EDUCATION

Northeastern University | Boston, MA

Jan 2023 - May 2025

Master of Science in Data Analytics

GPA-3.82

Relevant Courses: Data Visualization, Database Management & Design, Data Warehousing & Business Intelligence

BVB College of Engineering & Technology | Karnataka, India

Aug 2014 - May 2018

Bachelor of Engineering in Electronics & Communication

PROFESSIONAL EXPERIENCE

Deloitte Touche Tohmatsu | Consultant (Data Engineer) | Pune, India

Jan 2022 – Jan 2023

- Programmed 20+ complex SQL queries to transform data and load to silver delta tables from bronze tables based on business rules
- Successfully converted 10 stored procedures from T-SQL to PySpark in a data migration project, enabling efficient incremental data loading from Azure Synapse to Microsoft Fabric for seamless integration with external systems
- Engineered metadata driven pipeline in Microsoft fabric to load incremental data to external systems as part of migration project from Synapse to Microsoft fabric adhering medallion architecture
- Implemented CI/CD pipelines for Azure Databricks, Azure Data Factory using Azure DevOps, streamlining deployment workflows and reducing deployment time by 40%
- Designed, implemented, and tested an automated failure notification system for 20+ pipelines in Azure Data Factory, ensuring real-time alerts via teams and email to enhance issue resolution efficiency
- Developed 4 child procedures for main procedures scheduled procedure to execute based business needs reducing efficiency of incremental data load by 30 %
- Designed and developed data pipelines in Informatica PowerCenter for seamless migration of 5M banking customer records and 10M account details from on prem Oracle database to NoSQL database MongoDB
- Developed and tested ETL pipelines for streaming data in stream sets to transform data in certain records based on business rules
- Created and executed 30 ETL test cases for validating data in source and target databases by executing SQL and NoSQL queries
- Consolidated creation of mapping documents for 5 data migration projects providing clear guidelines for data transformation rules, filter conditions, datetime formats, datatypes and source to target mapping field details reducing development time by 30%

Accenture | Data Analyst | Bengaluru, India

Jun 2018 - Nov 2021

- Monitored and analyzed data refresh activities across 30+ schemas, ensuring data quality, accuracy, and availability for an application supporting 5,000+ users across 36 European countries
- Improved data load performance by 50% by optimizing SQL processes, cleaning logs, and executing statistics gathering, resulting in faster reporting and reduced delays in business insights
- Developed complex SQL queries to load fiscal calendar data, enabling KPI tracking, sales forecasting, and quarterly revenue growth
- Resolved 150+ data discrepancy issues (L1 & L2 incidents) by conducting root cause analysis, creating adhoc reports, and reconciliation, ensuring accuracy of dashboards and business reports within SLA
- Designed and enhanced dashboards in Power BI to visualize key metrics (sales, revenue, operational KPIs), empowering stakeholders with data-driven decision-making capabilities
- Collaborated with cross-functional teams to gather business requirements, translate them into reporting solutions, and deliver actionable insights that supported strategic initiatives

TECHNICAL SKILLS

Databases: Oracle(11g,12c,19c), Azure SQL Database, Azure Synapse, Microsoft SQL Server, PostgreSQL, MongoDB

Programming Languages: SQL, Python, PL/SQL, TSQL, PySpark, Spark SQL, Unix

Agile methodologies: Confluence, JIRA, HP Service Centre, Remedy

ETL Tools: Azure Data Factory, Informatica Power Centre, Talend, Streamsets, Toad, SQL Developer, Autosys, UC4

Visualization Tools: Tableau, PowerBI, SAP Business Objects, Data wrapper, Flourish

Cloud Services: Azure Data Factory, Azure Databricks, Azure Synapse Analytics, Microsoft Fabric, Azure DevOps, ADLS Gen2,AWS (S3,EC2,Glue,Lambda,Step Functions)

KEY PROJECTS

Product Sales Analysis Talend, Tableau, Excel, PostgreSQL, Deaver, Slowly Changing Dimensions

Sep 2024 - Dec 2024

- Crafted a Datawarehouse consisting of 6 dimensions and 1 fact table, encompassing 50,000 transactions from 2 pharmaceutical companies, analyzing 6 products sales data across 3 locations in United States during fiscal year 2019
- Designed SCD type 2 mappings on employee dimension table to maintain history of sales representatives work location
- Executed incremental data loads to resolve data discrepancy issue thereby recovering sales adjustments for a 20% revenue

Olympics Data Analysis Tableau, Python, Data Cleaning, Tree Map, Box Plot, Scatter Plot Bar Chart

Sep 2024 - Dec 2024

- Cleaned Olympics historical dataset from 1960 to 2016 using pandas dataframe by adding few columns to simplify visualization
- Developed an interactive dashboard consisting of 6 visuals to determine factors affecting Olympic medal performance

Adult Income Classification with Age EDA, Decision Tree, Random Forest, SVM, KNN, Hyperparameter Tuning

May 2025 – Aug 2025

- Modelled a machine learning(ML) project to predict income class based on age using classification algorithms
- Boosted accuracy of the model by 8% using oversampling technique to address the problem of imbalanced class

Pharmaceutical Inventory Management System Procedures, Functions, Triggers, Views, Oracle 19c

Jan 2023 - Apr 2023

- Created a database for inventory management consisting of 14 tables to store customer, inventory and transactions data
- Implemented procedures, triggers, and functions to handle internal and external transactions, ensuring row-level security compliance with 12 business rules
