

Sunil Chinthaparthi

(201) 304-7899 | Manhattan, Jersey City, NJ | sunilc.codes@gmail.com [Linkedin](#)
Python Developer | AWS | Flask | FastAPI | Microservices | CI/CD | Cloud Automation

SUMMARY

Experienced Python Developer with 5+ years of hands-on experience designing, developing, and deploying cloud-native, event-driven, and microservice-based applications on AWS. Skilled in building asynchronous REST APIs using FastAPI and Flask, developing data pipelines with Pandas, Airflow, and Glue, and deploying containerized workloads via Docker and EKS. Proficient in CI/CD automation (Jenkins, GitHub Actions, CodePipeline) and secure infrastructure provisioning using Terraform, CloudFormation, and AWS IAM. Passionate about writing clean, scalable code, optimizing system performance, and enabling data-driven automation in Agile environments.

SKILLS

- **Programming & Frameworks:** Python 3.10+ | Flask | FastAPI | Django (Basic) | REST APIs | Asynchronous Programming | asyncio | aiohttp | Celery | SQLAlchemy | Pandas | NumPy
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, ECS, ECR, EKS, Glue, Step Functions, Secrets Manager, CloudFormation, CodePipeline, CodeBuild, IAM, CloudWatch) | Docker | Kubernetes | Terraform | Jenkins | GitHub Actions | Infrastructure as Code | CI/CD Automation
- **Data Engineering & Messaging:** PostgreSQL | MySQL | MongoDB | Redis | Kafka | Apache Airflow | AWS Glue | boto3 | AWS EMR
- **Testing, Security & Monitoring:** pytest | unittest | Coverage.py | Black | Pylint | Bandit | CodeQL | Postman | Swagger / OpenAPI | ELK Stack (Elasticsearch, Logstash, Kibana) | Prometheus | Grafana | Sentry
- **Frontend (as used in projects):** React.js | HTML5 | CSS3 | JavaScript (ES6+)
- **Collaboration & Tools:** Git | Jira | Confluence | SonarQube | Agile/Scrum | VS Code | IntelliJ IDEA

EXPERIENCE

Best Buy – USA

May 2024 – Current

Python Developer

- Developed asynchronous FastAPI microservices to handle concurrent API requests, reducing latency by 35%.
- Built data ingestion and transformation pipelines using Pandas, SQLAlchemy, and AWS Glue, automating analytics reporting.
- Implemented event-driven serverless workflows using AWS Lambda, Step Functions, and SNS/SQS, enabling real-time order tracking.
- Automated CI/CD pipelines with GitHub Actions, Jenkins, and AWS CodePipeline, integrating static checks (Black, Pylint, Bandit) and coverage metrics (Coverage.py).
- Deployed containerized workloads to AWS ECR and EKS clusters, monitoring via CloudWatch, Prometheus, and Grafana.
- Managed Secrets and IAM Roles using AWS Secrets Manager and CloudFormation templates, ensuring secure and consistent infrastructure deployment.
- Designed APIs following OpenAPI 3.0 / Swagger standards and published Postman Collections for cross-team integration.
- Collaborated with front-end React teams and DevOps engineers to deliver scalable, secure, and production-ready features.

Flipkart – IND

Jan 2020 – Dec 2022

Full Stack Software Developer

- Migrated monolithic services to Python Flask microservices, reducing system response times by 25%.
- Created RESTful APIs integrated with PostgreSQL using SQLAlchemy ORM, optimizing query performance and data indexing.
- Developed background jobs using Celery + Redis, automating order notifications and data sync tasks.
- Built ETL workflows using Apache Airflow and AWS Glue to process business intelligence data.
- Automated infrastructure deployments using AWS CloudFormation and Terraform, reducing setup times by 40%.
- Implemented secure coding practices and automated scans via CodeQL and SonarQube during CI/CD stages.
- Integrated Kafka for distributed event streaming to synchronize order and inventory modules.
- Monitored production health using ELK Stack and AWS CloudWatch Dashboards, improving system uptime by 20%.

EDUCATION/ CERTIFICATIONS

- Master's in Computer Science from Pace University, NYC, NY
- AWS Certified Associate Developer

PROJECTS

- **Customer Insights API – Best Buy:** Developed FastAPI microservice with async endpoints for real-time customer analytics using Pandas and Redis caching. Deployed via AWS ECS, automated CI/CD with CodePipeline, and tracked metrics through Prometheus + Grafana.
- **Order Fulfillment Engine – Flipkart:** Flask-based backend integrated with AWS Lambda and Kafka for event-driven order processing. Implemented CloudFormation templates for infrastructure-as-code and Secrets Manager for credential encryption.
