Professional Summary

Results-driven Software Developer with expertise in Python, SQL and specializing in designing and developing efficient, high-performance applications. Adopt at analyzing complex problems, optimizing solutions, and making data-driven decisions. I have contributed to full stack solutions using technologies such as .NET, Python, C, React, Node.js, JavaScript, HTML, CSS. Especially drawn the roles involving cloud computing, back-end APIs, and full-stack architecture. Passionate about staying ahead of emerging technologies and implementing innovative solutions to enhance software functionality. Recognized for being hardworking, detail-oriented, and disciplined, with a strong commitment to delivering high-quality code and meeting project deadlines.

Skills

- **Programming Languages:** Python, JavaScript, C, C#, R
- **Tools:** PowerBI, Tableau, Postman, Jupyter Notebook
- **Cloud & Devops:** AWS, Git
- **Web Technologies:** HTML, CSS, PHP, Visualizations, MS office
- **Database:** SQL, MySQL, Mongo DB
- **Frameworks:** PyTorch, TensorFlow, Node.js, React.js, ASP.NET MVC

Experience

Software Engineer Intern, L and T Technology Services – Mysore, India

July 2022 – June 2023

- **Real-Time Sales & Customer Insights Dashboard**

- Developed an ETL pipeline with Python and SQL, automating data collection from multiple sources (CRM, e-commerce).
- Integrated AWS services (Lambda, S3, RDS, QuickSight) for real-time data processing and storage.
- Created machine learning models (Scikit-learn) for sales forecasting and customer churn prediction.
- Implemented customer segmentation with K-Means clustering to optimize marketing campaigns.
- Optimized database queries on AWS RDS for faster data retrieval.
- Developed an alert system with AWS SNS to notify users about sales anomalies.
- Deployed on AWS EC2 with auto-scaling for high availability.

Data Science Intern, Jigya Software Services – Hyderabad, India

Jan 2022 – June 2022

- **Financial Data Analysis and Visualization**

- Analysed large financial datasets to identify key trends, performance metrics, and areas for cost optimization.
- Utilized Python for data cleaning, preprocessing, and performing statistical analysis on financial data
- Leveraged AWS to manage and process financial datasets stored in the cloud, ensuring scalability and efficient data retrieval
- Created interactive dashboards in Power BI to present financial metrics such as revenue, expenses, and profit margins to senior management, improving decision-making processes.
- Developed detailed Excel reports to summarize financial trends, ensuring easy interpretation of complex data for stakeholders.

Education

Sacred Heart University, Master of Science in Computer Engineering and Information Technology

Sept 2023 – Dec 2024

- GPA: 3.777/4.0

Certifications

Huawei - HCIA- Cloud Computing

JPMorgan Chase and Co- Software Engineering

Tessolve- Embedded IoT & Industrial Automation

Projects

ResumeIQ

- ResumeIQ then delivers a comprehensive analysis, evaluating the alignment between the resume's content and the job's requirements.
- Developed ResumeIQ, a tool that identifies missing skills, keyword mismatches, and formatting issues in resumes, improving ATS compatibility and enhancing visibility to hiring managers. Successfully assisted over 500 users, including recent graduates and experienced professionals, in creating customized resumes that increased job interview invitations by 30%.

Smart Employee Management System

- Developed a full-stack application to manage employee records, payroll, and leave requests.
- Designed and implemented SQL database schema for employee details, role-based access, and performance tracking.
- Built REST APIs for employee CRUD operations and integrated with a React-based frontend.
- Deployed application on AWS EC2 with database on AWS RDS for scalability.
- Implemented authentication, data validation, and reporting features using Python and SQL queries.
- Followed Agile methodology and used GitHub for version control and collaboration.

Customer Relationship Management

- Designed and developed a CRM database project to help organizations manage and enhance relationships with current and prospective customers.
- Integrated technology and processes to collect, store, and analyze customer data, enabling businesses to optimize interactions across the customer lifecycle
