

Sushrutha M Peddamma

Data Analyst

Dallas, TX | sushruthapeddamma17@gmail.com | (682) 233-5590 | [LinkedIn](#)

SUMMARY

Results-oriented Data Analyst with a strong background in data analysis, visualization, and statistical modeling, consistently enabling organizations to make informed, data-driven decisions. Adept at designing and streamlining data pipelines to ensure the integrity, accuracy, and consistency of data across complex systems, enhancing business intelligence and reporting efficiency. Skilled in leveraging SQL, Python, and R for comprehensive data manipulation, cleaning, and analysis, identifying actionable insights, and supporting key strategic initiatives. Experienced in building dynamic dashboards and reports using tools like Tableau and Power BI, improving accessibility to real-time performance metrics for stakeholders. Proficient in conducting in-depth exploratory data analysis (EDA) to uncover patterns, correlations, and trends that drive operational improvements and market insights. Demonstrated success in automating data workflows through Python scripting and modern ETL tools, significantly reducing manual processes and enhancing overall efficiency.

SKILLS

Data Analytics Tools: Power BI, Tableau, Jupyter Notebook, SQL Developer, Regression Analysis, Classification Modeling, Statistical Inference

Programming languages: Python, R, SQL, T-SQL, and SAS

Management Tools: JIRA, SharePoint, Confluence, Bitbucket, GitHub

Databases: PostgreSQL, MS SQL Server, SQL Server, MySQL, Oracle, MongoDB

Big Data Technologies: Hadoop, HDFS, MapReduce, YARN, Hive, Pig

Methodologies: SDLC, Agile, Scrum, and Waterfall

Streaming Technologies: Apache Kafka, Kafka Streams, Spark Streaming

Data Manipulation & Transformation: Data Wrangling, SSIS, ETL & ELT (Extract, Transform, Load), Data Cleaning

Data Visualization and Reporting: Data Visualization, Dashboards, & Reporting

Analytics and Decision-Making: Risk & Decision Analysis, Analytical Skills

Libraries: Pandas, NumPy, SciPy, TensorFlow, Scikit-Learn, and PySpark

Others: AWS, Azure, GCP, ETL, Glue, Airflow, and DBT

Operating Systems: Windows, Mac, and Linux

Modern Data Engineering Tools: Snowflake, Databricks, AWS Redshift, Google BigQuery

Advanced Statistical Techniques: ANOVA, Bayesian Inference, Time Series Analysis

WORK EXPERIENCE

Dell Technology, USA | Data Analyst

Jul 2023 - Present

- Partnered with cross-functional teams, including Tech, Product, and Business, to build 50+ ad-hoc and recurring reports, driving data-backed strategic decisions across business units.
- Utilized Python, SQL, and Spark to extract, transform, and analyze large datasets (millions to billions of records), improving data accessibility and operational decision-making.
- Developed and validated predictive models for customer segmentation and product testing, contributing to a 15% increase in campaign conversion rates.
- Streamlined reporting processes using BI tools (Power BI, Tableau), reducing manual effort by 40% and enhancing visualization for executive-level decision-making.
- Conducted detailed root-cause analysis and A/B testing on marketing materials and product performance, resulting in a 20% boost in user engagement.
- Designed and implemented data validation pipelines to ensure data integrity across evolving environments and storage systems (cloud/on-premise).
- Identified and implemented reporting automation and process improvements, reducing turnaround time by 25% for regulatory and compliance reporting.
- Collaborated with data engineering and DevOps teams to optimize data storage and access patterns, improving query performance by 35%.
- Created a centralized data catalog and documentation system to support knowledge sharing, audit trails, and long-term scalability.
- Supported strategic initiatives by mining and visualizing customer data trends, enhancing customer experience metrics, and driving market expansion efforts.

Avenir Technology, India | Data Analyst

Jun 2018 – Aug 2021

- Engineered robust ETL pipelines using AWS Glue, Airflow, Informatica PowerCenter, and DBT, integrating diverse data

sources and ensuring data consistency across multiple cloud environments.

- Analyzed large-scale datasets using Hadoop, Hive, and Pig, identifying performance trends and delivering actionable insights that enhanced business operations and customer engagement.
- Enhanced machine learning models with advanced feature engineering, hyperparameter tuning, and anomaly detection, resulting in a 20% improvement in model accuracy and prediction reliability.
- Designed and optimized complex SQL Server databases, automating reporting processes and reducing manual data handling by 30% through streamlined queries and scheduled workflows.
- Developed interactive dashboards in Tableau by integrating data from AWS S3, RDS, and Redshift, enabling real-time visualization of KPIs and business metrics.
- Built and maintained real-time data pipelines using Apache Kafka, supporting low-latency data processing for time-sensitive applications and improving system responsiveness.
- Ensured data security and regulatory compliance across AWS, Azure, and GCP cloud platforms, implementing best practices to safeguard sensitive data and maintain system integrity.

EDUCATION

Master's in Information Science-Health Informatics | University of North Texas, Denton, Texas
Bachelor's in Physical Therapy | NTRUHS, Vijayawada

May 2023
April 2019
