suprajachi87@gmail.com +1 331 300 9876

PROFESSIONAL SUMMARY:

- **10+ years** of experience in **Data Analysis, & Design, Development, testing and implementation** of projects using **Tableau, SSRS, AWS Glue, Lambda, SSIS, Alteryx, SQL Server, Teradata, Oracle, etc.** in **Retail, Healthcare, Transportation** and Financial industries.
- Extensive experience with Tableau Desktop, Tableau Server and Tableau Public.
- Extensive experience in Tableau Administration adds users, scheduling reports, giving the permissions, Debug when refreshing the data.
- Experience with ETL tools like Alteryx, SSIS to extract, transform and load data.
- Expertise in BI/Data Warehousing concepts, designs, and project implementations.
- Proficient in **Tableau 9.x/10.x/2019.x/2021.x product suite (Desktop, Prep, Server, Public, Reader, Mobile)**.
- Strong understanding of project life cycle and **SDLC** methodologies including **RUP, RAD, Waterfall** and **Agile**.
- Experience in **ODI Designer** for importing tables from database, reverse engineering, to develop projects, and release scenarios.
- Experience in facilitating Joint Requirement Planning (JRP) sessions with Business User Groups, conducting Joint Application Development (JAD) sessions with IT Groups and Conflict Management with Project team members.
- Conducted Gap **Analysis**, created **Use Cases, workflows, screen shots and PowerPoint presentations** for the Web Applications
- Interviewed **SMEs** and **Stakeholders** to get a better understanding of client business processes and gather business requirements.
- Experienced in preparing **Business Process Re-engineering Models**.
- Expertise in Tracking, Documenting, Capturing, Managing and Communicating the **Requirement Traceability Matrix (RTM)** which helped in controlling numerous artifacts produced by the teams across the deliverables for a project.
- Extensive knowledge in various reporting objects like **Facts, Attributes, Hierarchies, Transformations, filters, prompts, Calculated fields, Sets, Groups, Parameters etc.**, in Tableau.
- Worked on the development of **Dashboard** reports for the **Key Performance Indicators** for the top management.
- Extensively used **ODI** to load data from Oracle, XML files and flat files.
- Expertise in Developing User Objects (**filters, prompts, metrics, Sets and Groups, Calculated - Fields**) to develop Documents and reports.
- Proficient in designing Design Documents for loading data into Data Warehouse and Data Mart tables.
- Strong understanding of **Data warehouse** concepts, **ETL, Star Schema, Snowflake, data modeling** experience using **Normalization**, Business Process Analysis, Reengineering, Dimensional Data modeling, FACT and dimensions tables, physical and logical data modeling.
- Experienced in developing rich **Interactive reports** and **dashboards** integrating various reporting components from multiple sources.
- Outstanding knowledge in writing complex **SQL** queries, **Stored procedures**, database tuning, query optimization and resolving key performance issues.
- Experienced in working with **data modelers** to translate business rules/requirements into conceptual/logical dimensional models and worked with complex de-normalized and normalized data models.

with leadership abilities to develop creative solutions for challenging requirements of clients.

TECHNICAL SKILLS

Reporting Tools	Tableau, Power BI, Cognos, MicroStrategy, SSRS
Modeling Tools	Power Designer, Erwin, ER Studio, MS Visio.
Data Integration Tools	SQL Server Integration Tool, SSIS, Alteryx
SQL Tools	Rapid SQL, Toad, Teradata SQL Assistant, PL/SQL Developer
Cloud and RDBMS	AWS (S3, Lambda, Redshift), Snowflake, Teradata, Oracle, SQL Server, DB2, Access
Documentation	Documentum, SharePoint, HP Quality Center
Scripting/Lang.	C, C++, HTML, JavaScript, Python, SQL, PL/SQL, and XML
Scheduling Tools	Autosys, Control M
Operating Systems	UNIX, Linux, Windows 7/XP, Windows 10 Later versions

EDUCATION:

- ❖ **Master of Computer Applications (MCA)** from Osmania University, India, 2010.
- ❖ **Bachelor of Computer Science (BSc)** from Sri Venkateswara University, India, 2007.

PROFESSIONAL EXPERIENCE:

Bank of America

Role: Data Analyst / Tableau Developer

November 2022- till date

Location: Charlotte, NC.

- Designed, developed, tested and maintained Tableau reports based on business requirements.
- Developed Tableau Dashboards connecting from Different DataSource using SQL, Excel, Snowflake
- Experience in preparing dashboards using calculated fields, parameters, calculations, groups, sets and hierarchies in Tableau.
- Wrote complex SQL queries to clean, aggregate, and analyze millions of customer transaction records.
- Prototyped data visualizations using Charts, drill-down, parameterized controls using Tableau to highlight the value of analytics in Executive decision support control
- Extensively used calculated fields for different logics for Trend, Extended price calculations for the different cost types
- Developed Ad-hoc reports using Tableau Desktop, Excel, developed visualizations using sets, Parameters, Calculated Fields, Dynamic sorting, Filtering, Parameter driven analysis.
- Developed Dashboards in Tableau Desktop and published them on Tableau server which allowed end users to understand the data on the fly with the usage of quick filters for on demand needed information.
- Cleaning and blending multiple data sources to allow for different views on application data in a single dashboard.
- Hands-on Experience in Tableau administration tool for adding Users, managing licenses and data connections and scheduling tasks.
- Involved in publishing various kinds of visualizations, dashboards and workbooks from Tableau desktop to Tableau servers.
- Provided Production support to Tableau users and wrote custom SQL to support business requirements
- Gathering business requirements, interacted with “Global Risk Management”, Global Management Financial Risk, and Business analyst to analyze business needs and developed technical specifications.
- Current Production of reports are time consuming and sub optimal, when it comes to splitting per entity or looking at the overtime horizon. Production of reports is automated.
- Incorporating weekly changes of the data source files by integration into Tableau data sources for timely leadership reporting.
- Created and Configured ODI Repositories, Interfaces, Packages, Procedures and Scenarios.
- Interacted with the ETL team for improving data performance from multiple data sources.

GMFR Automate Flash Reports:

- Current production of reports is time consuming and suboptimal when it comes to splitting per entity or looking over a longer time horizon.
- Enhancements This Gas and Power drilling Dashboard displays the present and future challenges. It allows users to easily see metrics details that are easily viewed by clicking on any Section of the Dashboard or In a Detailed Report. Select a view of the dashboard to see the data by Yearly, Quarterly and Monthly.

Commodities report Consolidation (daily Report)

- There are a total of 52 commodities risk reports that are run daily. These reports are processed by 12,000 lines of python code that take 2.5-3 hours to run daily (500-750 hours annually).
- Maintenance/customization/adoption to the upstream changes requires roughly 20% of the time of the junior risk managers per year (3 junior risk managers in commodities team).
- All the reports are expressed in their respective volumetric terms (MWh, ounces, barrels) making risk aggregation extremely difficult and non-comprehensible to non-commodities specialists, thus impairing risk management ability.
- For Part 1 of the Commodities Report Consolidation project, an automated workflow will consolidate 6 VaR reports into 1.

GMFR Country Risk Analysis Dashboard:

- Identify the Risks at Country level This project Intention is to find the Automation of risk exposure sourcing for country/industry/sector level analysis for all risk metrics managed by GMFR. Actually, GMFR Crisis Management has different types of Risks, Market Risk (MR), Counterparty Credit Risk (CCR), Liquidity Risk (LR) & Capital Risk (CR), Fixed Income Exposure.

Cigna

Role: Tableau Developer/Tableau Server

March 2022 – June 2022

Location:Hartford,Connecticut

- Responsible for Designed, developed, tested, and maintained Tableau functional reports based on user requirements.
- Gathered Business Requirements, interacted with “**Sales Effectiveness Team**”, Business analyst to analyze business needs and developed technical specifications.
- Develop, organize, manage and maintain graphs, tables and document templates for the efficient creation of reports.
- Incorporating weekly changes of the data source files by integration into Tableau Desktop.
- Prototyped Data visualizations using charts, Drill downs, Parameterized controls using tableau to highlight the value of analytics in executive decision support control.
- Extensively used calculated fields for different logics for trend, extended price calculations for different cost types.
- Developed Ad-hoc reports using Tableau desktop from various Data sources SQL Server, Oracle, Teradata.
- Provided ongoing support to BI applications running in production and Troubleshooting.

Key Achievements:

- ✓ By fixing the performance issues on the complex stored procedures & slow running dashboards.
- ✓ Explored data in a variety of ways and across multiple visualizations in Tableau, strategic expertise in design of experiments, data collection, analysis and visualization to rich look.

Environment:

Tableau Desktop 2020.4, Tableau server 2020.4, Power BI Desktop, Power BI Report Server, SQL Server 2017, SSRS, Jira, Microsoft Office Suite (Word, Excel, Power Point, Visio, Outlook).

Aetna Insurance

Role: Data Analyst / SQL BI Developer

Dec 2017 – Feb 2022

Location:Hartford,Connecticut

Responsible for Design and develop Power BI/Tableau visualization solutions.

- Work on generating various dashboards in tableau server using various data sources.
- Install upgrade Tableau server and server performance tuning for optimization.
- Hands-on development assisting users in creating and modifying worksheets and data visualization dashboards.
- Defined best practices for Tableau report development.
- Prepare dashboards using calculations and parameters in Tableau.
- Proof-read all documents and maintain accuracy of information and reporting SOP. Responsible for developing the dashboard and preparing ad-Hoc Reporting.

Achievements:

- ✓ Enabled the BAs to counter the challenges on the DataMart and BI refreshes within latency constraints.

Environment:

Tableau Desktop 9.1/9.2, Tableau server 9.2, Power BI Desktop, Power BI Report Server, SQL server, SSIS

IBM

Sr ETL Developer

client: Farm Credit Canada, Credit financing

June 2014 to July 2017

Location:Hyderabad,India

Responsible for

- Management Information System (MIS) enhancements and sustenance on the data marts & pipelines for better insight creation from the data facts.
- Working closely with customers and addressing solutions for all performance issues.
- Improved performance of Rule Execution and Rule transformations by 10X.
- Extensively worked in SQL Server procedures and performance fine tuning.
- Developed SSIS packages to consume static datasets from external vendor sources like, EDW & OLTP data stores.
- Worked complete BI lifecycle i.e., modeling, designing, transformations, aggregation and data reporting layer.
- Designed and developed Concurrent framework to simulate Parallel connections load testing.
- Creation of regulatory reports for analysis by defining the data summaries on critical audit trails.
- Worked on the Agile development process, to meet critical deliveries.
- Administering the SQL server and tuning the queries based on the most frequent usage list.
- Development of Risk Data Store (RDS) reporting application with SSRS to help the risk mitigation system.

Key Achievements:

- By fixing the performance issues on the complex stored procedures, stabilized the key ETL pipelines of the application.

Environment:

- SQL server 2008 R2/ 2012, SSIS, SSRS, C# .NET, SVN
