SUMMARY

Data Analyst and Software Engineer with 4 years of combined experience across **data analytics, software engineering, and DevOps**. Strong foundation in **Python, R, SQL, and Java**, with proven ability to deliver both **business intelligence solutions** and **enterprise-scale applications**. Experienced in bridging business and technology through **requirement gathering, stakeholder collaboration, and data-driven storytelling**.

Professional experience includes designing **Power BI** and **Tableau dashboards** to track KPIs, preparing **Excel-based reports** to reduce manual effort, and conducting **ad-hoc analysis** using **SQL and Python (Pandas, NumPy)** to answer business questions. Engineered **Java and Spring Boot microservices** by **RESTful API development, exception handling, and logging (SLF4J, Log4j)**. Strengthened applications with **API gateway integration, third-party service connectivity, and security best practices**. Delivered enterprise systems by **automating builds and deployments (Jenkins, GitHub Actions, Maven, Nexus)**, containerizing with **Docker/Kubernetes**, and managing reliability through **DevSecOps practices, monitoring (Dynatrace), and ITSM (ServiceNow, ITIL)**.

Expertise in **machine learning, prescriptive analytics, and econometrics**, with hands-on projects applying **decision trees, logistic regression, neural networks, causal analytics (A/B testing, RCTs)**, and **big data frameworks (Hadoop, Spark, AWS Lakehouse)** to real-world problems. **Master of Science in Business Analytics & Artificial Intelligence from UT Dallas**, integrating business strategy with technical depth to deliver scalable, data-driven solutions across industries.

EDUCATION

The University of Texas at Dallas - Naveen Jindal School of Management

Aug 2023 - May 2025

Master of Science in Business Analytics and Artificial Intelligence

GPA: 3.72

Relevant Coursework:

Programming for Data Science (Python), Big Data, A/B Testing & Experimentation, AWS Cloud Computing, Visualization (Tableau), Data Warehousing, Databases (SQL), Business Analytics with R(ML), Econometrics, Predictive Analytics, Prescriptive Analytics, Statistics.

EXPERIENCE

Data Analyst Intern | Spesh Talent | TX

Aug 2024 - Dec 2024

- Built **interactive Power BI dashboards** by connecting SQL Server and **MongoDB** datasets, enabling stakeholders to track customer and sales KPIs in real time.
- Prepared **Excel reports** (Pivot Tables, Power Query, VLOOKUP, macros) to support weekly performance reviews, reducing manual effort by 20%.
- Partnered with business users to gather requirements in **JIRA** and documented workflows in **Confluence**, ensuring clear alignment between technical solutions and business needs.
- Conducted **ad-hoc data analysis** using SQL, Excel, and Python (Pandas, NumPy) to answer urgent business questions and identify performance trends.
- Performed **basic statistical analysis** (hypothesis testing, correlation) and built simple **ML models** (logistic regression, decision tree) to explore customer churn risk factors.
- Presented findings using **storytelling with data**, tailoring insights to both technical and non-technical audiences for better decision-making.

Cognizant Technology Solutions | (Client: AXA UK) | India

Mar 2021 - Jun 2023

Software Engineer

Feb 2022 - Jun 2023

- Implemented **microservices patterns** including API Gateway, deployed scalable applications in **Docker containers** and orchestrated with **Kubernetes (K8s)**.
- Built and maintained **CI/CD pipelines** using Jenkins with GitHub Actions exposure, automated build/test/release workflows, managed build artifacts in Nexus Repository.
- Applied **Infrastructure as Code (IaC)** with **Terraform and Ansible**, Enhanced **observability and monitoring** with **Dynatrace and ServiceNow dashboards**, creating proactive alerts, anomaly detection, and RCA dashboards to minimize downtime.
- Strengthened **application security** by embedding **DevSecOps practices** into pipelines upgrading JARs, resolving Maven dependency issues, renewing SSL certificates, and coordinating Pentest/DR readiness by reducing vulnerabilities by 30%.
- Supported **secure access management** via **Azure Active Directory**, strengthening compliance and identity governance.
- Orchestrated **end-to-end deployment workflows** using ServiceNow change management and Maven automation in Unix (PuTTY, WinSCP), conducting impact analysis to achieve 100% deployment success with zero critical failures.

- Implemented **post-deployment validation processes**, including batch job monitoring, middleware operations, and server restarts using enterprise dashboard tools, ensuring business continuity for AXA UK's critical insurance systems.
- Delivered comprehensive **L2/L3 production support** for 12+ critical Java & Spring Boot microservices across AXA UK platforms, achieving 99.9% uptime and 100% SLA compliance.
- Executed **vulnerability remediation initiatives**, including outdated JAR upgrades, dependency resolution, SSL renewals, and penetration testing support achieving full compliance and reducing security risks by 30%.
- Managed the complete **lifecycle through ServiceNow Incident, Problem, and Change Management**, performing monthly, quarterly, and yearly system updates with 100% accuracy and full audit compliance.
- **Automated incident detection and response workflows**, reducing MTTR by 20% and improving system reliability under high-traffic conditions.
- Collaborated cross-functionally with **Infrastructure, QA, UAT, Product Vendor, and AXA UK stakeholders** under **Agile & ITIL best practices**, streamlining release cycles, resolving integration challenges, and maintaining on-time delivery with zero critical production failures.

Programmer Analyst

Mar 2021 - Feb 2022

- Developed and enhanced **Web Services and RESTful APIs** using Core Java, Spring Boot, and Spring Framework within Eclipse IDE, implementing robust logging and exception handling with SLF4J and Log4j, reducing manual intervention by 20%, improving system stability, and accelerating root cause analysis by 40%.
- Designed, developed, and tested APIs with **SoapUI**, integrating third-party services (**Genesys, Web Service Gateway, AFD Sortcodes/Postcodes**) for secure financial and address validations.
- Built and executed **Unit & Integration Tests** with JUnit, integrated into CI/CD pipelines, improving test coverage and preventing regressions.
- Optimized **SQL queries, stored procedures, triggers, and indexing** across Active Directory and AXA insurance databases, boosting scalability by 30% and ensuring 100% reporting accuracy.
- Administered **Nexus Repository** for Java build artifacts and dependency management, configuring OPCO and ESR systems to ensure artifact versioning and alignment with AXA UK processes.
- Utilized **Genesys Framework and Web Service Gateway** for repository and service integration, enabling smooth connectivity and supporting complex insurance workflows with external providers.
- Delivered **end-to-end deployments** across Sysdev, Userdev, UAT, and Production using Maven, Eclipse IDE, Unix shell scripting, Tomcat, WinSCP, rollback scripting, and batch jobs achieving a 100% release success rate.
- Authored and maintained **SOPs, RCA reports, deployment checklists, KEDB documentation, and architecture diagrams** on SharePoint, reducing onboarding time by 30% and improving knowledge retention.
- Partnered with **business analysts and stakeholders** to translate functional requirements into technical specifications and COTS configurations, supporting smooth implementations.

HRH Next | India

Dec 2019 - Feb 2021

Data Analyst

May 2020 - Feb 2021

- Automated reporting workflows by developing **SQL queries and Python scripts**, improving reporting efficiency by 20% and reducing manual reconciliation.
- Built and maintained **department-level Tableau dashboards** to track KPIs (sales, customer retention, operations), enabling data-driven decisions.
- Assisted in **predictive modeling and A/B test analysis** (regression, forecasting, significance testing) that informed demand planning and marketing strategies.
- Partnered with cross-functional teams to gather requirements, support **data modeling/ETL processes**, and deliver actionable insights through reports and visualizations.

Data Analyst Intern

Dec 2019 - May 2020

- Cleaned and validated datasets using **SQL, Python (Pandas)**, improving reporting accuracy by 20%.
- Conducted **EDA and statistical analysis** in Python to uncover trends and anomalies in sales and customer data.
- Developed **interactive Tableau dashboards** that automated recurring reports and cut manual effort by 30%.
- Supported team collaboration by using **Git for version control** of SQL scripts and Python notebooks.

SKILLS

Data & Analytics

- **Programming:** Python (Pandas, NumPy), Excel (Pivot Tables, Power Query, VLOOKUP, Macros)
- **Databases:** SQL, SQL Server, NoSQL (MongoDB)

- **Business Intelligence & Visualization:** Power BI, Tableau, Storytelling with Data, KPI Dashboarding
- **Machine Learning & AI:** R (tidyverse, caret, rpart, neuralnet, ggplot2), Logistic Regression, Decision Trees, Neural Networks, Predictive Analytics, Prescriptive Analytics, Model Validation, Cross-Validation.
- **Statistics:** Statistical Analysis, Hypothesis Testing, Correlation, ANOVA, Significance Testing, Exploratory Data Analysis (EDA), Econometrics (OLS, 2SLS, IV Regression, Hausman Test).
- **Cloud & Big Data:** AWS (S3, Glue, Lambda, Athena, QuickSight), Hadoop (HDFS, MapReduce, Hive, Impala), Apache Spark, Data Lakehouse Architecture, ETL Pipeline Design & Automation.

Software Engineering & DevOps

- **Programming & APIs:** Java, Spring Boot, Spring Framework, REST/SOAP APIs, Python, Unix/Linux Shell Scripting, JUnit, SLF4J, Log4j, SoapUI, Postman.
- **DevOps & CI/CD:** Jenkins, GitHub Actions, Maven, Nexus Repository, Docker, Kubernetes (K8s), Terraform, Ansible, CI/CD Pipelines, Git, Tomcat.
- **Cloud & Security:** Azure Active Directory, AWS, SSL Certificate Renewals, Penetration Testing (Pentest), Vulnerability Remediation, Disaster Recovery (DR) Readiness.
- **Monitoring & Operations:** Dynatrace, ServiceNow Dashboards, SLA Tracking, Batch Job Monitoring, Middleware Operations, L2/L3 Production Support, RCA Reports.
- **IT Service Management (ITSM):** ServiceNow (Incident, Problem, Change Management), ITIL Best Practices, SOPs, KEDB.

Project & Collaboration

- **Project Management:** JIRA, Confluence, Agile & Scrum, SDLC (Software Development Lifecycle), Stakeholder Management, Requirements Gathering.
- **Documentation:** SharePoint, SOPs, KEDB, RCA Reports, Deployment Checklists, Architecture Diagrams.

PROJECTS

- **Real-Time Data Lakehouse & ETL Pipeline on AWS** | AWS S3, Glue, Lambda, Athena, QuickSight, SQL
- **Big Data Risk Analytics with Hadoop & Spark** | Hadoop, Spark, Hive, Impala, Tableau, JDBC
- **Public Health Data Analytics with Python & Tableau** | Python, SQL, Tableau, Data Cleaning, EDA, Data Visualization
- **Machine Learning Models for Socioeconomic Profiling** | R, tidyverse, caret, rpart, neuralnet, ggplot2
- **Econometric Analysis of Income Inequality** | R, Econometrics (OLS, 2SLS, IV Regression), Hausman Test, Inequality Analysis
- **Relational Database & BI for Delivery Optimization** | SQL (MySQL), Tableau, Data Modeling, Business Intelligence (BI)
