

Supraja Kusam

Data Analyst

Texas 75071 | kusamsupraja01@gmail.com | 940-487-9405 | LinkedIn

Summary

Data-driven Data Analyst with 3+ years of experience transforming complex datasets into actionable insights using SQL, Python, R, and Power BI. Skilled in predictive modeling, ETL/ELT pipelines, and interactive dashboards to optimize decision-making and business performance. Known for solving complex problems, enhancing operational efficiency, and delivering insights that drive strategy and risk management.

Technical Skills

Databases & Data Warehousing: SQL Server, Oracle, NoSQL Databases, Data Lakes, Data Warehousing, Snowflake, AWS S3, ETL/ELT (Airflow, AWS Glue, Talend, ADF, Pentaho)

Programming & Scripting: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, NLTK), R (R-Studio, R Shiny), Excel (Advanced Formulas, Pivot Tables, XLOOKUP)

Data Cleaning & Transformation: Data Standardization, Missing Value Handling, Data Validation, Anomaly Detection, Batch & Real-Time Processing

Business Intelligence & Visualization: Power BI (Dashboard Development, Report Automation, KPI Tracking, Data Visualization)

Analytics & Modeling: Predictive Modeling, Clustering, Forecasting, Risk & Fraud Analytics, Market Analysis, Cost/Benefit Analysis, GAP/SWOT Analysis, Root Cause Analysis

Project & Process Tools: JIRA, Confluence, MS Project, MS Visio, Trello, Asana, Smartsheet, Workflow Optimization, Cross-Functional Collaboration, Requirements Gathering, Documentation

Experience

Data Analyst | Fifth Third Bank, USA

Jan 2024 – Present

- Analyzed customer transactions and loan performance to identify patterns, detect anomalies, and segment customers based on behavior, supporting personalized services and fraud reduction initiatives.
- Developed predictive models and clustering strategies to forecast loan defaults and segment high-value customers, enabling targeted marketing campaigns and risk mitigation.
- Integrated data from multiple banking systems to build unified datasets for exploratory analysis, cost/benefit studies, root cause analysis, and market insights, improving reporting efficiency by 55%.
- Generated actionable insights through trend analysis of transaction and repayment data, enabling business teams to optimize lending strategies, reduce delinquency rates, and enhance user experience.
- Built interactive dashboards and visualization reports to monitor customer activity, loan performance, and high-risk accounts, empowering stakeholders to make data-driven decisions.
- Executed ad-hoc analysis, SWOT analysis, and gap assessments for digital banking and lending platforms, supporting decision-making and process improvements across banking operations.
- Collaborated with cross-functional teams to implement machine learning models, data engineering pipelines, and real-time analytics workflows, enhancing operational efficiency, customer engagement, and platform insights.

Data Analyst | Hexaware Technologies, India

May 2020 – July 2022

- Analyzed customer banking and loan data across the Hexaware Core Banking Analytics and Lending Solutions platforms to uncover patterns, assess risk, and optimize service offerings, enhancing overall customer engagement and portfolio monitoring.
- Developed integrated datasets from multiple sources, ensuring high-quality, clean, and standardized data for exploratory analysis and predictive modeling, improving analysis efficiency by over 50%.
- Segmented customers using clustering techniques based on transaction behavior and account activity, identifying high-value and high-risk groups to support targeted marketing and lending strategies.
- Performed loan performance and delinquency trend analysis to flag potential defaults, enabling proactive risk management and increasing repayment adherence by over 40%.
- Created interactive dashboards and visualizations to highlight customer behavior, transaction patterns, and loan portfolio performance, providing actionable insights to stakeholders and business teams.
- Led initiatives to predict customer product adoption and loan defaults using predictive models, resulting in data-driven recommendations that improved product targeting and reduced risk exposure by over 30%.
- Enhanced banking operations by monitoring trends, analyzing cross-selling opportunities, and supporting marketing and risk teams with actionable intelligence, improving targeted segment efficiency by over 50%.

Education

Pace University, USA	Master's in Computer Science	May 2024
KL University, India	Bachelor's in Computer Science	May 2022

Certificates

Microsoft Certified Power Automate RPA Developer Associate
