SUMMARY

Results-driven Financial Data Analyst with 3+ years of experience in data analytics, financial reporting, and business intelligence. Strong analytical skills with the ability to translate complex data findings into meaningful business insights that support strategic decision-making. Proficient in SQL, Excel, Power BI, and Tableau, with hands-on experience in report development and data cleansing across financial systems.

EDUCATION

Lawrence Technological University

Master of Science in Business Data Analytics, GPA 3.91/4

Aug 2023 – May 2025

Michigan, USA

Coursework: Python, Data Visualization, DBMS, Statistics, Digital Marketing, Management Information Systems

Anna University

Aug 2016 - April 2020

Bachelor of Engineering in Civil Engineering

India

SKILLS

Programming & Analytics: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), Jupyter notebook, VS Code

BI & Reporting Tools: Tableau, Power BI, Excel, Word, PowerPoint, Visio, JIRA, GitHub

Databases & ETL Tool: MySQL, MS SQL Server (2022), PostgreSQL, Azure SQL Database, SAP BODS, Informatica

ETL & Data Pipelines: ETL development, Data modeling, Big Data, Data warehousing

PROFESSIONAL EXPERIENCE

KGS Technology Group

July 2025 – Present

Data Analyst

- Collected, cleaned, and prepared datasets from internal and external sources to ensure accuracy and usability for ETL.
- Performed exploratory data analysis (EDA) using SQL and Python to uncover trends, anomalies, and insights.
- Queried and managed relational databases to extract and manipulate data for reporting and analysis.
- Designed interactive dashboards and reports in Power BI to communicate insights and support strategic decision-making.
- Automated repetitive reporting and data workflows with scripts, improving efficiency and reducing manual effort.
- Led end-to-end data migration activities, including data extraction, transformation, validation, and seamless loading from legacy systems to cloud-based databases, ensuring data integrity and minimal downtime during system transition.

Tata Consultancy Services

Aug 2020 – July 2023

Data Analyst

- Collaborated with stakeholders to gather requirements and deliver recommendations, improved performance by 15%.
- Administered and optimized SQL Server and PostgreSQL databases in clustered environments, ensuring high availability and performance. Designed and implemented relational and non-relational database structures tailored to business needs.
- Developed optimized stored procedures and triggers to enforce data integrity, validation, and transactional logic.
- Analyzed 500k+ sensitive financial records, ensuring data security and compliance while delivering decision insights.
- Designed Power BI reports using DAX and Power Query to transform data into visualizations, driving informed decisions.
- Enhanced ETL workflows using Informatica to automate tasks, improve efficiency, and maintain high data quality.

KEY PROJECTS

US Baby Name Analysis (2011-2019) | Python (Pandas, matplotlib), Jupyter Notebook

- Analyzed naming trends using Pandas and Matplotlib to reveal patterns in gender, ethnicity, and shifts in naming practices.

Airbnb Pricing Trends in Europe | Tableau, MS Excel

- Built dashboards analyzing 10 European cities to reveal pricing and satisfaction trends, enabling data-driven decisions.

Chronic Disease Cost Analysis Dashboard | Power BI

- Designed a dashboard to analyze treatment costs and visits, enabling cost reduction and better resource allocation.
