

SUMMARY

Results-driven Data Scientist with 5+ years of experience developing predictive models, optimizing data pipelines, and driving cost savings through advanced analytics, machine learning, and automation. Skilled in delivering data-driven solutions that improve decision-making and business performance

EDUCATION

Master of Science in Computer & Information Science2023 - 2024

Georgia State University, Atlanta

Bachelor of Electrical and Electronics Engineering2013 - 2017

Biju Patnaik University of Technology, India

- CERTIFICATION

- OCI Generative AI Certified Professional
 - AWS Academy Machine Learning

TECHNICAL SKILLS

Programming Language	Python, SQL, Java, JavaScript
Machine Learning & AI	Scikit-Learn, TensorFlow, PyTorch, XGBoost, NLP (spaCy, Hugging Face)
Data Engineering	PySpark, Pandas, NumPy, Delta Lake
Cloud Platforms & Warehouses	Databricks, AWS
MLOps & Deployment	MLflow, Docker, Git

EXPERIENCE

Crysalis, San FranciscoAug 2024 – Present

Senior Data Scientist - Operations & Analytics

- Developed and trained ML models in Databricks using Python, SQL, PySpark, and Scikit-Learn to forecast feedstock supply and grain pricing, improving forecasting accuracy by 15% and reducing procurement costs by 10%.
- Built scalable data pipelines on Databricks for preprocessing, feature engineering, and model training using PySpark and Delta Lake.
- Designed time-series anomaly detection models (PyTorch LSTMs) to monitor fermentation parameters, reducing unexpected downtime.
- Implemented NLP pipelines (spaCy, Hugging Face Transformers) to analyze research reports and lab notes, reducing manual review time by 25%.

Technology Used: Python, SQL, PySpark, Databricks, Delta Lake, Scikit-Learn, PyTorch (LSTMs), spaCy, Hugging Face Transformer

Y Stem & Chess Inc, Atlanta
Data Scientist Intern

Jun 2024 – Jul 2024

- Collected, cleaned, and analyzed student performance data using Python (Pandas, NumPy) and SQL, identifying learning gaps to guide personalized STEM support.
- Built predictive models (Scikit-Learn, XGBoost, Logistic Regression) to forecast student outcomes, improving targeted intervention strategies.
- Designed interactive dashboards in Power BI/Tableau to track program effectiveness, enhancing stakeholder reporting.
- Applied NLP techniques (spaCy, Hugging Face Transformers) to analyze survey/feedback data, improving curriculum design and engagement.

Technology Used: Python, SQL, Pandas, NumPy, Scikit-Learn, XGBoost, Logistic Regression, Power BI/Tableau, spaCy, Hugging Face Transformers

Nous Infosystem, India
Senior Data Scientist

Oct 2021 – Aug 2023

- Optimized SQL queries and enhanced database performance by 45%, accelerating reporting for clinical decision-making and administrative planning.
- Automated workflows with Selenium, reducing manual effort by 70%.
- Created visualizations to highlight insights in large datasets using Power BI, improving efficiency by 40%.
- Partnered with stakeholders to develop a predictive algorithm, boosting data availability by 40% for a fraud checker chatbot.

Technology Used: Python, SQL, Power BI, Selenium

Cognizant, India
Associate Data Scientist

Apr 2018 – Oct 2021

- Developed ML models (Random Forest, KNN, XGBoost, Logistic Regression) to optimize construction processes, improving efficiency by 60%.
- Built, validated, and monitored ML algorithms for insurance risk prediction, enhancing performance and accuracy by 70%.
- Conducted statistical analysis using Excel and Python to design business strategies, achieving a 40% cost reduction.
- Researched and advanced ML algorithms to solve complex business problems, reducing error rates by 30%.

Technology Used: Python, Excel, Random Forest, KNN, XGBoost, Logistic Regression, Machine Learning, Statistical Analysis
