

Swathi Kakani

Indianapolis, Indiana | (317) 965-7734 | kakaniswathi44@gmail.com | LinkedIn

EXPERIENCE

- **Data Engineer 2, Skyline Infrastructure** Jan 2023 – Present
 - Led development of scalable **data pipelines** using **Azure Data Factory**, processing over 5TB of data daily across enterprise systems.
 - Designed real-time ingestion framework using **Event Hubs** and **Databricks**, reducing data latency by 65%.
 - Implemented advanced **ETL pipelines** with **PySpark**, achieving 40% faster batch processing.
 - Automated data validation with **Delta Live Tables**, ensuring 99.9% pipeline reliability.
 - Integrated **Azure Data Lake** and **Synapse** for unified analytics, enhancing business reporting.
 - Created parameterized, reusable ADF components to standardize ingestion from 10+ data sources.
 - Collaborated with DevOps to deploy pipelines via **Terraform** and **Azure DevOps**.
 - Built dynamic Power BI dashboards linked to real-time Azure SQL views for executive-level reporting.
 - Standardized metadata management across pipelines, improving data governance and discoverability.
 - Mentored 3 junior engineers in Azure data stack best practices, accelerating onboarding.
 - Optimized pipeline runtimes by 50% through dynamic partitioning and broadcast joins in **Spark**.
 - Worked with stakeholders to prioritize features using Agile sprints, reducing delivery cycles by 20%.
 - Integrated third-party APIs via **Azure Functions** for seamless cross-platform data collection.
 - Implemented row-level security in Power BI and Synapse for role-based data access.
 - Achieved 99.99% uptime in production data systems via robust monitoring and alerting mechanisms.
- **Data Engineer, Tata Consultancy Services** Jan 2021 – Dec 2022
 - Designed ETL workflows using **Azure Data Factory** for data ingestion and loading into **Synapse Analytics**.
 - Built scalable data transformations using **Databricks** and **PySpark**, improving throughput by 50%.
 - Engineered real-time data pipelines using **Event Hubs** and **Stream Analytics** for instant analytics.
 - Implemented **Oracle to Azure SQL** replication via **GoldenGate** and ADF for near real-time sync.
 - Migrated on-prem Oracle DBs to **Azure SQL MI**, reducing infra cost by 50%.
 - Designed secure storage architecture with **Data Lake Storage Gen2**, integrating with Power BI.
 - Created 25+ dashboards in **Power BI** and **Tableau** for real-time business insights.
 - Streamlined UAT process using Agile practices and defect tracking system, cutting testing cycles by 30%.
 - Executed 150+ test cases at client site (Humana), reducing delivery time by 25%.
 - Developed parameterized ADF pipelines with CI/CD deployment using Azure DevOps.
 - Enhanced data quality through built-in ADF data flow transformations and rule-based validations.
 - Optimized query performance by indexing and partitioning Azure SQL tables.
- **Data Engineer, Microgrid Technologies** Jan 2020 – Jan 2021
 - Automated ETL pipelines using **AWS Glue** with **Spark**, reducing manual errors by 80%.
 - Built real-time streaming pipelines using **AWS Kinesis + Lambda**, processing 1M+ records/min.
 - Architected secure **Data Lake** on S3 using **Lake Formation**, integrating 10+ data sources.
 - Integrated APIs via **AWS API Gateway** and Glue connectors to automate data ingestion.
 - Utilized Parquet, ORC, Avro formats for high-performance queries in S3/Redshift.
 - Boosted **Snowflake** performance with clustering keys and materialized views, speeding queries by 60%.
 - Developed QuickSight dashboards for live analytics and used **Athena** for ad-hoc querying.
 - Deployed ML models on **SageMaker** for demand forecasting, with 92% accuracy.
 - Implemented monitoring via **CloudWatch** and automated deployments using **CodePipeline**.

EDUCATION

Indiana University Purdue University Indianapolis (IUPUI) – Master's in Applied Data Science; GPA: 3.7/4.0
VRS Engineering College, India – Bachelor's in Electronics and Communication Engineering

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, PHP, HTML/CSS, JavaScript, Bash

Frameworks/Libraries: PySpark, Pandas, NumPy, TensorFlow, Scikit-learn, Flask, Spark, Airflow, SSIS

Tools/Technologies: Azure Data Factory, Databricks, QuickSight, Power BI, Tableau, Terraform, Git

Databases/Cloud: Snowflake, Azure Synapse, Redshift, MySQL, Oracle, AWS, Azure, GCP
