EDUCATION

NC State University, Raleigh, NC

Master of Computer Science

August 2023 - May 2025

GPA: 3.899

Coursework: Design and Analysis of Algorithms, Software Engineering, Database Management System, Foundations of Data Science, Human Computer Interaction

SIES Graduate School of Technology, Navi Mumbai, India

Bachelor of Engineering in Informational Technology

August 2019 - May 2023

GPA: 9.75/10

Coursework: Data Structures and Algorithms, Business Intelligence, Cloud Computing, Software Testing & Analysis

SKILLS

- **Languages:** Python, C++, C, HTML, CSS, Node.js, JavaScript, PHP, C#, R
- **Databases and Operating Systems:** MySQL, PostgreSQL, MongoDB, Windows, Linux
- **Tools and Framework:** Git, Tableau, AWS, Visual Studio, PowerBI, Figma, Excel, Wordpress, Bootstrap, ReactJS, Node, Flask, .Net

EXPERIENCE

Research Assistant, North Carolina State University, Raleigh, NC, USA

August 2024- Present

- Developed and deployed a web-based application using Flask to visualize motion tracking and behavioral data, enhancing accessibility and usability
- Designed interactive and responsive dashboards using JavaScript and Bootstrap, enabling real-time visualization of cellular trajectories and behavioral trends.
- Created efficient data processing pipelines in Python to handle large-scale datasets, automating workflows and improving analysis speed by approximately 35%.

Web Development Intern, SIES Graduate School of Technology, India

June 2022 - August 2022

- Collaborated extensively in the development process of a comprehensive web application leveraging HTML, CSS, JavaScript, and PHP and contributed to the design and implementation phases, ensuring seamless integration of front-end and back-end functionalities.
- Designed and facilitated the deployment of the website, and reduced page load time by 14% through content compression and optimization.
- Took a leading role in enhancing the application's usability by implementing interactive features and dynamic content using JavaScript, while also developing robust server-side logic and efficient database interactions.

PROJECTS

Electronics products website

- Designed and developed a robust e-commerce website for electronics shopping, with the use of **CSS, HTML, Javascript, and React** to create a seamless user experience, increasing user engagement by 7%.
- Employed **Bootstrap** to enhance the website's interface, resulting in a 20% improvement in design accessibility for users with color vision deficiencies.

Job Aggregator

- Engineered a user-friendly job aggregator website using Python, HTML, CSS, and PHP, with SQL integration for seamless resume uploads and personalized job preferences.
- Applied advanced web scraping techniques to meticulously gather and consolidate job postings from major platforms such as LinkedIn, Indeed, and Monster.

Web Application to store Passwords

- Engineered an efficient web application to store the passwords safely, making use of **python** for the front end.
- Extensive use of encryption algorithms to securely encrypt the passwords.

Blood Bank Management System

- Developed a web application using **Java, SQL**, and **JDBC** that efficiently stores all the information regarding donors & recipients along with the stock of blood from various groups available at a blood bank.
- Implemented database normalization techniques for highly efficient schema design.

ACHIEVEMENTS & EXTRACURRICULAR

SIES Graduate School of Technology: Led a team of 3 to rank 2nd in Projexions'23 project competition in the IT department

SIES Graduate School of Technology: Led a team of 4 to rank 2nd in the Cognition'22 project competition in the IT department

IEEE 2023 4th International Conference for Emerging Technology (INCET): Published a paper on 'Real Time News Analysis using Natural Language Processing'
