SUMMARY

Data Science Enthusiast with a strong foundation in statistical analysis, machine learning, and data-driven problem-solving. Skilled in Python, SQL, and data visualization tools such as Tableau and Matplotlib. Experienced in end-to-end ML project development, including data wrangling, preprocessing, feature engineering, predictive modeling, and deriving insights from large datasets. Recently earned AWS Certified Machine Learning – Specialty and AWS Certified Cloud Practitioner, strengthening expertise in cloud-based ML deployment and scalable analytics solutions. Passionate about applying analytical techniques to solve real-world problems and uncover business opportunities. Took a planned career break (Aug 2020 – June 2024) to care for family and upskill, returning with enhanced technical capabilities and industry-recognized AWS certifications.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **ML/AI:** Linear/Logistic Regression, Random Forest, XGBoost, CatBoost, ANN, RNN, NLP (Sentiment Analysis), Recommendation Systems
- **Frameworks:** TensorFlow, Keras, PyTorch
- **Big Data:** PySpark, Hadoop, MongoDB, Cassandra
- **Tools & Platforms:** Microsoft Excel (advanced), SAP ERP, SharePoint, Tableau, Power BI, Pandas, NumPy, Matplotlib, Seaborn, Git, Streamlit, Jupyter, Google Colab
- **Cloud & DevOps:** AWS Certified Machine Learning – Specialty, AWS Certified Cloud Practitioner, S3, EC2, Lambda, IAM, CloudWatch, Athena
- **Concepts:** Data Preprocessing, Feature Engineering, Model Evaluation, A/B Testing, Forecasting, Classification

PROJECTS

Project: Customer Churn Prediction ANN Model ([App](#))

June 2025 – June 2025

Goal: Built an end-to-end AI-powered app using an Artificial Neural Network (ANN) to predict customer churn probability from key customer attributes.

Tools: Python, TensorFlow/Keras, Pandas, Streamlit, Matplotlib

Impact: Built a customer churn prediction system using TensorFlow ANN, achieving ~87% training and 86.6% validation accuracy. Deployed via Streamlit for real-time risk scoring and early intervention. Reduced overfitting with early stopping at Epoch 16.

RECENT PROFESSIONAL EXPERIENCE

Data Science Career Track Fellow, Springboard | Remote

June 2024 - May 2025

- 550+ hours of hands-on curriculum, with 1:1 industry expert mentor oversight, and completion of 2 in-depth capstone projects.
- Developed machine learning models for predictive analytics, including ANN, XGBoost, random forests and CatBoost model, in identifying trends and improving decision-making processes.

- Worked with large datasets, performing data cleaning and feature engineering to prepare data for analysis.
- Utilized SQL to query and retrieve data from relational databases, providing key insights into customer purchasing behaviors.

Project 1 - Product Rating Predictor ML Model for Fashion Products (App)

Goal: Create a product rating system to predict user ratings for fashion products and enable personalized recommendations for improved customer experience.

Tools: Python, SQL, CatBoost, Random Forest, XGBoost, Matplotlib / Seaborn.

Impact: Built a Streamlit app using CatBoost to predict product ratings and recommend top-N items; achieved RMSE of 0.016 and improved personalization for fashion e-commerce users.

Project 2 - Demand Forecast ML Model

Goal: Develop a “Forecasting ML model” to forecast the demand for goods purchased.

Tools: Python, SQL, Random Forest, XGBoost, Linear regression, Matplotlib / Seaborn.

Impact: Reduced forecasting error by 35% (vs. baseline) using Random Forest, achieving a MAE of 13.45 for SKU-level demand predictions; improved inventory planning and minimized stock-outs.

Supply Chain Analyst, Microsoft (Contract) | Redmond, WA

August 2017 - July 2020

- Managed \$50M+ in SMB and dropship orders using SAP ERP and SharePoint, achieving 99%+ case fill rate and ensuring timely global deliveries with high customer satisfaction.
- Led process optimizations across SMB and B&M channels, saving 15+ hours weekly and improving dropship flows through Lean/Six Sigma initiatives and supplier collaboration.

Program Manager, Amazon (Contract) | Seattle, WA

Dec 2016 - July 2017

- Streamlined Amazon device transfers by 70–80% through automation, SOP (Kaizen) design, and improved reconciliation processes across the fulfillment network.
- Led cross-functional coordination for global product movement and used SQL, Tableau, and internal tools to analyze operations, drive faster deliveries, and implement process improvements.

EDUCATION & CERTIFICATIONS

AWS Certified Machine Learning – Specialty (MLS-C01) | Amazon Web Services | 2025

AWS Certified Cloud Practitioner (CLF-C02) | Amazon Web Services | 2025

Springboard | Remote | 2025 | Data Science Career Track Certification

Stanford University | Remote | 2021 | Product Management

University of Washington | Seattle, WA | 2019 | Certificate in Lean Six Sigma Management (Green Belt)

Northwest University | Kirkland, WA | 2016 | Master of Business Administration

University of Washington | Seattle, WA | 2015 | Certificate in Business Analysis

University of California | Remote | 2015 | Business Intelligence and Data Warehousing

Lovely professional University | Jalandhar, India | 2012 | Bachelor of Technology
