

SUPRIYA VELDI

(201) 844-8125 | supriyaveldi12@gmail.com | <https://www.linkedin.com/in/supriya-veldi-168a1119a/>

PROFESSIONAL SUMMARY

- **Full Stack Developer** with over **5 years of IT experience** in developing **scalable, enterprise-grade web applications** using **Java, Spring Boot**, and front-end frameworks like **ReactJS, Angular**, and **VueJS**.
- Strong expertise in Core Java 1.8 features including **Lambda expressions, Stream API, Multithreading**, and **Collections**, with solid understanding of **Object-Oriented Programming (OOP)** principles and robust **exception handling**.
- Proficient in solving complex performance bottlenecks by applying efficient **algorithms, concurrent data structures**, and Java **threading models** to build scalable, high-performance applications.
- **Collaborated as a Software Engineer** within cross-functional Agile teams, participating in sprint planning, daily stand-ups, retrospectives, and demos to deliver scalable and secure enterprise solutions.
- Applied strong **teamwork, collaboration**, and **problem-solving** skills to streamline communication between developers, QA, and product stakeholders, ensuring on-time delivery and continuous improvement in Agile and Waterfall environments.
- Designed application flows using **UML diagrams** (use-case, sequence) and implemented design patterns such as **Singleton, Factory**, and **Observer**.
- Hands-on experience designing and developing secure **RESTful APIs** with **Spring MVC** and **Spring Security**.
- Built microservices-based architectures using **Spring Boot, Spring Cloud, Kafka**, and **RabbitMQ**.
- **Designed and implemented efficient, scalable data access layers** using Spring Data JPA and Hibernate, with optimized SQL queries across PostgreSQL, Oracle, and MySQL databases.
- Leveraged core **computer science principles**, including **data structures, algorithms**, and **relational modelling** to solve complex data challenges and improve query performance in both **SQL** (PostgreSQL, Oracle) and **NoSQL** (MongoDB) environments.
- Built dynamic, responsive UIs using **ReactJS, Angular, VueJS**, along with **routing, state management**, and REST API integration.
- Implemented **OAuth2, JWT, SAML**, and **OpenID Connect** protocols for secure authentication and authorization.
- Skilled in deploying applications in **containerized environments** using **Docker** and **Kubernetes**, ensuring high availability and scalability.
- Deployed microservices on **AWS EC2**, managed secrets with **AWS Secrets Manager**, and monitored with **CloudWatch**.
- Experience with **CI/CD pipelines** using tools like **Jenkins, Azure DevOps**, and **Git**, automating build, test, and deployment workflows.
- Experienced with **Linux/Unix** environments and writing shell scripts using **Bash**.
- Integrated third-party **APIs** and web services **REST** and **SOAP** into enterprise platforms.
- Designed and implemented **automated unit and integration tests** using **JUnit, Mockito, TestNG**, and **EasyMock** to ensure back-end service reliability and code coverage.
- Collaborated with InfoSec teams to ensure code and architecture met **compliance and regulatory standards**.
- Familiar with Terraform for infrastructure as code to provision **AWS services** like **EC2** and **Lambda**.
- Conducted **front-end** and **end-to-end testing** using tools such as **Karma, Jasmine, Jest, Mocha, Chai, Protractor, Cucumber**, and **Citrus** to validate UI functionality and user flows.
- Currently exploring **AI technologies** such as **OpenAI APIs, TensorFlow**, and **AWS SageMaker**.

TECHNICAL SKILLS

- **Programming Languages:** Java, J2EE, SQL, Python, JavaScript, TypeScript, HTML5, CSS3
- **Frontend Technologies:** ReactJS, Angular, VueJS, GraphQL, Bootstrap, jQuery, AJAX
- **Backend Frameworks:** Spring Boot, Spring MVC, Spring Security, Struts, Servlets, JSP
- **Tools & IDEs:** Eclipse, IntelliJ IDEA, Postman, Swagger
- **Architectures & Protocols:** Microservices, Service-Oriented Architecture (SOA), RESTful Services
- **ORM & Data Access:** Hibernate, Spring Data JPA, Spring JDBC, Spring Data REST
- **Databases (SQL):** Oracle, MySQL, PostgreSQL, SQL Server, DB2
- **Databases (NoSQL):** MongoDB, Cassandra, DynamoDB
- **Cloud Platforms:** Amazon Web Services (AWS), Microsoft Azure
- **CI/CD Tools:** Jenkins, GitHub Actions, Azure DevOps
- **Build & Dependency Management:** Maven, Gradle, Ant
- **Operating Systems & Scripting:** Linux, Unix, Bash Shell Scripting
- **Version Control:** Git, SVN, CVS
- **Testing Frameworks(Backend):** JUnit, Mockito, TestNG, EasyMock
- **Testing Frameworks (Frontend):** Karma, Jasmine, Jest, Mocha, Chai, Protractor, Cucumber, Citrus
- **Security & Authentication:** OAuth2, JWT, SAML, SSL, OpenID Connect
- **Messaging & Dev Tools:** Apache Kafka, RabbitMQ, Postman, SOAP UI, Swagger UI, Log4j, SLF4J
- **Project Management:** JIRA, TFS

PROFESSIONAL EXPERIENCE

Client 1: Capital One

Role: Java Full Stack Developer

Duration: August 2024 – Present

Location: Newark, New Jersey, USA.

- Participated in **Agile ceremonies** including daily stand-ups, sprint planning, demos, and retrospectives.
- Developed responsive UIs with **Angular, HTML5, CSS3, JavaScript**, and **Bootstrap** integrated with **REST APIs**.
- Designed and implemented **microservices** using **Spring Boot, Spring Cloud**, and RESTful architecture.
- Enhanced API security by **40%** by implementing **OAuth2** and **JWT** for secure authentication and role-based authorization.
- Built and consumed **JSON-based APIs** configured **Spring Cloud Gateway** for routing and CORS. • Built data access layers using **Spring Data JPA** and optimized database performance with **PostgreSQL**.
- Used **MongoDB** for logging and real-time configuration data in distributed applications.
- Implemented asynchronous messaging with **Apache Kafka** for core service integration.
- Wrote **unit** and **integration tests** using **JUnit, Mockito, Jest**, achieving 90% code coverage. Used **Mocha** for backend and frontend components. .
- Configured and managed infrastructure as code (IaC) using **AWS CloudFormation** and **Terraform**, and automated **CI/CD pipelines with Jenkins** to deploy services on **AWS EC2** with **IAM** role-based access control.
- **Debugged** critical microservice failures using Splunk and Log4j, reducing incident resolution time by 35% through proactive alerting, ensured code quality with **SonarQube** and rigorous code reviews.
- Used **Git** for version control and **JIRA** for task tracking and sprint management.

Environments: Java 1.8+, Spring Boot, Spring Cloud, Angular, HTML5, CSS3, Bootstrap, JavaScript, REST APIs, OAuth2, JWT, PostgreSQL, MongoDB, Apache Kafka, Spring Data JPA, Spring Security, Spring Cloud Gateway, AWS EC2, Jenkins, Git, JIRA, SonarQube, Log4j, Splunk, JUnit, Mockito, Jest, Mocha, Agile/Scrum.

Client 2: Cigna

Role: Java Full Stack Developer

Duration: June 2021 – July 2023

Location: Hyderabad, India

- Followed **Agile methodologies** to develop and maintain claims processing and eligibility microservices in an iterative delivery model.
- Designed **RESTful APIs** for real-time eligibility checks and patient record processing. • Secured APIs with **OAuth2**, **SAML**, and **Spring Security** for SSO and access control.
- Used **Spring Data JPA**, **Hibernate**, and **MySQL** for efficient data access and validation logic.
- Implemented **Spring Cloud Gateway** for routing, throttling, and resilience patterns like circuit breakers.
- Boosted UI responsiveness and user engagement by **20%** using **ReactJS** and **Bootstrap** for patient and claims management interfaces.
- Used **MongoDB** for storing unstructured data such as documents and medical history logs.
- Managed inter-service communication via **Apache Kafka** for decoupled, event-driven workflows.
- Created **unit tests** with **JUnit** and **Mockito**, and automated **UI tests** using **Jest** and **Cucumber**.
- Reduced API response time by **40%** through optimized **SQL** queries, use of MongoDB for unstructured data, and asynchronous messaging with Apache Kafka.
- Deployed services via **Jenkins** and **Azure DevOps** pipelines to **Azure App Services**, enabling autoscaling.
- Maintained code quality using **SonarQube**, and logged application metrics using **Slf4j**.

Environments: Java 17, Spring Boot, Spring Cloud Gateway, Spring Security, Hibernate, OAuth2, SAML, JWT, ReactJS, Bootstrap, HTML5, JavaScript, JSON, MySQL, MongoDB, Apache Kafka, JUnit, Mockito, Jest, Cucumber, Postman, SOAP UI, Swagger UI, Jenkins, Azure DevOps, Azure App Services, Azure Monitor, SonarQube, SLF4J, Git, JIRA, Agile/Scrum

Client 3: FedEx Express

Role: Java Developer

Duration: June 2019 – May 2021

Location: Hyderabad, India.

- Developed REST APIs for shipment tracking using **Spring MVC**, integrating with GPS services and logistics backends.
- Applied **Microservices architecture** to modularize tracking, scheduling, and delivery services.
- Secured all API endpoints using **OAuth2** and **JWT**, enhancing data security and reducing unauthorized access incidents by **25%**.
- Built responsive front-end interfaces using **Angular**, **HTML5**, **CSS3**, **Bootstrap**, and **JavaScript**.
- Integrated **Spring JDBC** with Oracle for transactional data and enhanced delivery tracking accuracy by 20% through GPS integration and real-time location logging using **MongoDB**.
- Utilized **Apache Kafka** for asynchronous communication between delivery and alerting services.
- Wrote unit and integration tests using **JUnit**, **Mockito**, **Karma**, and **Jasmine** for full coverage.
- Performed API testing and documentation using **Postman** and **Swagger UI**, accelerating QA validation cycles by **30%**.

- Automated deployments via **Jenkins**, managing build artifacts and Linux-based deployments.
- Tracked sprint tasks and bugs using **JIRA**, supporting production releases and on-call hotfixes.

Environments: Java 1.8, Spring MVC, Spring Cloud Gateway, Angular, Oracle, MongoDB, Apache Kafka, REST APIs, OAuth2, JWT, Jenkins, Git, JUnit, Mockito, Postman, Swagger UI, Log4j, Agile

EDUCATION

Master of Science (MS) in Computer/Information Technology Services

St. Francis College, New York, United States.
