## Profile

Results-driven Data Analyst with 4+ years of experience transforming complex datasets into actionable insights across finance, retail, and technology sectors. Skilled in SQL, Python, R, and Java for advanced analytics, and experienced with Power BI and Tableau to deliver interactive dashboards and reports. Proficient in building ETL pipelines (AWS Glue, Lambda), optimizing databases (MS SQL, PostgreSQL, Snowflake, BigQuery, MongoDB), and conducting EDA, risk analysis, cost/benefit studies, A/B testing, and GAP analysis. Adept at driving cloud migration projects (AWS, GCP, Azure) and collaborating in Agile/Scrum environments to support data-backed decision-making for stakeholders and leadership.

## Skills

### Programming & Scripting

Python, R, Java

### Analytics & Reporting

Exploratory Data Analysis (EDA), KPI reporting, A/B testing, Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, Data Profiling

### Cloud Platforms

AWS (EC2, S3, RDS, Glue, Lambda), GCP, Azure

### Databases & Query Languages

SQL (MS SQL Server, MySQL, PostgreSQL, Snowflake, BigQuery, MongoDB, RDBMS)

### Visualization & Reporting Tools

Power BI, Tableau

### Methodologies & Tools

Agile/Scrum, SDLC, Waterfall, UML, Jira, Confluence, CRM, SAP ERP

## Professional Experience

### Data Analyst, IT Pros

01/2024 – Present

- Designed and deployed interactive dashboards in Power BI and Tableau, enabling real-time KPI monitoring and reducing manual reporting efforts.
- Built complex SQL queries and Python scripts for EDA, risk analysis, and diagnostic reporting across diverse data sources.
- Developed automated ETL pipelines using AWS Glue, Lambda, and RDS, ensuring timely, accurate, and scalable reporting processes.
- Partnered with product and marketing teams to run A/B testing, impact analysis, and cost/benefit evaluations, supporting data-driven strategies.
- Conducted GAP analysis during cloud migration projects (AWS, GCP, Azure), ensuring seamless integration with minimal downtime.
- Collaborated with stakeholders and leadership to deliver business reports, UML diagrams, and SDLC documentation for informed decision-making.

### Data Analyst, Smartfox

03/2021 – 12/2023

- Created SQL-based reports and Tableau dashboards for sales and operations teams, improving real-time performance tracking.
- Applied Python and R for predictive modeling, descriptive & diagnostic analytics, and customer behavior analysis to optimize campaign strategies.
- Optimized queries and managed large-scale databases (MS SQL, PostgreSQL, Snowflake, BigQuery, MySQL, MongoDB) for improved processing speed and scalability.
- Performed cost/benefit, risk, and impact analyses to assess new product launches, providing actionable recommendations to stakeholders.
- Supported Agile/Scrum projects by translating requirements into BRD, SRS, and UML documentation.
- Enhanced data quality through profiling, validation checks, and standardized processes, ensuring consistency across reporting platforms.
- Trained cross-functional teams on data visualization best practices in Power BI and Tableau, enabling adoption of self-service analytics.

## Projects

### Sales Forecasting (Python + SQL)

- Analyzed historical sales data from SQL Server using Python to identify daily, weekly, and monthly sales trends.
- Delivered time-based insights with Matplotlib & Seaborn, enabling better planning and inventory management.

### Online Sales Data Visualization (Tableau)

- Built interactive dashboards with symbol maps, heatmaps, and text tables to uncover product, region, and time-based sales patterns.
- Provided actionable insights to support strategic business decisions and optimize marketing efforts.

## Education

Bachelor of Commerce, Krishnadevaraya University

06/2011 – 07/2014
