Microsoft-certified Data Engineer with 3+ years of experience building scalable data pipelines and modern data platforms. Proficient in **Azure Data Factory (ADF)**, **Databricks**, **Apache Spark**, **Informatica** and **DBT**, with a strong background in **SQL**, **Python**, and data warehousing. Adept at problem-solving and optimizing **ETL** processes, integrating data from various sources, and delivering actionable insights through Business Intelligence tools like **Power BI**. Experienced in Infrastructure as code practices using **Terraform** to manage cloud environments across Azure. Demonstrated ability to streamline cloud migration, improve data quality, and ensure data governance.

WORK EXPERIENCE

Data Engineer, SkyZen Technologies, Southlake, Texas

07/2024 – Present

- Designed and deployed **ETL pipelines** using **ADF**, **DBT**, and **Apache Spark on Databricks**, reducing batch processing time by **30%**.
- Built and scheduled **Apache Airflow DAGs** for orchestrating data workflows across Azure Synapse and Blob Storage.
- Developed over **15 modular DBT models** with YAML documentation and Jinja logic, improving reusability and reducing duplication by **40%**.
- Optimized **SQL** transformations in **Snowflake**, reducing query latency by **45%** using clustering and CTE refactoring.
- Integrated **Apache Kafka** to stream real-time retail data into Snowflake pipelines, improving data freshness and reducing batch latency.
- Integrated **Informatica PowerCenter** with Azure Data Factory to streamline and modernize legacy ETL pipelines, resulting in improved maintainability and faster data delivery.
- Created 10+ **Power BI dashboards** leveraging advanced **DAX** to monitor marketing ROI, sales KPIs, and inventory turnover.
- Configured **CI/CD pipelines** with GitHub Actions, enabling automated deployments and version control.
- Integrated **data governance** with role-based access (RBAC) and encryption-at-rest across Synapse and Blob.
- Conducted **data quality audits** for quality assurance, resulting in a **15% boost in reporting accuracy**.
- Collaborated with data science teams and business analysts to build reusable data marts for forecasting and customer segmentation.
- Collaborated with stakeholders to align **data integration strategies** with business objectives.
- Documented data flows, transformation logic, and data architecture decisions to support knowledge sharing and maintain compliance.
- Led Agile sprint planning and backlog grooming sessions, ensuring on-time delivery of data products.

Data Engineer, University of Cincinnati, Ohio, USA

05/2023 – 05/2024

- Designed automated SQL pipelines to ingest and process data from academic, enrollment, and finance systems, reducing manual effort by **35%**.
- Created 10+ **Power BI dashboards** for real-time visualization of tuition trends, academic KPIs, and demographic analysis.
- Utilized **Azure Synapse** for centralized reporting and analytics using linked services and views.
- Standardized large datasets using **Python (pandas)** and **Excel VBA**, reducing data prep time by **20%**.
- Partnered with institutional research to provide strategic insights on student retention and engagement.
- Documented data models and data pipeline logic to support data literacy across 3+ departments.
- Automated data ingestion and transformation processes using **SQL** and **Power BI** datasets.
- Provided **troubleshooting and operational support**, identifying and resolving system issues, which minimized downtime and ensured smooth operations.
- Reduced data errors by **25%** by implementing data validation scripts and reconciliations.

Junior Data Engineer, Accenture, Hyderabad, India

06/2021 – 12/2022

- Built and maintained **ETL** workflows using **SSIS** and **IBM DataStage** for structured and semi-structured data.

- Developed optimized **T-SQL** queries and stored procedures for fraud detection and payment processing.
- Implemented **CI/CD** pipelines using **Jenkins** and **Git**, automating ETL deployments and reducing release time by 40%.
- Created interactive **Power BI** dashboards for transaction insights, revenue trends, and anomaly tracking.
- Migrated legacy data systems to **Snowflake** and **Azure Data Lake**, increasing data accessibility and scalability.
- Designed and triggered **ADF** pipelines for ingesting data from REST APIs, Excel files, and Oracle databases, improving data integration efficiency by 30%.
- Leveraged **Azure Blob Storage** for raw data staging and archival, reducing reliance on on-prem infrastructure and enhancing data accessibility.
- Supported migration and enhancement of legacy ETL jobs using **Informatica PowerCenter**, contributing to robust data integration pipelines for financial data processing.
- Developed **Python** scripts using data structures for data validation and operational monitoring, enhancing automation and efficiency, which reduced manual errors.
- Leveraged **Linux** shell scripting for job scheduling and task automation across environments, increasing operational efficiency and reducing downtime.
- Ensured data governance compliance including encryption and retention, supporting 100% audit success.
- Used **JIRA**, **Confluence**, and **Git** for project tracking, documentation, and version control, which streamlined project management and improved team efficiency.
- Collaborated with cross-functional teams, including data engineers and business analysts, to understand business requirements and deliver actionable insights, enhancing decision-making processes.
- Delivered root cause analysis reports for pipeline issues and system outages, improving reporting accuracy by 15%.
- Created documentation and knowledge-sharing resources for future team members, improving onboarding efficiency and team collaboration.

EDUCATION

Master of Science in Information Technology - *University of Cincinnati*

Bachelor of Technology in Information Technology - *Jawaharlal Nehru Technological University Hyderabad*

SKILLS

- **Languages & Tools:** Python, SQL, T-SQL, XML, Java, JavaScript
- **ETL & Data Engineering Tools:** ETL/ELT Pipelines, Databricks, Snowflake, DBT, IBM DataStage, SSIS, Apache Airflow, Azure Data Factory, Kafka, Spark
- **Cloud Services:** Azure (ADF, Blob Storage, Synapse), GitHub Actions, Linux, Restful API, GCP (Google Cloud Platform), AWS
- **BI tools & Reporting:** Power BI, DAX, Tableau, Data Visualization, Reporting, Excel, Looker
- **Database Management:** MySQL, NoSQL (MongoDB), Azure SQL, SQL Server, Oracle, PostgreSQL, non-relational databases
- **IaC & DevOps:** Jenkins, Terraform, CI/CD Pipelines, Automated Deployments, version control (Git, GitHub), JIRA
- **Collaboration & Communication:** Requirements Gathering, Cross-functional Teams, Documentation
- **Data Concepts:** Data Warehousing, Data Modeling, Data Lakes, Data Governance, Data Quality, Data Security, Data Mining
- **OS & Scripting:** Linux, Shell Scripting (Bash), Windows, Shell, VBA, Python (Pandas, NumPy)

CERTIFICATIONS

- **Microsoft Certified:** Azure Fundamentals
- **Microsoft Certified:** Azure Data Engineer Associate

PROJECTS

Customer Churn Prediction

- Developed a predictive models prototypes, reducing churn rate by 15%, leveraging machine learning techniques.
- **Skills:** Data Analysis (Python, SQL), Tableau (Data Visualization, Dashboards), Machine Learning
