Tech-savvy manager combining business analysis expertise with leadership to deliver innovative, data-driven solutions.

EDUCATION

Degree	Institute	CGPA	Year
Master's in Data Analytics Engineering	George Mason University	4/4	2023-2025
Bachelor of Engineering	Vidyavardhini's College of Engineering and Technology	8.44/10	2018-2022

PROFESSIONAL EXPERIENCE

Software Data Operations Engineer, MAQ Software, Redmond, US **May 2025 – Present**

- Manage multiple enterprise reporting projects for a top 5 global client, ensuring alignment with business goals, scope, and timelines.
- Gather and translate business requirements into user stories for reporting and data engineering streams.
- Partner with project managers and global stakeholders to drive delivery across data pipelines, modeling, and dashboarding.
- Apply Agile and Scrum practices to ensure timely execution, sprint planning, and backlog management.
- Coach junior analysts on requirements documentation and data validation best practices.

Data Analyst Intern, iQuasar LLC, Fairfax, US **January 2025 – May 2025**

- Conducted business and systems analysis for cloud-native solutions, aligning requirements with federal compliance standards.
- Developed requirement specifications for AWS/Azure-based data platforms, ensuring traceability from business needs to technical delivery.
- Led elicitation and validation meetings with stakeholders to clarify objectives and prioritize deliverables.

Data Analyst – StateBook International, Inc (via George Mason University Capstone Project), New York, US **January 2025 – May 2025**

- Analysed and interpreted large-scale electricity generation data from EIA Forms 860 and 923 to extract actionable insights at the generator level across operable, proposed, and retired power plants.
- Designed automated pipelines using AWS Lambda, EC2, and Glue to translate business reporting requirements into scalable data solutions.
- Managed Scrum activities with YouTrack to streamline cross-team collaboration, increasing transparency and delivery quality.

Software Data Operations Engineer Intern, MAQ Software, Redmond, US **May 2024 – August 2024**

- Consolidated data from various sources into the One Commercial Data Model (OCDM) for a unified data source. Backtracked tables and relationships for reports with different sources, developed lake houses, shortcuts, and reports in Microsoft Fabric, establishing a single source of truth.
- Successfully rolled over 15 Power BI reports from FY24 to FY25.
- Gathered requirements, directed team members across time zones, and resolved blockers to ensure smooth implementation.

Software Engineer, MAQ Software, Mumbai, India **July 2022 – July 2023**

- Scaled in data modelling, Power BI reporting and modelling using Power BI Desktop and Power BI Report Builder to automate the process of maintaining sales records maintained in a massive dataset.
- Built custom interactive charts using React.js for seamless integration within Power BI dashboards.

RESEARCH ACHIEVEMENTS

Mumbai Local Railway Crowd Management (INDIACom-2020) **March 12th - 14th, 2020**

- Engineered IoT solution for efficient crowd dynamics in Mumbai Local Railway.

NLP-Based Meeting Summarizer (INDIACom-2022) **March 23rd - 25th, 2022**

- Developed NLP-based meeting summarizer using Gensim, Text Rank and Pegasus.

PROFESSIONAL PROFICIENCIES: Technical, Soft, and Managerial Skills

Tech stack: Python, SQL, Azure Services, Power BI, Microsoft Fabric.

Certifications: Microsoft Certified: Fabric Analytics and Data Engineer Associate [DP700 & DP600].

Engineering: Pressure management, Presentation skills, Self-reliance, Seizing responsibility.

Business: Product Development, Customer Engagement, Cross-Functional Collaboration, Team Management.
