Dynamic Software Test Engineer with extensive experience in software testing and quality assurance, recognized for delivering high-quality results in fast-paced environments. Proficient in Tricentis Tosca Automation, with strong capabilities in manual and web testing methodologies. Expertise in automated testing tools such as SQL, JIRA, and Postman facilitates efficient bug tracking and swift resolution of critical issues, contributing to improved product reliability and fostering seamless collaboration within teams. Committed to driving excellence in software quality through meticulous attention to detail and innovative problem-solving skills.

TECHNICAL SKILLS

- **Testing Tools:** Tricentis Tosca, qTest, JIRA, Postman
- **Testing Types:** Automation, Functional, Regression, Smoke, API, Database Testing, End-to-end testing, User acceptance testing
- **Databases:** PostgreSQL, Teradata, DBeaver, Studio 3T
- **Languages/Concepts:** SQL, Model-Based Test Automation (MBTA)
- **Methodologies:** SDLC, STLC, Agile/Scrum
- **Other Skills:** Manual testing, Regression testing, SQL validation, Black box testing, Bug tracking, Quality assurance, Test cases design, Data-driven testing, Web-based testing

ACCOMPLISHMENTS

- Improved overall test coverage by 35% through implementation of reusable Tosca automation modules.
- Reduced manual regression effort by 50% after successfully automating end-to-end workflows using Tricentis Tosca.
- Designed and integrated automated test execution pipelines in Jenkins and Azure DevOps, enabling continuous testing within CI/CD.
- Identified and documented critical defects in early sprints, saving approximately 15% in post-release defect costs.
- Enhanced data validation efficiency by implementing optimized SQL scripts across PostgreSQL and Teradata databases.
- Actively collaborated with developers and product owners in Agile ceremonies, contributing to improved sprint delivery predictability.
- Recognized by project leadership for maintaining 100% test traceability and comprehensive reporting in qTest.

PROFESSIONAL EXPERIENCE

SOFTWARE TEST ENGINEER | YoungElement India Pvt. Ltd. | Pune, India

04/2020 to 08/2025

Centene Corporation (Healthcare)

St. Louis, USA

TOSCA Automation Engineer

Jul 2023 – Aug 2025

- Led the design and development of end-to-end regression and smoke test suites using Tricentis Tosca, applying Model-Based Test Automation (MBTA) principles for reusable modules.
- Successfully integrated Tosca automation execution into Jenkins and Azure DevOps pipelines, enabling Continuous Testing (CT) within the CI/CD framework to support rapid release cycles.
- Specialized in performing complex functional testing on healthcare-specific applications (e.g., CAPE), verifying compliance, member data management, and claims processing workflows.
- Executed SQL-based backend validation and data reconciliation using Teradata and PostgreSQL to ensure the integrity and accuracy of critical member and policy data.
- Conducted API testing using tools like Postman to validate critical service layers and data exchange between various healthcare systems and third-party services.
- Measured and reported on key quality metrics, contributing to a 50% reduction in manual regression effort and achieving a 35% increase in automated test coverage.
- Collaborated closely with Development and Product teams in Agile/Scrum environments, ensuring high-quality user stories and implementing a shift-left testing approach.
- Managed the full defect lifecycle within JIRA and qTest, focusing on root cause analysis of issues identified by the automated suites.

ASOS (E-Commerce)

London, UK

Software Test Engineer

Jan 2022 – Jun 2023

- Performed comprehensive Manual and Functional Testing for complex web applications, ensuring all features meet design specifications and user requirements.
- Proficient in ETL/Backend Testing and data validation, utilizing complex SQL scripting to verify data integrity, reconciliation, and quality across Teradata and PostgreSQL.
- Conducted hands-on API testing using Postman for RESTful web services, validating data inputs/outputs and confirming correct application business logic.
- Highly skilled in the full defect lifecycle, using JIRA and qTest for meticulous bug tracking, detailed documentation, and maintaining 100% test traceability.
- Applied rigorous QA methodologies across diverse and critical sectors, including Banking, E-commerce (Ajio), and Healthcare (Centene).
- Actively contributed to Agile/Scrum teams, collaborating with developers and product owners in ceremonies to enhance sprint predictability and overall product quality.
- Designed, executed, and maintained detailed functional, regression, and smoke test cases to ensure comprehensive coverage and quality assurance.
- Adopted Manual Web Testing methodologies, covering browser compatibility, user experience (UX), and black box testing across various platforms.

Trustly (Banking)
Test Engineer

Stockholm, SWE
Apr 2020 – Dec 2021

- Designed and documented detailed functional and regression test cases based on user stories and requirements for banking applications.
- Manually executed test cases for critical user flows, specifically focusing on the payment initiation and account linking processes ("Pay by Bank").
- Logged, reported, and tracked defects and issues found during testing using JIRA and qTest, providing clear steps to reproduce the issue.
- Performed backend database validations using basic to intermediate SQL queries to verify transactions, customer accounts, and data consistency in databases like PostgreSQL and DBeaver.
- Executed tests to ensure seamless integration between the Trustly platform and various client bank systems for secure money movement.
- Actively participated in daily smoke tests and scheduled regression cycles to ensure new code deployments did not break existing functionality.
- Participated in grooming and planning sessions to review and understand business and technical requirements, ensuring testability and clarity.
- Assisted in verifying and maintaining the readiness of test environments and test data needed for execution.

EDUCATION

PUNYASHLOK AHILYADEVI HOLKAR SOLAPUR UNIVERSITY Master of Engineering Specialization: Electrical Engineering	Solapur, IN <i>Jul 2019</i>
SKN SINHGAD COLLEGE OF ENGINEERING Bachelor of Engineering Specialization: Electrical Engineering	Pandharpur, IN <i>Jun 2015</i>

CERTIFICATIONS

- Tricentis Tosca Automation Engineer Level 1 – Tricentis (2025)
- Tricentis Tosca Automation Specialist Level 1 & 2 – Tricentis (2025)
- Tricentis Tosca Test Design Specialist Level 1 & 2 – Tricentis (2025)

ADDITIONAL INFORMATION

- Authorized to work in the U.S. (L2S Visa)
- Open to relocation within the United States
- Available for hybrid or remote QA/Automation roles
