.

SKILLS

- **Programming Languages:** Python, SQL, R, Scala
- **Statistical Methods:** Hypothesis Testing, A/B Testing, PCA, Dimensionality Reduction, Cross-Validation
- **Database Management:** MySQL, DynamoDB, RDS
- **DevOps & OS:** Linux, Git, Docker, CI/CD

- **Cloud & Big Data:** AWS (S3, Redshift, EMR, Data Analytics Snowflake), Data Pipelines, Spark, Hadoop, Hive, Jupyter
- **ETL & Data Engineering:** Data Modeling, ETL tools, Github, Informatica, SSIS, DataStage
- **Data Analytics:** Tableau, Power BI, Matplotlib
- **Machine Learning:** Regression, Classification, Clustering, XGBoost, GBM, Feature Engineering
- **Deep Learning & NLP:** Deep Learning & Neural Networks, TensorFlow, PyTorch, NLP, Sentiment Analysis
